

Akshaya Yalla | Java Full Stack Developer

Location: Texas, USA | **Mail:** akshayayalla0@gmail.com | **Ph.:** +1512-666-0920 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Java Full Stack Developer with 3+ years of experience in designing, developing and deploying secure, scalable microservices and dynamic web applications. Proficient in Java 17, Spring Boot 3, Kafka, React.js, Angular 16, Node.js, AWS EKS, Kubernetes, Docker, Terraform, GitLab, Jenkins, SonarQube, Checkmarx, Redis, MySQL, PostgreSQL, MongoDB, Elasticsearch, JUnit 5, Mockito, WireMock, Pact, OAuth2.0, OpenID Connect, JWT, WAF, Amazon API Gateway, CloudWatch, Prometheus, Splunk, ELK Stack, Hibernate, JPA, HTML5, CSS3, Tailwind CSS, FHIR R4, HL7, EDI X12, WCAG 2.1, HIPAA and Indian IT Act 2000. Proven ability to optimize high-frequency financial transaction APIs, implement robust security protocols, automate CI/CD workflows and ensure continuous application availability in complex enterprise environments.

TECHNICAL SKILLS:

Programming Languages:	Java 17, Java 11, TypeScript, JavaScript (ES6+), SQL, PL/SQL
Frontend Technologies:	React.js, Angular 16, HTML5, CSS3, SCSS, Tailwind CSS
Backend & Frameworks:	Spring Boot 3, Spring MVC, Spring Cloud, Spring Security, Hibernate 6.x, JPA, Node.js
Microservices & APIs:	RESTful APIs, Kafka, RabbitMQ, OAuth 2.0, GraphQL, OpenID Connect, Amazon API Gateway
Databases:	PostgreSQL 15, MySQL 8.0, MongoDB 7.0, Redis 7.2, Elasticsearch 8.x
Cloud & DevOps:	AWS (EKS, CloudWatch, API Gateway), Terraform, Jenkins, GitLab CI/CD, Azure, Helm, Argo Rollouts, Docker, Kubernetes (EKS/AKS)
Testing & QA:	JUnit 5, Mockito, WireMock, Pact, Postman, Cypress, Playwright, Contract Testing
Monitoring & Logging:	Prometheus, ELK Stack, Splunk, Amazon CloudWatch, Log4j 2.x, SLF4J
Security & Compliance:	Spring Security 6.0, JWT, RBAC, WAF, HIPAA, Indian IT Act 2000
Interoperability:	HL7 v2.x/v3, FHIR R4, EDI X12 (270/271, 837), ICD-10, SNOMED CT, LOINC
Version Control & Tools:	Git, GitHub, SonarQube, Checkmarx, Jira, GitHub Action, Confluence

PROFESSIONAL EXPERIENCE:

JPMorganChase – TX | Full Stack Developer

June 2024 – Present

- Designed and implemented secure, event-driven microservices using Java 17, Spring Boot 3, Kafka and Spring Cloud Stream, supporting asynchronous processing for loan origination, FX trading and customer account updates.
- Optimized high-frequency financial transaction APIs by implementing Redis caching and refactoring complex SQL joins, reducing average response time by 38% and improving transaction throughput under peak load.
- Developed responsive and reusable React.js front-end modules with TypeScript for client dashboards, integrated with token-based authentication (OAuth2.0/OpenID Connect) and real-time account data via RESTful APIs.
- Secured public-facing financial APIs with Amazon API Gateway and implemented fine-grained rate limiting, API key rotation and WAF integration for real-time fraud mitigation and regulatory compliance.
- Performed comprehensive unit, integration and contract testing with JUnit 5, Mockito, WireMock and Pact, achieving 92% test coverage across payment processing and risk management microservices.
- Built and maintained CI/CD pipelines with GitLab, Jenkins, SonarQube and Checkmarx to enforce code quality, static analysis and security scanning for every code commit and pull request.
- Accelerated onboarding for banking operations teams by 32% by automating end-to-end CI/CD workflows with GitLab, Jenkins and Terraform for repeatable and secure infrastructure provisioning across dev/test/prod environments.
- Engineered resilient blue-green and canary deployment strategies in AWS EKS clusters using Argo Rollouts and Helm charts, minimizing downtime during high-value feature releases and patches.
- Ensured 99.9% application availability for core banking platforms by deploying containerized microservices on AWS EKS with auto-scaling policies and real-time monitoring using Amazon CloudWatch, Prometheus and Splunk.
- Automated log aggregation and error tracing using ELK Stack and Splunk, integrated with Amazon CloudWatch alarms to proactively detect anomalies in credit scoring models and transaction audits.

Cognizant – India | Full Stack Developer

June 2021 - July 2023

- Architected microservices-based solutions for patient management, appointment scheduling and insurance claims processing using Java 17, Spring Cloud and Apache Kafka for event-driven communication.
- Configured Hibernate 6.x and JPA for efficient ORM, optimizing complex queries and data transactions across MySQL 8.0 and PostgreSQL 15 for secure patient data management.
- Integrated MongoDB 7.0 for scalable storage of unstructured patient data (medical imaging metadata) and Redis 7.2 for caching high-frequency data, reducing API response times by 40%.
- Built and maintained RESTful APIs with Spring Boot 3.0, enabling seamless integration of EMR/EHR systems (Cerner, Epic, Allscripts) adhering to FHIR R4 and HL7 v2.x/v3 standards for interoperability.
- Developed asynchronous backend workflows with Node.js and RabbitMQ, enabling real-time processing of EDI X12 transactions (270/271, 837) for insurance eligibility and claims adjudication.
- Implemented Elasticsearch 8.x for full-text search and analytics on patient records, supporting ICD-10, SNOMED CT and LOINC code sets, improving clinical data retrieval efficiency by 35%.
- Ensured compliance with HIPAA and Indian IT Act 2000 by implementing Spring Security 6.0 with OAuth 2.1, JWT and fine-grained RBAC, securing sensitive healthcare data across applications.
- Configured advanced logging with Log4j 2.x and SLF4J, integrating Splunk for real-time log analysis, audit trails and proactive monitoring of system performance and security events.
- Designed & developed a responsive patient portal using Angular 16, HTML5, CSS3, & Tailwind CSS, achieving a 30% increase in user engagement through optimized UI/UX and accessibility compliance (WCAG 2.1).
- Deployed and managed containerized healthcare applications using Kubernetes (EKS/AKS) and Docker, ensuring 99% uptime and scalability for high-traffic patient portals.

EDUCATION:

Master in Computer Science - University of North Texas, Denton, Texas, USA

Bachelor in Computer Science - Sree Chaitanya college of engineering, Thimmapur, Telangana, India
