

AKHIL TALASHI

Boston, MA | +1 (857) 693 9855 | 95akhiltalashi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-Stack Software Engineer with 3 years of experience building robust, scalable systems using Java (Spring Boot), Node.js, and AWS. Skilled in designing secure RESTful APIs, tuning databases, and enhancing system reliability. Focused on strengthening backend architecture to support performance, stability, and business growth.

WORK EXPERIENCE

Humanitarians.AI

Nov 2024 – Apr 2025

Software Engineer

Boston, MA

- Pioneered an AI-powered cross-platform mobile app using **React Native**, **Node.js**, **TypeScript**, and **Python** to automate Indian dish recognition and nutritional reporting, reducing manual food-logging time by **75%** across **40+ dishes**
- Automated background-job processing with **Redis queues** and **Node.js workers** to handle **5,000+ daily image-recognition** tasks with **99% reliability**, reducing manual retry rates by **90%**
- Enhanced **CI/CD** workflows with **GitHub Actions**, **Docker**, and **AWS ECS** to achieve **80% faster daily deployments**
- Collaborated with cross-functional teams to consolidate UI into a modular **React** component library, eliminating **80%** of duplicated code, delivering **20+** reusable elements, and accelerating **feature rollout by 30%** across **10+ applications**

Bear Brown & Company

Jul 2024 – Nov 2024

Software Engineer

Boston, MA

- Mentored **4 junior engineers** and led backend development of a multi-user dashboard using modular **Express.js** architecture with **JWT** and **RBAC**, securing access for **300+ users** and accelerating release cycles by **40%** via CI/CD automation.
- Optimized **MongoDB** schemas through referencing (normalization) and compound indexing, **reducing query latency by 50%** and enabling real-time access to user, project, and task data
- Developed and maintained secure **RESTful APIs** with integrated business logic and validation, ensuring **99.9% system availability** and **error rates below 1%** through robust exception handling and automated testing
- Executed test-driven development (TDD) with **Jest**, driving **100% backend test coverage** and reducing production bugs by **70%**
- Deployed microservices on **AWS** with **TLS/SSL encryption**, increasing system availability to **99.99%** and safeguarding user data

Merizon Technologies

Oct 2020 – Aug 2022

Software Engineer

Delhi, India

- Spearheaded end-to-end development of a cloud-native Supply Chain Management platform for **3 enterprise clients**, processing **\$10M+** in annual transactions with **Java (Spring Boot)**, **React**, and **AWS**
- Delivered **15+** responsive React components with **Redux** and **Recharts** to power dashboards for tracking and analytics, enabling real-time insights and increasing **customer satisfaction by 18%**, as measured by NPS
- Drove full-stack TDD (JUnit, Mockito, Jest), achieving **92% code coverage** and reducing QA signoff by **2 weeks** per release
- Managed containerized deployments on **Kubernetes** to maintain **99.9% uptime** while cutting infrastructure costs by **15%**
- Refined Jenkins–Docker-based CI/CD pipeline to improve deployment speed by **50%** and shift from **biweekly** to **weekly releases**

PROJECTS

Leetify (JavaScript, React.js, Redux, Node.js, Express.js, MongoDB, Stripe, AWS EC2) | [GitHub](#) | [Live Demo](#)

- Built a full-stack coding platform supporting real-time code execution with **Monaco Editor**, **secure authentication**, **Stripe-based subscriptions**, and **AWS/Vercel deployment**; used by **100+ users** for coding interviews and technical practice

Rentwheel (Java, Spring Boot, Hibernate, MySQL, Maven, Thymeleaf) | [GitHub](#)

- Engineered a **Spring Boot MVC-based** car rental system with **role-based access control** and **Hibernate ORM**, reducing inventory lookup time by **40%** through optimized **HQL queries** and efficient ORM-based data mapping

EDUCATION

Master of Science in Information Systems

May 2024

Northeastern University, Boston, MA

- Graduate Teaching Assistant** (*Web Development and User Experience*)

Bachelor of Engineering in Information Technology

June 2017

Mumbai University, Mumbai, India

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3, SCSS

Frameworks and Libraries: React.js, Redux, Next.js, React Native, Node.js, Express.js, Spring Boot, Hibernate, Tailwind CSS

Databases and Cloud: Amazon Web Services (AWS), Google Cloud Platform (GCP), MongoDB, Postgres, MySQL

DevOps and Tools: Git, GitHub, Jenkins, CI/CD pipelines, Docker, Kubernetes, Microservices Architecture, RESTful API Development

Testing and Methodologies: Agile, Scrum, TDD, End-to-End Testing (E2E), JUnit, Mockito, Jest, Software Development Life Cycle
