

Akshay Sakpal

DATA ANALYST

Los Angeles, CA, USA | (657) 525-8804 | sakpal.akshay0404@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

- Data Analyst with **4+ years of experience** delivering scalable analytics solutions using **ETL pipelines**, while applying **Agile, SDLC, Waterfall**, and **Lean Six Sigma** methodologies to ensure timely, high-impact outcomes.
- Experienced in delivering actionable insights across **healthcare and finance domains**, with a strong focus on **claims analytics, EHR data integration, risk scoring, and campaign optimization** to deliver **high-impact outcomes, including a 12%+ reduction in readmissions and a 20% uplift in campaign ROI**.
- Expert in Advanced Analytics & Visualization, leveraging **Python (Pandas, Scikit-learn), SQL**, and **SAS** to build predictive models and deliver actionable insights through interactive **Tableau and Power BI** dashboards for executive stakeholders.
- Skilled in End-to-End Data Engineering, designing and orchestrating robust **ETL pipelines with Alteryx, Airflow, DBT and Informatica**, and managing large-scale data warehousing solutions in **Snowflake, Redshift, and Azure Databricks**.
- Proven Collaborator in Agile/Scrum environments, using JIRA and Git to partner with cross-functional teams, define strategic analytics frameworks, and ensure regulatory compliance (HIPAA, SOX) across all data workflows.

SKILLS

Data Analysis & Programming:	Python (Pandas, NumPy, Scikit-learn, Stats models, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL, T-SQL, PL/SQL), SAS
Data Visualization & Reporting:	Power BI, Tableau, QlikView, Excel (Pivot Tables, Power Query), SSRS,
Data Engineering & ETL:	Alteryx, Informatica, Talend, Apache NiFi, DBT, Python ETL Scripts, Apache Airflow, SSIS, Excel (Data Cleaning)
Databases & Cloud Platforms:	Snowflake, Oracle, SQL Server, Redshift, Big Query, AWS (S3, Athena, SageMaker, EMR, Lambda), Azure Synapse, Databricks, HDFS
Domain-Specific Expertise:	Healthcare (EHR, EMR, HL7, FHIR, Claims & Eligibility, Epic/Clarity), Finance (GL, AR/AP, risk scoring), TMS/WMS, Compliance (HIPAA, SOX)
Collaboration & DevOps:	Git, GitHub, Bitbucket, JIRA, Confluence, Agile/Scrum, UiPath, Power Automate, Data Storytelling, A/B Testing, Regression, Clustering, Time Series Forecasting
Other Skills:	Effective Communication, Problem Solving, Time Management, Stakeholder Management, Presentation Skills, Risk Management, Flexibility, Networking

WORK EXPERIENCE

Blue Shield of California | Data Analyst

Jan 2024 - Present

- Drove the **Medical Specialty Integration** initiative by creating a unified member view, **integrating dental and vision claims with medical benefits** using **SQL, Python, DBT and Snowflake** enabling product managers to identify cross-sell opportunities and enhance member experience strategies.
- Built and deployed **Scikit-learn** models to predict **member churn and acquisition drivers** across specialty lines, providing the retention team with actionable risk signals that directly contributed to a **12% increase in member retention** and supported an **8% growth in dental plan enrollment**.
- Designed and delivered interactive **Power BI dashboards** to track **member lifetime value and campaign effectiveness**, empowering Marketing and Line of Business leaders with self-service analytics that reduced **ad-hoc reporting requests by over 40%** and accelerated weekly performance reviews.
- Performed **predictive and prescriptive analysis** on member data to uncover behavioral segments, allowing the campaign strategy team to launch targeted interventions that improved **marketing ROI by 20%** while ensuring all segmentation met regulatory compliance standards.
- Collaborated with data engineering to design and validate **ETL workflows for claims and EHR data in AWS**, ensuring downstream analysts and business users had access to consistent, accurate, and timely data for all reporting and modeling initiatives.
- Partnered with **Medical Informatics leadership** to establish a **new strategic analytics framework**, defining core **KPIs** and **business rules** that enabled the seamless delivery of insights to directly influence and optimize member experience strategies.

Tata Consultancy Services, India | Data Analyst

Jan 2021 – Dec 2022

- Led an analytics initiative for chronic care management that identified **high-risk patient cohorts** from **healthcare data**, enabling care coordinators to deploy proactive interventions that resulted in a **12% reduction in hospital readmissions** over nine months.
- Engineered and optimized **ETL pipelines and SQL queries** to integrate disparate **EHR, claims, and provider data**, delivering a **unified dataset with 99.8% accuracy** that served as the **single source of truth** for all population health analysts.
- Built and deployed interactive **Power BI dashboards** for clinical and operational leaders to monitor **provider performance and HEDIS quality measures**, leading to a **30% increase in stakeholder engagement** by providing transparent, real-time data visibility.
- Applied **advanced statistical analysis in Python** to uncover critical trends in **medication adherence and care gaps**, delivering actionable insights that directly informed population health strategists on how to **optimize cost utilization and improve member outcomes**.
- Implemented rigorous **QA testing and data validation protocols** to ensure all analytics workflows were fully **HIPAA compliant**, guaranteeing the compliance and data governance teams that **PHI** was secure.
- Automated risk stratification models and operational reports using **Python**, **reducing manual effort** for the analytics team by **40%** and ensuring timely, accurate data for monthly **operational reviews** and **NCQA quality submissions**.

Wipro, India | Data Analyst

Sep 2019 – Dec 2020

- Analyzed and reconciled high-volume equity trade data across **Merrill Lynch** and client systems using **Excel, VBA, and SQL**, ensuring **99.9% accuracy** in fee agreements to safeguard **over \$2M** in quarterly revenue for the finance and billing departments.
- Developed and maintained **executive-level Tableau dashboards** to track client profitability and sales performance, enabling sales trading desk leadership to identify and act on performance trends, which contributed to a **10% increase in desk profitability** over two quarters.
- Automated the reporting of global expense data using **Python (Pandas, NumPy)**, reducing manual reporting effort by **over 75%** and accelerating the delivery of critical budgetary reports for global sales trading teams.
- Conducted detailed analytics on **KYC compliance** and **trader restrictions**, delivering key insights to the risk management team that contributed to a **15% reduction** in identified compliance breaches and strengthened counterparty verification protocols.

EDUCATION

California State University Fullerton - Master of Science in Computer Science

December 2024

Rajiv Gandhi Prodyogiki Vishwavidhyalaya - Bachelor of Engineering in Computer Science

June 2020

PERSONAL PROJECTS

Credit Risk Modeling | Python, Scikit-learn, XGBoost

Developed an end-to-end machine learning model to predict loan approval risk by performing EDA on a complex banking dataset with over 50 variables. The trained XGBoost model provides loan officers with a data-driven tool to improve decision accuracy and mitigate default risk.

Medi-X-Pro - Generative AI Medical Analysis | Gemini-Pro, LangChain, FastAPI, Next.js, Sentry

Engineered a full-stack web application that leverages Generative AI for the analysis of medical images. The platform features a secure Next.js frontend and a FastAPI backend, providing clinicians with an automated tool to derive insights from complex medical scans, significantly accelerating the diagnostic support process.

A/B Testing Case Study | Python, Pandas, Matplotlib

Conducted a comprehensive A/B testing case study to determine the effectiveness of a targeted marketing campaign versus a broad-reach strategy. Analyzed key metrics including conversion rates and product engagement, delivering a clear, data-backed recommendation

CERTIFICATIONS

HackerRank - 5 Star Skill Certification – SQL, Python | Kaggle - Pandas
