SUMMARY

Java Full Stack Developer with 4+ years of experience building scalable web applications and **RESTful APIs** using **Java, Spring Boot, Hibernate, and front-end technologies** like **React, and JavaScript**. Proven experience in designing and implementing end-to-end solutions in **Agile** environments, optimizing database operations using **SQL and NoSQL** technologies, and **integrating CI/CD pipelines** using **Jenkins and Git**. Successfully improved performance, scalability, and code quality by 30%+ across multiple projects. Hands-on experience in cloud platforms (**AWS**), **microservices**, **containerization**, and **version control**. Strong problem-solving skills and focused on delivering high-quality solutions aligned with business goals.

EDUCATION

Master Of Science in Computer Science

New Jersey Institute of Technology

New Jersey, 2023

Bachelor of Engineering in Information Technology

University of Mumbai

India, 2020

SKILLS

Languages & Frameworks: Java, J2EE, Spring Boot, Spring MVC, Hibernate, JSP, Servlets, JavaScript, TypeScript

Frontend: HTML5, CSS3, Bootstrap, jQuery, AJAX, JSP, Servlets

Databases: MySQL, PostgreSQL, Oracle, MongoDB

Cloud & DevOps: AWS(EC2, S3, RDS), Docker, Kubernetes, Jenkins, Git, Maven

Tools: Github, Bitbucket, Jira

Testing: JUnit, Mockito

Messaging & APIs: RESTful APIs, Apache Kafka, SOAP, Postman, Swagger

Architectures & Patterns: Microservices, Test-Driven Development (TDD)

Others: Agile/Scrum, CI/CD, JSON, XML, Apache Tomcat, Linux, Bash

WORK EXPERIENCE

Extreme Reach, New York | Software Developer

Nov 2023 – Oct 24

- Developed responsive and modular web applications using **Java, Spring Boot**, and **React**, improving **UI** performance **by 25%**.
- Built **RESTful** services for data integration across **microservices**, enhancing system interoperability **by 30%**.
- Integrated **Kafka** for real-time event streaming and async communication between microservices, improving data pipeline **by 30%**.
- Integrated **PostgreSQL** with **Hibernate ORM** to optimize data access and reduce database latency **by 20%**.
- Used **Docker** for containerization and deployed applications on **AWS EC2**, improving deployment speed **by 35%**.
- Implemented authentication and authorization using **Spring Security** and **JWT**.
- Participated in daily Agile stand-ups and sprint reviews to align with product delivery timelines; resolved **10+** support tickets per sprint.
- Used **Git** and **Jenkins** for version control and continuous integration, reducing build issues **by 15%**.
- Collaborated with QA teams to write unit and integration tests using **JUnit** and **Mockito**, increasing code coverage **by 40%**.

New Jersey Institute of Technology, New Jersey | Database Manager

Jun 2022 - Nov 2023

- Designed and optimized relational databases (**MySQL, Oracle**) with normalization strategies, improving query performance **by 30%**.
- Wrote complex **SQL** scripts, stored procedures, and triggers to automate administrative tasks and reporting.
- Migrated legacy database systems to cloud-based **AWS RDS** and improved system reliability **by 20%**.
- Integrated **Spring Boot** applications with **AWS RDS** and **PostgreSQL** back-ends.
- Supported full-stack development by integrating back-end database operations with **Java Spring Boot APIs**.
- Used **Hibernate** to streamline **ORM** tasks, improving data consistency and reducing manual mapping errors **by 40%**.
- Conducted data validation and cleanup tasks to maintain data integrity across multiple systems.
- Used **Git** and **Bitbucket** for version control and collaboration.

Oval SoftTech, India | Java Developer

Jul 2019 - Jul 2021

- Built modular, microservices-based backend systems using **Java, Spring Boot**, and **Hibernate**.
- Developed and maintained Java-based web applications using **JSP, Servlets**, and **Spring MVC**.
- Built interactive **UI** components using **HTML, CSS, Bootstrap**, and **JavaScript**, improving **UX** **by 25%**.
- Connected front-end modules with back-end services using **REST APIs** and **AJAX** for real-time data sync.
- Involved in writing business logic and integrating **MySQL** databases using **JDBC** and **Hibernate**.
- Used **AWS EC2** and **S3** for application deployment and static content hosting, improving scalability and availability.
- Created **Maven** based builds and maintained application deployment pipelines with **Jenkins**.
- Participated in bug fixing, performance tuning, and code reviews to ensure application stability.
- Collaborated with cross-functional teams in **Agile Scrum** cycles to deliver features on time.
- Utilized **Git** for version control and **Jira** for tracking project progress and issues.
