 Pune, India - 411027

About Me

A dynamic professional having 3.3 years of experience, including 1 year as a market estimation and forecasting analyst and 2.3 years as a Data Analyst, in designing and developing reports and dashboards in line with Business Intelligence using Power BI, DAX, SQL and Advance Excel.

Professional Summary

- Having good experience in Power query, Power pivot, and Power view for creating effective reports and dashboards in Power BI Desktop and Power BI Service.
- Implemented business functionality to create computed tables, measures, and columns using different kinds of DAX functions (Aggregate, Filter, Table-Valued, Mathematical, Information, and Text functions, etc.)
- Worked on different visualizations (table, matrix, KPI, gauge, various types of charts, and maps) and custom visualizations (Histograms, Bullets, Heat Maps, etc.)
- Used different types of slicers, filters (dynamic), cards, KPIs, and gauges.
- Worked with Power BI Templates, Datasets, Data flows, Content Packs, App workspaces, and Dynamic Row-Level Security (DRLS).
- Sound knowledge in making DAX queries in Power BI desktop.
- Created reports with parameters, bookmarks, drill down, and drill through options.
- Published Reports into Power BI Service and Shared the dashboards.
- Experience in Data Gateway for data refreshing, and scheduling.
- Having experience with database concepts (joins, subqueries, views, and procedures), relational database models, data dictionaries, and data integrity.
- Extensive experience with advanced excel, created Pivot Tables, Pivot Charts, and dynamic dashboards with slicers, and conditional formatting.
- Proficient in Power Query and formula-based data transformation, including merging, appending, unpivoting, and data cleansing.
- Experienced in collaborating with US-based clients deliver data-driven insights, dashboards, and business reports aligned with their strategic goals.

Work Experience

- Pragma Market Research (Team Lead)
Mar 2024 – Present
- Market Research Future (Data Analyst)
Aug 2023 – Mar 2024
- Data Bridge Market Research
(Junior Data Analyst)
Dec 2021 – Aug 2023

Education

- PGDM (Marketing Management)
Indira Institute of Management,
Pune
2020 – 2022
- BSc. (Biology)
SGBAU
2016 – 2019 Pusa, Maharashtra

Certification

- Career Essentials in Data Analysis by Microsoft and LinkedIn
- Introduction to Career Skills in Data Analytics by LinkedIn
- Data Analytics by Cisco

Language

- English
- Marathi
- Hindi

Skills

Tools: Power BI, Microsoft SQL, Tableau, Advanced Excel

Core Competencies: Data Modeling, power BI Desktop, Data Transformation, ETL, DAX, Data Visualization, Data Warehousing, SSIS

Language: SQL

Operating Systems: Windows 10

Documentation Tool: MS Office, Advanced Excel

Soft Skills: Teamwork, Problem Solving, Work Ethics with Creativity

Project 2

Title: Sales & Performance Dashboard

Client: Peet’s Coffee (USA)

Description:

Designed and implemented a dynamic and visually compelling Sales & Performance Dashboard for Peet’s Coffee (USA). The dashboard provided real-time, actionable insights into sales performance, regional demand, product segmentation, and pricing trends, enabling leadership to make data-informed decisions that directly impacted revenue growth and operational efficiency.

Responsibilities:

- Collaborated closely with cross-functional teams and stakeholders in the US to understand business requirements and translate them into analytical solutions.
 - Extracted, transformed, and loaded data using Power Query and performed cleansing, normalization, and validation.
 - Defined and calculated key performance indicators (KPIs) such as Monthly Revenue Growth, Customer Retention Rate, Average Order Value, and Top-Selling SKUs using DAX in Power BI.
 - Conducted advanced customer segmentation analysis to profile purchasing patterns, frequency, and product affinity.
 - Built drill-down and drill-through capabilities for deeper insights at store, product, and channel levels.
 - Implemented dynamic filters, slicers, and DAX-based measures to provide a seamless user experience for business users and executives.
 - Delivered dashboards with scheduled data refresh using Power BI Service and ensured version control and access security via Row-Level Security (RLS).
 - Provided insights that contributed to a measurable increase in e-commerce sales and enabled more strategic inventory planning, promotional targeting, and supply chain optimization.
 - Helped marketing and product teams identify top-selling SKUs, optimize pricing strategies, and tailor campaigns based on regional demand and customer behavior
-

Project 1

Title: Credit Card Weekly Dashboard Development

Client: Dreamplug Technologies Pvt Ltd. (CRED)

Description:

The Internet Banking System is an online banking platform designed to facilitate customer and bank transactions efficiently. It provides features such as balance inquiry, transaction inquiry, money transfers between accounts, and checking transaction status. Users can securely log in using their customer ID and password to access these functionalities. In addition, the development of a comprehensive Credit Card Weekly Dashboard was undertaken to deliver real-time insights into key performance metrics and trends. This dashboard enables stakeholders to monitor and analyze credit card operations effectively, empowering data-driven decision-making.

Responsibilities:

- Designed, developed, and tested interactive Power BI visualizations for both the Internet Banking System and Credit Card Weekly Dashboard, ensuring seamless functionality and usability.
- Expertise in blending multiple data connections and creating joins across diverse data sources for meaningful insights.
- Designed and implemented custom visualizations, including scatter plots, box plots, Sankey charts, bar graphs, Gantt charts, trend lines, waterfall charts, heat maps, and geo-maps, catering to specific business needs.
- Managed the Power BI portal by setting up data refresh schedules, configuring gateway data refresh, and handling user management efficiently.
- Built complex dashboards using parameters, sets, groups, and calculations to enable drill-down and drill-up capabilities.
- Delivered interactive reports and dashboards with a strong focus on visualization design, ensuring a seamless experience for stakeholders in both banking and credit card analysis.

Declaration:

I hereby declare that the information furnished above is true to the best of my knowledge.
