Location: MA, USA

SUMMARY

▫ **Business Systems Analyst with over 3+ years of experience** in optimizing business processes and enhancing operational efficiency. Expertise in **requirements gathering**, stakeholder engagement, and process modeling, utilizing methodologies **Agile and SDLC**. Proficient in **SQL** for data **analysis** and skilled in data visualization with **Power BI and Tableau**.▫

EDUCATION

Master of Science in Business Analytics

Northeastern University, Boston, United States

Sep 2022 – Dec 2023

Bachelor of Science in Computer Science University of Mumbai, Mumbai, India

Jun 2017 – Mar 2020

SKILLS

- **Methodologies:** Agile (Scrum, Kanban), Waterfall▫
- **Databases:** Microsoft SQL Server, Microsoft Access▫
- **Cloud Technologies:** Microsoft Azure, AWS (S3, Redshift)▫
- **Data Analysis Tools:** SQL, Power BI, Tableau, Qlik▫
- **Project Management:** JIRA, Confluence, MS Project▫
- **Documentation:** Business Requirement Documents (BRD), Functional Requirement Documents (FRD), Process Flow Diagrams▫▫ **ETL Tools:** SSIS, Azure Data Factory▫
- **Reporting Tools:** MS Office Suite (Excel, Word, PowerPoint)▫
- **Collaboration:** Microsoft Teams, Zoom▫
- **Business Analysis Techniques:** Cost-Benefit Analysis, GAP Analysis, Risk Assessment, Root Cause Analysis, Data Modelling▫

EXPERIENCE

M4A Foundation, USA Feb 2024 – Current **Business System Analyst**

- Utilized **process modeling** techniques with **BPMN** and **Microsoft Visio** to **map** current business processes, identifying inefficiencies and leading to a 25% reduction in processing times for key workflows.▫
- Developed and executed complex **SQL queries** for **data extraction**, transformation, and loading (**ETL**) processes, enhancing data accuracy for financial reporting by 20% and enabling real-time decision-making.▫
- Created interactive **dashboards** in **Tableau** to visualize key performance indicators (**KPIs**), providing actionable insights contributing to a 10% increase in performance tracking effectiveness.▫
- Designed and implemented **cloud solutions** with **AWS**, utilizing services such as **S3** and **Redshift** for improved data storage and analytics performance.▫
- Assisted in User Acceptance Testing (**UAT**) to validate system functionalities against business requirements, resulting in a 20% decrease in post-launch defects and enhancing user satisfaction.▫
- Developed **training materials** and **documentation**, including user stories and process **flow diagrams**, to facilitate user onboarding and support ongoing operational needs, reducing training time by 30%.▫

Tata Consultancy Services, Mumbai, India Feb 2021 – Jul 2022 **Business Analyst**

- Led **requirements-gathering** sessions with **stakeholders** in the Government sector, producing detailed documentation that supported the development of a Government Management System, improving operational efficiency by 40%.▫
- Facilitated **requirements gathering** with **stakeholders** through structured workshops and interviews, producing comprehensive Business Requirement Documents (**BRDs**) and Functional Requirement Documents (**FRDs**) that improved project alignment and **stakeholder satisfaction** by 30%.▫
- Analyzed **structured** and **unstructured** datasets using **SQL** to derive insights for a Customer Relationship Management (CRM) system, resulting in a 15% increase in customer retention.▫
- Led comprehensive end-user training sessions, and introduced tool enhancements and process improvements, which boosted user engagement by 40% and decreased support requests by 15%.
- Conducted **gap analysis** and **cost-benefit assessments** to evaluate existing systems and recommend improvements, resulting in an operational efficiency increase of 25%.▫
- Employed **advanced Excel** techniques, including pivot tables and macros, for **financial modeling**, providing management with insights that led to a 30% increase in revenue.▫
- Streamlined financial reporting using **QuickBooks**, leading to a 20% reduction in project costs and improving financial transparency.▫
- Conducted **performance metrics** analysis to evaluate the effectiveness of implemented systems, using **Power BI** for **KPI** tracking and operational evaluation.▫
- Facilitated collaboration through **JIRA** and **Confluence**, aligning project objectives and timelines, contributing to a 20% reduction in project delays.▫

Avis Educational Toys, Mumbai, India Jan 2020 – Dec 2020 **Business Analyst**

- Assisted in **gathering requirements** through interviews and workshops, documenting user needs in **JIRA** and **Confluence**, which improved project clarity and stakeholder engagement by 20%.▫
- Supported the development of **user stories** and **acceptance criteria**, ensuring alignment with business objectives and facilitating a smoother development process.▫
- Cleaned and processed data using various internal applications, generated and analyzed sales reports, managed and organized data for accuracy, and aggregated information from multiple sources to support decision-making.
- Delivered technical and product support, assisted customers and clients with various setups, diagnosed and resolved technical issues, and provided expert consultations.

- Performed data analysis using **SQL** to identify trends and inform decision-making, contributing to a 10% increase in operational efficiency.□
- Participated in **User Acceptance Testing** (UAT), ensuring that system functionalities met business requirements and achieving a 95% satisfaction rate among users.□
- Created training materials and user guides using **Microsoft Office Suite**, ensuring a comprehensive understanding of new system functionalities and reducing onboarding time by 25%.□
- Tracked project status and tasks using **Microsoft Project**, regularly updating stakeholders and enhancing project transparency.□

CERTIFICATIONS

□	Data Visualization with Tableau, University of California, Davis (Coursera),	April 2024□
□	Databases and SQL for Data Science, IBM (Coursera),	May 2024□
□	Databases and SQL for Data Science with Python, IBM (Coursera),	May 2024□

PROJECTS

Northeastern Philanthropy

- Leveraged Python for data cleansing and statistical analysis to examine a dataset of over 60,000 records thoroughly during project requirements gathering and analysis, effectively increasing donor engagement by 25%.□
- Employed advanced machine learning techniques, including regression, clustering, hypothesis testing, and the development, validation, and optimization of a custom KNN model, to enhance fundraising accuracy by optimizing donor segmentation, achieving a 92% precision rate.□
