Cell 302-753-3491

As a graduate in Public Health with a Project Management Professional certification, I have over one year of professional experience working in both an office and a hospital setting. In my previous role as a network administrator, I reviewed contracts and onboarded pharmacies serving long-term care facilities, nursing homes and assisted living facilities. I have also worked on streamlining pharmacy credentialing information. While at the hospital, I have assisted the nursing team in new student orientation, staff role assignment, and reconciled data around patient safety, professional satisfaction, and Covid vaccine use. I have also supported grant writing, created patient education material for a community funding project, and in addition, have designed a health and physical fitness program during my internship. I am very passionate about public health, health policy, and related research, data analysis and presentation, health promotion, and patient education. I am proficient in Microsoft Office Suite, Canva software, Foxit PDF editor, Docusign, Cognos, NetSuite, and CRM softwares such as Salesforce. I thrive in a people friendly environment and can work collaboratively in a team. I am eager to expand my knowledge in the public health landscape, while also continuing to challenge myself in the new dynamic and impactful roles.

PROFESSIONAL EXPERIENCE

Managed Health Care Associates, Inc.

Parsippany, NJ

Network Administrator

September 2024 - March 2025

- Reviewed closed-door (non retail) pharmacy contracts and on-boarded those pharmacies to MHA
- Identified pharmacies that needed updated credentials/licenses and coordinated with other team members to notify the pharmacies
- Utilized Microsoft Excel to update pharmacies' liability insurances by using Excel's VLOOKUP function

ChristianaCare - Christiana Hospital

Newark, DE

Volunteer

March 2024 - July 2024

- Onboarded nursing students, registered clinical staff and assigned them roles, site placements, and rotations
- Analyzed survey data of multi-facility hospital system regarding patient safety, support system, professional satisfaction, communication and leadership, and stress levels of the associates.

Drexel University Urban Health Collaborative, Big Cities Health Coalition (BCHC)

Philadelphia, PA

Research Assistant

February 2023 – June 2023

- Compiled data from 35 BCHC member cities on city population, governance structure, major health department divisions, presence or absence of Diversity, Equity, & Inclusion Office and Chief Equity Officer
- Analyzed disparities between health departments and visually presented data using pie charts and bar graphs

Delaware Academy of Medicine

Newark, DE

Intern

June 2022 – September 2022

- Proposed preventative measures for individuals at risk of obesity based on an analysis of contributing factors using Health Belief Model that predicts health behaviors on individual perception of susceptibility
- Designed health and physical fitness program based on healthy nutrition, physical activity and parental awareness

New Castle County Head Start, Inc.

Bear, DE

Intern

December 2019 – January 2020

- Assessed the educational needs, and implemented individualized program for children from low-income families
- Supported transition of children with autism and learning disorders into kindergarten through skill development
