

SAI AKSHAY THOTA

Tableau Developer / Data Analyst | [LinkedIn](#)

Email: akshaythota05@gmail.com | Mobile: (513) 510-9827

PROFESSIONAL SUMMARY

- Detail-oriented Data Analyst / Tableau Developer with 5 years of combined experience in healthcare and financial analytics, delivering data-driven insights that improved reporting efficiency and decision-making across enterprise teams.
- Designed and deployed 30+ Tableau dashboards for executive and operational reporting, enabling stakeholders to track clinical, financial, and performance KPIs in real time.
- Partnered with cross-functional teams across 20+ departments to streamline reporting workflows and reduce manual Excel-based analysis by over 40%.
- Optimized SQL and ETL processes, leading to 30–50% faster data refresh cycles and improved data accuracy across clinical and risk data pipelines.
- Automated key recurring reports using Alteryx and Tableau Prep, cutting reporting turnaround time from several hours to minutes and increasing team productivity.
- Created data models integrating over 10 million rows of structured and semi-structured data from EHR, claims, and financial systems to support enterprise reporting.
- Supported compliance and regulatory reporting (HIPAA, CMS) by implementing strong data validation and governance standards across dashboards.
- Collaborated with senior leadership to deliver actionable insights on cost optimization, readmission trends, and revenue leakage, influencing key business initiatives.
- Experienced in cloud data environments (Snowflake, AWS Redshift) and modern BI ecosystems to scale analytics delivery.
- Recognized for creating executive-ready dashboards with consistent adoption across finance, operations, and compliance teams.

TECHNICAL SKILLS

Data Visualization & BI Tools	Tableau Desktop, Tableau Server, Tableau Prep, Power BI
Databases / Query Languages	SQL Server, Oracle, MySQL, Snowflake
Programming & Data Processing	Python (Pandas, NumPy, Matplotlib), R (basic)
ETL & Workflow Automation	Alteryx, SSIS, Talend
Cloud & Data Platforms	AWS (S3, Redshift), Google BigQuery
Data Governance & Documentation	Data Lineage, KPI Documentation, Metadata Management
Version Control & Collaboration	Git, GitHub, JIRA, Confluence
Office & Productivity Tools	Excel (Advanced – Pivot Tables, Power Query, VBA), PowerPoint, MS Access

EXPERIENCE

CommuniCare Health Services – Cincinnati, OH | June 2024 – Present

Data Analyst / Tableau Developer

As part of CommuniCare's Enterprise Analytics & Decision Support team, lead the design and optimization of Tableau-based clinical, financial, and operational dashboards to enhance visibility across 80+ skilled nursing and rehabilitation centers nationwide. Role focuses on data strategy, self-service analytics enablement, and end-to-end BI delivery from raw data ingestion to executive-level visualization.

- Designed and deployed interactive Tableau dashboards to track patient admissions, occupancy rates, and reimbursement performance across 80+ facilities.
- Partnered with clinical operations and revenue cycle teams to translate analytical requirements into actionable visual insights.
- Developed optimized SQL queries, CTEs, and stored procedures for data extraction and transformation from EHR, Claims, and HR systems.
- Built data models and relationships across disparate sources, ensuring a single version of truth for business reporting.
- Automated manual reporting workflows using Alteryx and Tableau Prep, improving data refresh efficiency and reducing human error.
- Conducted data validation and QA on EHR and claims datasets to ensure compliance with CMS and HIPAA standards.
- Created parameter-driven dashboards and dynamic filters for self-service analytics and compliance tracking.
- Collaborated with IT and data engineering teams to schedule automated refreshes and manage access controls in Tableau Server.
- Delivered executive dashboards and performance reviews highlighting clinical outcomes, revenue trends, and operational KPIs.
- Participated in the Tableau Center of Excellence to standardize design templates and promote best practices across the analytics team.

Environment: Tableau Desktop, Tableau Server, SQL Server, Alteryx, Python (Pandas), Excel (Advanced), Snowflake, EHR/Claims Systems (Epic, Cerner), JIRA, GitHub

Moody's Analytics – Bengaluru, India | Sep 2021 – Dec 2022

Data Analyst / Tableau Developer

Worked as part of the Financial Data & Risk Reporting Analytics Team, contributing to the design, automation, and enhancement of business intelligence solutions supporting finance and credit risk operations. Focused on creating Tableau dashboards and data models to monitor credit exposure, loan performance, and capital risk indicators. Collaborated with global stakeholders across the U.S. and U.K. to streamline reporting workflows, enhance data accuracy, and deliver actionable insights for regulatory and business reporting needs.

- Designed and developed interactive Tableau dashboards to visualize credit portfolio health, revenue trends, and financial KPIs for internal and client-facing analytics.
- Partnered with risk analysts, finance teams, and data engineers to understand reporting requirements and transform them into well-structured BI solutions.
- Developed and optimized SQL queries, stored procedures, and data joins to extract and process large datasets from Oracle and SQL Server databases.
- Built ETL workflows in Alteryx and Python (Pandas) to automate data preparation, transformation, and load processes from multiple structured and unstructured data sources.
- Created data models and relationships between financial datasets to ensure consistency and integrity across Tableau data sources.
- Implemented advanced Tableau calculations (LOD expressions, table calculations, parameter controls) to enable dynamic and user-driven analysis.
- Conducted data validation and reconciliation checks to maintain alignment with regulatory standards and internal financial controls.
- Documented data dictionaries, KPI definitions, and transformation logic to support governance and audit readiness.

- Collaborated with global analytics teams to standardize dashboard templates and establish visualization best practices across projects.
- Presented data-driven insights to senior stakeholders, highlighting key trends in credit exposure, loan performance, and revenue growth.
- Automated recurring financial reports, improving refresh times and reducing manual intervention through scheduled Tableau Server extracts.
- Worked in Agile sprints using JIRA for backlog tracking, user story management, and iterative dashboard improvements.

Environment - Tableau Desktop, Tableau Server, SQL Server, Oracle, Alteryx, Python (Pandas, NumPy), Excel (Advanced), JIRA, GitHub, Power BI (basic exposure)

Cognizant Technology Solutions - Hyderabad, India | Mar 2021 – Sep 2021

Programmer Analyst Trainee

- Trained in Java and Selenium, gaining hands-on experience with Selenium for test automation.
- Contributed to the UPS QE&A project by implementing test automation using Selenium, improving the overall testing process.
- Utilized tools like Jira for issue tracking and Postman for API testing to ensure robust test coverage.
- Assisted in reviewing documentation and test flows, reducing errors by 15%.

CERTIFICATIONS

- AWS Certified Solutions Architect – [Verification Link](#)
- AWS Certified Cloud Practitioner – [Verification Link](#)

EDUCATION

University of Cincinnati - Cincinnati, OH

Master of Science in Information Technology
