Denton, Texas | (940)843-0248 | [www.linkedin.com/in/akshithabodapati](https://www.linkedin.com/in/akshithabodapati)  
[akshithabodapati93@gmail.com](mailto:akshithabodapati93@gmail.com)

---

## PROFESSIONAL PROFILE

Creative and detail-oriented graduating master's student in information systems and technologies with experience in complex data transformation, visualization, and analysis with Python, SQL, and Tableau. Skilled in developing interactive dashboards. Seeking a Data Analyst position to utilize analytical skills and technical expertise.

---

## CORE COMPETENCIES

Communicative | Growth mindset | Effective Time management | Adaptable

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL

**Software and Tools:** Microsoft Suite (Excel, Word, PowerPoint)

**Data Analysis:** Data Cleaning, Exploratory Data Analysis, Data Visualization

**Visualization Tools:** Tableau, Power BI, Excel

**Libraries:** Pandas, NumPy

---

## EDUCATION

### Master's in Information Systems and Technologies

University of North Texas | Denton | Texas

GPA: 3.60

December 2025

### Bachelor's in Information Technology

Gayatri Vidya Parishad College of Engineering | Visakhapatnam | India

GPA: 2.97

April 2023

---

## PROJECT EXPERIENCE

### Data Visualization using Tableau: Aircraft landing facilities in USA

- Utilized primary keys to split and map jumbled data, cleaned nulls, converted data types, and removed duplicates for consistency.
- Python was applied for data transformation, and Tableau filters were used to refine and segment datasets effectively. Also developed interactive Tableau dashboards to highlight key trends and metrics in regional aviation.
- Enabled data-driven decisions and improved stakeholder understanding through clear and insightful visualizations.

### US Estimated Crimes Analysis

- Conducted a deep analysis of U.S. crime data (1979–2019) using Python to uncover patterns across all the states and time. And explored correlations between population demographics and crime rates, revealing socio-economic impacts.
  - Developed visualizations and pivot tables to highlight trends in violent and property crimes.
  - Proposed policy recommendations in data-driven insights for predictive modelling in crime prevention.
-
