

AKHIL SAMALA

Akhilsamala1197@gmail.com | [LINKEDIN](#) | (818)-626-6791 | Dayton, OH, 45420.

PROFILE SUMMARY

As a driven Civil Engineering professional holding a master's degree from the ABET-accredited at University of Dayton and a bachelor's from BIHER University, backed by three years of experience leading field operations on high-rise RCC developments. Adept in project scheduling, cost control, billing, design coordination and field inspection with hands-on proficiency in industry-standard tools including AutoCAD, Primavera P6, Revit, 3D Modeling, Procore, Bluebeam and MS Project. Certified in OSHA 30-Hour, Geotechnical Foundation Design and Procore Construction Management, I bring balanced expertise in technical execution and team leadership to deliver safe, efficient and high-impact construction outcomes for Infrastructure projects.

PROFESSIONAL EXPERIENCE

Project Engineer

February 2022 – July 2023

Om Sree Builders & Developers LLP

Hyderabad, India.

- I managed a \$95M high-rise RCC residential project spread over 25 acres and overseeing three major divisions with leading a team of 6+ engineers to ensure timely, safety and its efficiency of the project execution.
- I supervised deep foundation works, retaining structures, water sumps and post-tensioned elements like slabs and beams, ensuring compliance with structural and safety standards through each construction phase.
- I led the implementation of Mivan shuttering from the podium to the top floor and verified alignment using Total Station to ensure precise structural layout and quality of the project.
- I handled BBS scheduling and inspected the construction site as per designs, processed RFIs, conducted concrete testing and supported project scheduling and estimation to align execution with budget and timeline goals.
- I delivered two project divisions 20% under budget by closely coordinating with subcontractors, resolving site issues flexibly, participated in project meetings, fostering improved communication and continuously tracking progress to meet key milestones.

Site Engineer

July 2020 – January 2022

KLC Constructions

Hyderabad, India.

- I managed site activities for a \$65M high-rise RCC project spanning 18 acres, overseeing two divisions collaborating with a team of 5+ engineers and ensuring quality control, safety compliance and timely execution with a multidisciplinary team of the project.
- I developed Bar Bending Schedules (BBS), participated in cost estimation and scheduling for clients and conducted material and concrete testing to uphold structural integrity and reduce its delays throughout the project.
- I assisted in executing deep foundation systems (raft, isolated and shallow foundations) and RCC elements- elevation structures, retaining walls and storm water facilities by facilitating Mivan and Plywood shuttering from basement through multiple levels.
- I conducted layout and testing operations using GPS, Total Station and mobile tools, delivering accurate technical reports and ensuring alignment with project specifications.
- I delivered two project divisions under budget by coordinating with subcontractors, resolving field issues, participating in project meetings and closely tracking progress to achieve milestone targets throughout the project.

TECHNICAL SKILLS & SOFTWARE PROFICIENCY

Design & Drafting: AutoCAD | Civil 3D | Revit | 3D Modeling | Staad Pro | Primavera P6 | Google Sketchup | ArcGIS Pro.

Simulation & Analysis Tools: L-Pile | Shaft | Load factor Analysis | Soil Properties Evaluation | Deep and Pile Foundation Design.

Surveying & Data Collection: Data Collection | Total Station Operation | LiDAR | Blueprint Reading | Site Surveying & Measurements.

Technical Software Suite: Bluebeam | BIM (Building Information Modeling) | MicroStation | MATLAB | Excel | Navisworks.

Construction and Project Management: Procore | Project Scheduling | Budget & Cost Estimation | Site Inspection & Coordination | Procurement | Field Operations | Risk Management | Quality Assurance | Safety Compliance | Material Monitoring.

EDUCATION

University of Dayton | master's in civil engineering | GPA: 3.71 | Dayton, OH

January 2024 – May 2025

Key Courses: Design of Construction Project Management | Risk Management | Management of Construction Organization | Contracts & Specification | Special Problems in Sustainability designs | Foundation Engineering | Masonry Design | Prestressed Structures.

BIHER University | bachelor's in civil engineering | GPA: 3.5 | Chennai, India.

August 2016 - May 2020

Key Courses - Estimation and Costing | Building Materials | Construction and Planning | Pre-stressed Concrete | Design of Reinforced Concrete and Steel Structures | Surveying and Geomatics & Strength of Materials | Surveying | Fluid Mechanics | Transportation.

ACADEMIC PROJECTS

Design of Shallow Foundation for a Bridge Pier | University of Dayton.

August 2024 – December 2024

- I conducted geotechnical investigations including soil classification, groundwater analysis and SPT testing to design a shallow bridge pier foundation in compliance with AASHTO LRFD standards. Evaluated soil bearing capacity to guide safe and structurally sound foundation planning.
- Optimized footing dimensions based on criteria such as bearing capacity, eccentricity, sliding resistance, and settlement limits. Assessed total and differential settlement to ensure long-term structural performance and foundation stability.

RecPlex Expansion Project | University of Dayton**January 2024 – April 2024**

- I led the development of a comprehensive CM bid proposal for a multi-phase building expansion integrating detailed cost projections, organizational planning and preconstruction analysis with constructability, risk and value optimization reviews.
- I devised procurement strategies, coordinated subcontractor bid packages, and mapped out site logistics, then delivered a high-impact executive presentation outlining scheduling, execution plans, and financial benchmarks to drive stakeholder alignment.

Self-Curing Concrete Using Sodium Polyacrylate | Bharath University, Chennai, India.**January 2024 – May 2024**

- I investigated the use of 0.1% sodium polyacrylate in concrete, which enhanced compressive strength to 33 N/mm² by improving workability, internal curing efficiency, and eliminating the need for external curing.
- I achieved reduced shrinkage, lower permeability, and stronger microstructural integrity while minimizing water usage and labor supporting sustainable construction in remote or arid environments.

ACHIEVEMENTS

- I led and coordinated cultural processions as part of the Cultural and Arts team, demonstrating leadership, teamwork and risk planning
- I won first place in a PowerPoint presentation competition, showcasing strong public speaking and technical communication skills.
- I managed a residential building project using BIM, project scheduling, safety protocols, risk management and 4D simulation with Navisworks.
- I gained practical insights for sustainable infrastructure, resilient design, smart city technologies and climate-adaptive water management.

CERTIFICATIONS

- Occupational Safety and Health Administration (OSHA 30) Standards.
- Construction Manager-in-Training (CMIT) – CMAA.
- PROCORE Construction Management Professional.
- Engineering Project Management (Scope- Time & Cost management, Planning & Initiating, Risk- Quality-Teams-Procurement).
- Geotechnical Foundation Design (Site Investigation, Shallow and Pile Foundation Analysis).
