

AKSHAY REDDY TODIMA

Jacksonville, IL, USA | +1 (320)-260-7454 | akshayr.todima@aogjob.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

A Data Engineer with around 3 years of expertise in designing and optimizing scalable data pipelines, cloud migrations, and big data solutions across healthcare and technology domains. Proficient in leveraging Azure, Hadoop, and Snowflake to drive 40% faster data processing and 25% cost savings. Adept at automating compliance reporting and implementing robust security measures, ensuring data accuracy and reliability. Skilled in enhancing analytics capabilities, supporting real-time dashboards for thousands of users with cutting-edge cloud platform.

EDUCATION

Master's in Information Assurance St. Cloud State University	August 2022 – December 2024 St Cloud, MN
Bachelor's in Computer Science Mallareddy Institute of Technology and Science	August 2018 – August 2022 Hyderabad, India

PROFESSIONAL EXPERIENCE

Data Engineer CVS Health, USA	December 2023 – December 2024
- Developed and optimized scalable data pipelines handling over 500GB of clinical data daily, utilizing Apache Airflow, Spark, and Hadoop, resulting in a 40% reduction in data processing time and enhanced system reliability for critical hospital operations. - Improved data storage solutions in SQL Server, Azure Data Lake, and Hadoop ecosystems, achieving a 25% reduction in storage costs and a 40% boost in data retrieval speeds for analytics. - Led the migration of processes to cloud platforms such as Azure Data Factory and Azure Functions, increasing data processing capabilities by 50% and supporting real-time analytics dashboards for over 3,000 healthcare professionals. - Automated compliance reporting for federal healthcare regulations by developing SQL scripts and Python applications, reducing manual effort by 70% and ensuring 100% reporting accuracy. - Optimized Snowflake data warehouses, configured Docker containers with Azure Container Instances, and integrated data pipelines across Azure, GCP Storage, and cloud platforms, ensuring efficient ETL processes and scalable data management.	
Data Engineer Sigma InfoSolutions, Bangalore, India	January 2021 – July 2022
- Designed and implemented scalable big data architectures using Azure Synapse and Azure Data Lake, optimizing for data volume, velocity, and variety to meet business performance requirements. - Led ETL processes for efficient data movement, applying Azure Data Factory and Azure Databricks to enhance data integrity and streamline data transformation workflows. - Developed optimized data models for storage, retrieval, and processing using Azure SQL Data Warehouse and Snowflake, tailored to varying data complexities and volumes. - Secured sensitive data in Hadoop clusters and Azure Databricks, implementing encryption and Azure Identity and Access Management (IAM) for robust access control. - Conducted performance tuning of ETL processes, optimizing resource utilization by 20% using Azure Synapse, Azure Data Lake Analytics, and Snowflake for enhanced data processing. - Improved query performance by 30% through caching strategies and query optimizations in Hive, and used Azure Blob Storage for efficient data storage solutions. - Established data quality and monitoring solutions, reducing data errors by 15% and data quality issues by 40%, leveraging Azure Data Factory, Azure Purview, Azure Monitor, and Log Analytics.	

TECHNICAL SKILLS

Methodologies	Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall
Language & Databases	Python, SQL, Oracle RDBMS, MSSQL Server, No SQL MySQL, SQL Server, PostgreSQL
Python Packages	Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, PySpark
Data Analytics Skills	Data Manipulation, Predictive Analysis, Data Cleaning, Data Mining, Data Visualization, Statistical Modelling, EDA, Statistics, Data Analysis, Hypothesis Testing, Data Extraction
Data Components	Azure Data Lake, Azure SQL Database, Azure Synapse Analytics, Azure Databricks, Azure Cosmos DB, Delta Lake, Azure Event Hubs, Azure Data Factory (ADF), Azure Blob Storage, Azure Data Warehouse
Cloud	Azure (ADF, Databricks, Azure Data Lake, Synapse Analytics, Blob Storage, SQL Database, Event Hubs)
Tools	Power BI, ADF, Azure Databricks, Azure Synapse Analytics, Azure Blob Storage, Azure data lake, Microsoft Excel, Azure SQL Database, Looker.

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Meta: Introduction to Front End Development
- Horizon Tech: Python
