

AKSHAY KRISHNA

Data Analyst — Power BI, SQL, Data Modeling, Analytics & Reporting

Seattle, WA | akshaykrish1001@gmail.com | 660-528-1840 |

PROFESSIONAL SUMMARY

Data Analyst with 6 years of experience transforming raw operational data into actionable insights using **Power BI, SQL, Excel**, and end-to-end data preparation frameworks. Skilled in building interactive dashboards, modeling KPIs, cleansing and structuring data, and supporting real-time operational reporting. Strong background partnering with business users to define requirements, document metrics, and develop scalable analytics solutions that support logistics, supply chain, and enterprise decision-making. Adept at identifying trends, detecting anomalies, and improving reporting clarity and usability across fast-paced environments.

CORE SKILLS / TECHNICAL SKILLS

BI & Reporting: Power BI (DAX, Modeling, RLS, Power Query), Tableau, SSRS, QuickSight
Programming & Data Prep: SQL, Python, R, Excel (pivot tables, modeling, advanced formulas)
Data Modeling: Star/Snowflake schema, KPI definitions, data lineage, semantic layer design
ETL & Data Integration: SSIS, Informatica, Talend, AWS Glue, Snowpipe
Cloud: AWS (S3, Redshift, Glue), Azure (SQL DB, Data Factory)
Databases: SQL Server, PostgreSQL, Snowflake, Oracle, MySQL
Analysis: Trend analysis, outlier detection, forecasting, descriptive & statistical analysis
Tools: Jira, Confluence, SharePoint

WORK EXPERIENCE / PROFESSIONAL EXPERIENCE

Amazon | Data Analyst | Seattle, WA

October 2024 – Present

- Built interactive **Power BI dashboards** to visualize KPIs such as sales trends, customer retention, and inventory performance, improving operational visibility.
- Developed data models in Power BI using DAX, relationships, and calculated measures to support consistent KPI definitions across teams.
- Prepared and transformed datasets using **Power Query**, SQL, and Python to ensure clean, structured, analytics-ready data.
- Created ETL pipelines using AWS Glue to integrate Oracle, SQL Server, IBM DB2, and Salesforce CRM into Snowflake for reporting.
- Performed EDA and data profiling (Pandas, NumPy, Seaborn) to identify trends, anomalies, and optimization opportunities.
- Documented data definitions, dashboard logic, and KPI calculations to support governance and cross-team clarity.
- Collaborated with stakeholders to translate business questions into scalable, accurate analytics solutions.

Elevance Health | Business Intelligence Analyst | Atlanta, GA

November 2022 – October 2024

- Built enterprise Power BI reports and dashboards using DAX, modeling techniques, and data transformations in Power Query.
- Designed Snowflake and Azure SQL DB data models supporting operations, marketing, customer analytics, and performance reporting.
- Developed trend and outlier analysis using SQL Server + Power BI, highlighting areas for process improvement and cost optimization.
- Cleansed and prepared datasets in SQL Server (SSMS), resolving duplicates, missing values, and inconsistent KPIs.
- Authored KPI frameworks, metric definitions, and reporting documentation used across BI and operations teams.
- Combined datasets from SQL, MySQL, and Azure sources to create unified reporting layers that improved analytical consistency.
- Leveraged forecasting techniques (exponential smoothing, time series) to support business planning and visibility.

TCS | Data Analyst | Kolkata, India

January 2020 – August 2021

- Created Power BI dashboards and visualizations to support decision-making across operations and customer analytics.
- Built ETL pipelines using Spark, Scala, Hadoop, and Kafka to consolidate data from PostgreSQL, Oracle, and Teradata into S3.
- Performed exploratory data analysis and preprocessing using Python (NumPy, Pandas, Scikit-Learn) to prepare datasets for modeling and reporting.
- Implemented analytical models and statistical techniques to identify trends, anomalies, and performance drivers.
- Partnered with cross-functional teams to define KPI logic and data requirements for new dashboards and insights.

Genpact | Data Analyst | India

January 2019 – January 2020

- Developed Power BI dashboards using DAX, drill-throughs, slicers, and advanced visuals to support executive reporting.
- Built and optimized ETL pipelines using Informatica to integrate PostgreSQL, Oracle, and Teradata into analytic environments.
- Conducted data exploration and KPI calculations using SQL, Python, and Cypher (Neo4j) for relationship-based analysis.
- Designed star-schema structures in Snowflake and SQL Server to improve dashboard refresh times and data clarity.
- Delivered analytical insights and recommendations to stakeholders through visual storytelling and documented findings.

PROJECT HIGHLIGHTS

- **Attendance Tracking System:** Designed an interactive analytics solution that tracked attendance, generated KPI-based reports, and enabled trend detection. Built structured data models, automated

reporting flows, and optimized data preparation to support high-accuracy insights and fast visualizations for instructors and administrators.

EDUCATION

Master of Science in Applied Computer Science — Northwest Missouri State University

08/2021 – 12/2022

Bachelor of Technology in Computer Science and Engineering — Gandhi Institute of Technology and Management

07/2015 – 04/2019

CERTIFICATIONS

AWS Certified Developer – Associate

Microsoft Certified: Azure Data Engineer Associate

Google Cloud: Professional Data Engineer
