## EDUCATION

- Master of Science in Computer Science**, University of California, Riverside, **GPA- 3.83/4 (First-Class Honors)** Dec 2024
- Coursework – Design & Analysis of Algorithms, Big Data, Artificial Intelligence, Database Management, Software Testing.
- Bachelor of Engineering - Computer Science**, Osmania University, India, **GPA- 3.84/4 (First-Class Honors)** Sep 2020
- Coursework – Data Structures and Algorithms, Software Engineering, Machine Learning, Object Oriented Programming.
- 

## TECHNICAL SKILLS AND CERTIFICATIONS

- **Languages & Frameworks:** Core Java, Spring, Spring Boot, REST APIs, JSP, Servlets, JDBC, Hibernate, Spring MVC, Spring Security, Spring AI, HTML, CSS (Tailwind, Bootstrap), JavaScript (Node.js, Express.js, React), Thymeleaf, SQL
  - **Web & Cloud Technologies:** Microservices, JWT Auth, Swagger, Azure (Cosmos DB), AWS (EC2, S3), Docker, Kubernetes
  - **Databases & Tools:** MySQL, MongoDB, Microsoft SQL Server, GitHub, Postman, Log4j, Apache Tomcat, Linux, Eclipse, VS Code
  - **Testing & Dev Practices:** JUnit, Mockito, Agile, MVC Architecture, Version Control, Clean Code Principles
  - **Certifications:** Microsoft Azure Fundamentals (AZ-900), Microsoft Technology Associate-HTML5
- 

## WORK EXPERIENCE

**Application Development Associate (Automotive)** | Accenture | Hyderabad, India. Mar 2021 - June 2023

- Spearheaded the design and development of a reusable **Spring Boot microservice** to decrypt encoded usernames stored in production DB, enhancing data visibility across internal applications and reducing debugging time by 40%.
- Automated data processing workflows with **Azure Logic Apps**, enabling real-time insights & reducing manual workload by 60%.
- Developed secure **RESTful APIs** with role-based access for seamless communication between microservices and UI components.
- Collaborated with UI and QA teams to integrate **backend services** with the front end (HTML, CSS, JavaScript), troubleshooted defects, and ensured seamless functionality during release sprints in an **Agile** environment.
- Deployed java applications using **Docker** and **Azure**, ensuring scalability, high availability, and seamless **CI/CD** integration.

**Full-Stack Developer Intern** | Nettlinx Limited | India. June 2019 - Sep 2019

- Ideated and developed a front-end solution to resolve recurring login session issues, which **improved user retention by 30%**.
- Collaborated in **cross-functional troubleshooting**, working alongside developers to uncover and resolve critical issues.
- Prepared technical documentation for project continuity and future reference.

**Web Developer Intern** | Pantech Solutions | India. Sep 2018 - Dec 2018

- Developed front-end features for a client website using **HTML**, **CSS**, and **JavaScript** that enhanced usability.
  - Worked closely with senior developers during code reviews that helped me gain insights into industry best practices.
  - Developed teamwork and professional communication skills by collaborating with teams and engaging with clients.
- 

## PROJECTS

**MedSync – AI-Powered Hospital Management (Java, Spring Boot, Microservices, Spring Security, MySQL, Spring AI)**

- Developed a microservices-based hospital system enabling **role-based** workflows for doctors, patients, and staff.
- Integrated Spring Security with **JWT** for secure authentication and used **AWS S3** to store discharge summaries generated via **Thymeleaf** as downloadable PDFs.
- Implemented **AI-powered diet suggestions** and dynamic discharge summary generation using **Spring AI** with **OpenAI API**.

**StayEase – Accommodation Management System (Java, Spring Boot, Spring JPA, JWT, MySQL, Log4j)**

- Built **REST APIs** for property listing, rent management, and PG availability using Spring Boot and Spring JPA.
- Enabled users to filter housing by rent/location and integrated dynamic room/bed status tracking using MySQL and **Log4j** for backend monitoring.
- Designed and implemented secure user and admin roles for controlled access to booking and property management features.

**AI-Based Resume Screening Platform (Java, Spring Boot, MongoDB, Thymeleaf, Spring AI, OpenAI, Apache PDFBox)**

- Developed a resume screening platform that analyzes uploaded resumes against job descriptions using Spring AI (OpenAI).
  - Integrated PDFBox for extracting resume content and generated **AI-based match scores** and feedback for recruiters.
  - Implemented a **responsive UI** with Thymeleaf and **HTML/CSS/JS**, providing a seamless experience for recruiters to shortlist top candidates.
- 

## ACCOMPLISHMENTS

- **"Client Value Creation"** for independently handling an internal application and delivering client success.
- **"Kudos for Great Work"** recognition from Accenture's Leadership team for conducting in-depth root cause analysis of API failures, implementing fixes that improved system reliability by 30%.
- **"You Shine Bright"** award for demonstrating exceptional adaptability as a quick learner, collaborating effectively with the onshore team, and delivering high-quality results by thoroughly understanding and addressing their requirements.
- Got featured on Accenture's **"Wall of Fame"** as FY21 Merit Holder for outstanding performance in the onboarding training.
