SUMMARY

Dynamic Software Engineer with a strong background in data engineering and machine learning. Familiar with libraries like numpy, pandas, scikit, keras. Familiar with Logistic regression, Time Series, XGB, RandomForest, PCA, KNN, CNN. Proficient in developing REST APIs, and working with a variety of databases and cloud platforms. Elementary knowledge of microservices. Demonstrated expertise in Node.js, Python, and PHP, with a keen interest in advancing skills in data science and machine learning through practical projects on Kaggle. Willing to work as a data Engineer too. Adept at problem-solving, with a history of solving problems on competitive coding platforms like HackerRank and LeetCode.

Had to leave most recent job due to shift from remote to Hybrid setting in another state(Arkansas) and later visit my ailing father.

EXPERIENCE

Software Consultant

Ox

January 2023 April 2023, Remote, USA Arkansas)

- Developed and modified REST APIs using Express.js, enhancing system efficiency
- Led API integration, ensuring seamless end-to-end execution and testing
- Deployed applications using CI/CD in GCP, incorporating Docker for containerization
- Authored comprehensive unit tests for APIs, improving code reliability
- Documented APIs with Swagger, facilitating easier use and integration
- Used MicroORM with postgresql
- Wrote unit test cases for APIs using Sinon.js, should.js,nock.js, mocha.

Software Consultant

Walmart

January 2022 January 2023, Remote, USA Arkansas)

- Engineered REST APIs for the Cloud Powered Checkout team, boosting transaction speed
- Orchestrated microservice API calls, enhancing system interoperability
- Monitored application performance using Splunk, Grafana, and Dynatrace
- Implemented Kafka integration, streamlining data processing
- Conducted deployments using CI/CD in Azure and GCP, leveraging Docker
- Wrote unit test cases for APIs using Sinon.js, should.js,nock.js, mocha.
- Used Cosmos DB on Azure as nosql database. Used Cosmos DB to store large info in key-value pairs and was part of the partitioning process on CosmosDb

Software Engineer

Capgemini

August 2020 November 2020, Bangalore, India

- Developed Adobe Commerce product features for Disney India, improving user experience
- Integrated APIs in frontend modules, enhancing application functionality
- Mentored new hires on Magento integration, fostering team skill development
- Managed MySQL databases, optimizing data storage and retrieval

Software Engineer

Cognitive Clouds

January 2019 July 2020, Bangalore, India

- Developed and maintained Katerra's product using PHP and NodeJS, improving operational efficiency
- Built REST APIs, facilitating seamless frontend and mobile integration
- Implemented frontend functionalities using ReactJS, enhancing user interaction
- Coordinated with design and mobile development teams, ensuring API compatibility
- Used Mongoose ORM for MongoDB as noSql database. Used MongoDB to store large property management info and retrieved info using aggregation to create dashboards and information view on frontend

Software Engineer

Ambab Infotech Pvt Ltd

November 2015 December 2018, Mumbai, India

- Developed web applications using PHP, MySQL, and JavaScript, meeting client requirements
- Engaged in client discussions, ensuring clear understanding and execution of project goals
- Estimated project timelines, optimizing team allocation and project management
- Planned application structures, aligning with project management criteria

Software Engineer

Freelance

September 2012 September 2015, Mumbai, India

- Developed an HR Management website application, integrating REST APIs and payment gateways
- Customized a WooCommerce website, adding unique features
- Built and maintained a career counseling website using CodeIgniter
- Created an e-commerce website for a jeweler, enhancing online sales
- Developed a property management software for a builder, streamlining operations
