PROFESSIONAL SUMMARY

Experienced Software Developer with 3+ years of expertise in building distributed systems by bridging front-end technologies (JavaScript, React) with back-end frameworks (Java, Spring Boot, Node.js). Experienced in designing RESTful APIs and microservices architecture integrated with SQL and NoSQL databases, deployed on AWS and Google cloud technologies. Established DevOps practices through Docker, Kubernetes, and Continuous Integration and Deployment(CI/CD) pipelines, following Agile methodologies to create user-centric solutions with optimal UX, showcasing decision-making and problem solving skills.

WORK EXPERIENCE

Citi **San Francisco, CA**
Software Developer Intern Jun 2024 – Present

- Developed a microservices-based fraud detection system using Java Spring Boot, React.js and MySQL, integrating LLMs for pattern recognition that delivered enterprise-grade analytics, reducing false positives by 15%.
- Constructed React.js components for a RAG dashboard leveraging event-driven architecture with Apache Kafka, RESTful APIs, and server-side pagination, reducing report generation time from 45 to 28 seconds.
- Optimized MySQL database performance through Hibernate ORM, composite indexing, connection pooling, and Redis caching, implementing a performance schema monitoring module, improving response time by 12%.
- Migrated legacy financial application to Google Cloud Platform (GCP), implementing cloud-native solutions with idempotency keys that resulted in 18% reduced system latency while ensuring data integrity for critical financial services.
- Implemented Spring Security with role-based access control, JUnit automated testing, and JSON Web Token (JWT) authentication, enhancing system security with seamless user experience.

PTC **Boston, MA**
Software Developer Jul 2023 – May 2024

- Spearheaded development of Manufacturing Workflow Automation Platform using PERN stack (PostgreSQL, Express, React, Node.js), enabling creation of production workflows without coding, reducing implementation time by 25%.
- Formulated RESTful APIs using Node.js and Express for workflow management, implementing WebSocket protocols and design patterns that improved system responsiveness by 40% compared to traditional HTTP polling methods.
- Designed PostgreSQL database schema utilizing temporal tables, database partitioning, foreign key constraints, and materialized views for efficient state tracking, reducing query latency by 30%.
- Deployed containerized infrastructure on AWS EKS (Elastic Kubernetes Service), implementing CI/CD pipelines with Jenkins that decreased deployment time by 30%, ensuring reliability and scalability.
- Collaborated with 5+ cross-functional teams throughout the end-to-end Software Development Life Cycle (SDLC), utilizing JIRA for Agile sprint management to deliver features ahead of schedule.

Sigma Infosolutions Ltd. **Bangalore, IN**
Software Developer Jun 2020 – Jul 2022

- Developed microservices-based retail system using Java Spring Boot and MySQL, implementing data processing workflows reducing system latency by 15% while enabling sales and inventory synchronization across store locations.
- Built responsive customer dashboard for a B2B supply chain platform using React.js with Redux, MongoDB, and Elasticsearch improving customer engagement by 18% through intuitive reporting features.
- Engineered back-end services for an e-commerce platform using Node.js and Express.js, implementing RESTful APIs and optimizing MySQL database queries, resulting in 25% faster response times.
- Configured secure multi-gateway payment processing module with webhook retry logic, ensuring compliance with security standards and reducing transaction failures by 12%.
- Orchestrated applications on AWS (EC2, S3, RDS) using Docker containers, establishing CI/CD pipelines with high availability that reduced deployment time by 40% while maintaining performance during peak traffic periods.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript (ES6), C++, C, Swift, TypeScript, Golang, Shell Scripting
Web Technologies: HTML5, CSS3, Tailwind CSS, jQuery, Ajax, XML, Redux, REST API, GraphQL, Bootstrap
Cloud: Amazon Web Services (ECS, Lambda, S3, DynamoDB, SQS, SNS, Cloudformation), Azure, Google Cloud Platform (GCP)
Frameworks: Spring Framework (Spring Boot, Spring MVC, Spring Security), React.js, Next.js, Node.js, Angular
Database & Data Management: MongoDB, MySQL, PostgreSQL, Oracle, JDBC, SQL Server, Snowflake, Terraform
DevOps & Version control: Docker, Kubernetes, Jenkins, Git, GitHub, GitLab
Methodologies: SDLC, Agile/Scrum, Waterfall, Test-Driven Development (TDD)
Development Tools: Visual Studio Code, IntelliJ, Eclipse, Salesforce, Postman, Mockito, SOAP UI, JIRA, Confluence

EDUCATION

Syracuse University **Syracuse, NY**
Master of Science in Computer Science Aug 2022 – May 2024

Vishwakarma Institute of Technology **Pune, IN**
Bachelor of Technology in Computer Engineering Jul 2018 – Jun 2022
