

Akhila Aitha

Data Analyst

Fort Lauderdale, FL | 814-449-8339 | A.Akhilashetty01@gmail.com

SUMMARY

I'm a Data Analyst with over 4+ years of experience helping teams make better decisions through Data. I enjoy working with **SQL** and **Python** to pull insights from complex datasets, and I've built **dashboards** in **Tableau** and **Power BI** that made reporting easier and faster. I've worked with tools like **Snowflake**, **PostgreSQL**, and **MongoDB**, and I'm comfortable in cloud environments like **AWS** and **Azure**. I like solving problems, simplifying messy data, and building solutions that actually get used.

SKILLS

Languages & Scripting:	SQL, Python (pandas, NumPy), DAX
Dashboards:	Tableau, Power BI, Looker
Databases:	PostgreSQL, SQL Server, Snowflake, MongoDB
ETL & Integration:	SSIS, Talend, Informatica, Python scripting
Cloud & Monitoring:	AWS, Azure, Splunk, Datadog
Version Control & Tools:	Git, Excel (Advanced), JIRA
Methods & Analysis:	Agile, Data Modeling, KPI Analysis, A/B Testing

EXPERIENCE

Data Analyst – Liberty Mutual Insurance, Boston-MA (Working Remotely from FL)

May 2023 - Current

- Collaborated in an **Agile** team to deliver sprint-based data solutions, contributing to a 25% faster turnaround on analytics requests.
- Wrote optimized **SQL queries** and **PostgreSQL stored procedures**, improving data retrieval speed by 35% for recurring reports.
- Automated **ETL** workflows using **Python**, reducing manual data prep time by 40% and improving data accuracy across reporting systems.
- Integrated data from **NoSQL (Couchbase)** and relational databases to support holistic performance analysis across business units.
- Designed interactive **Power BI dashboards & SSRS** for business users, resulting in a 30% increase in self-serve analytics adoption.
- Created **custom Power BI dashboards** with drill-through capabilities and dynamic filters to track KPIs across claims, underwriting, and customer service teams.
- Implemented **automated data refresh schedules** and alert notifications in Power BI, improving data visibility and response time by **30%**.
- Integrated Power BI with **Azure SQL Database and SharePoint** for seamless data access and collaborative insights sharing.
- Transformed fragmented log and metrics data from **Splunk** and **Datadog** into centralized reports, enhancing system performance monitoring and early issue detection.
- Developed reusable scripts for data cleansing, validation, and transformation in **Python (pandas, NumPy)** to ensure consistent and high-quality datasets.
- Used **Git** for version control and collaboration on code and **SQL scripts** in cross-functional analytics projects.
- Led root cause analysis of data anomalies, contributing to a 20% reduction in report discrepancies and operational errors.

Data Analyst – Envision Physician Services, Sunrise-FL

November 2022- April 2023

- Built dynamic **Tableau dashboards** from scratch to visualize system performance, reducing issue detection time by 40% through real-time data exposure.
- Automated **complex data pulls** using **Python** and **SQL**, feeding into **Tableau dashboards** and eliminating 15+ hours/week of manual effort.
- Integrated data from **Snowflake**, **SQL Server**, and system logs (**Splunk**, **Datadog**) to create unified views for engineering and operations.
- Designed **parameterized Tableau workbooks** with drill-down capabilities to empower teams with self-service analytics and reduce dependency on central reporting.
- Streamlined reporting pipelines using **ETL** tools like **SSIS** and **Python scripts**, improving **Tableau dashboard** refresh reliability by 35%.
- Applied data wrangling and scripting skills in **Python** to preprocess large datasets before visualization, increasing dashboard load speed by 50%.
- Delivered executive-ready **Tableau** storyboards and performance summaries that contributed to system upgrade decisions and capacity planning.
- Used **Git** for version control and collaborated in **Agile sprints**, continuously improving dashboards based on user feedback and usage metrics.

- Proactively shaped dashboard usage strategies, leading to a 30% increase in **Tableau** adoption across system engineering teams.

Data Analyst – Capri Global, Hyd-India

December 2018 - July 2021

- Developed **ETL pipelines** using **Python** (Pandas) to automate data ingestion, **reduced manual processing time by 50%, saving 10 hours per week.**
- Utilized **SQL** to query and extract data from various databases, including data residing in **AWS Redshift**, for analysis and reporting purposes.
- Conducted exploratory data analysis (EDA) using **Python** to identify user behavior trends, influencing a **15% increase in customer retention.**
- Designed and analyzed A/B tests using statistical functions in **Python** to assess the impact of product changes, **resulting in a 12% improvement** in user engagement.
- Implemented statistical tests (t-tests, chi-square) in **Python** to validate hypotheses and support data-driven decisions.
- Built interactive dashboards using **Tableau**, sourcing data from various databases like **Postgres** and **AWS S3.**
- Translated complex datasets into actionable insights for non-technical stakeholders through clear data visualizations and reports.
- Analyzed sales funnel metrics using **SQL** and **Python**, identifying a key drop-off point that led to a **20% improvement** in conversion rate after recommended changes.
- Created financial forecasting models using Excel and **Python**, which **improved budgeting accuracy by 25%.**
- Proficient in **SQL, Python**, Excel (PivotTables, VLOOKUP), Tableau, Power BI, Google Analytics, and **AWS (S3, Redshift).**
- Partnered with cross-functional teams including Product, Marketing and Engineering to define KPIs and measure campaign performance, utilizing **SQL** to track and analyze key metrics.

EDUCATION

Master of Science in Computer Information Systems – New England College, New Hampshire - 2023

Bachelor of Technology in Computer Science and Engineering – KL University, India - 2019

CERTIFICATIONS

- Databricks Certified Data Engineer Associate.
- Microsoft Certified: Power BI Data Analyst Associate.
- Oracle Database SQL Certified Associate.
