EXPERIENCE

UNIVERSITY OF CALIFORNIA, SANTA CRUZ | BUSINESS ANALYST AND DEVELOPER

January 2015 to Present | Santa Cruz, CA

- Worked with cross-functional groups to develop 20+ forms using the ServiceNow platform for UCSC's faculty, staff and students to efficiently file tickets/requests
- Created customized variables and manipulated form's layout to accommodate those variables
- Responsible for monthly "Change Management Indicators" - generated reports and analyzed the cause for each unplanned outage

PURE STORAGE | PRODUCT VIRTUALIZATION INTERN

July 2016 - September 2016 | Mountain View, CA

- Automated Pure Storage's FlashArray with VMware's vRealize Orchestrator tool
- Tested the new management tools and features to ensure the REST API plugins function properly with the orchestration and automation tools
- Enhanced workflows so customers can easily use them in other workflows or projects

SAMSUNG | RESEARCH AND DEVELOPMENT CONTRACT

Winter 2015 | Remote Location

- Created testing data for language processing engine
- Worked real time with a web application for data entry
- Met required deadlines and targets for project completion

COURSEWORK | PROJECTS

Product Design and Development

Designed an elliptical which first stores human energy and then uses the it to run other electric machines

Supply Chain Management

Designed and managed supply chain for several products Built analytical models to support strategy, planning, and operations Converted analytical models to computational models by building software by using VBA

Database Management

SQL | Data Definition | Queries and Updates | Indexes | Views | Constraints and Triggers | Relational Algebra, Query Execution, Transaction Processing

System Analysis and Design

Assembly Language

Computational Models

Abstract Data Types

Web Applications

Econometrics
