SUMMARY

Data Wrangler with a background in Test Development, Data/DataOps and CloudOps Product Ownership, and a proven ability to quickly adapt to new technical domains. Looking for a challenging data role where I can lean on my technical expertise and diverse industry experience to play a key role in facilitating data-driven and data-aided outcomes.

EXPERIENCE

Happy Valley Ventures

Associate BI Analyst

MAR 2025-Present - Full Time

DEC 2024-MAR 2025 - Part Time

Responsible for developing data analytics and BI tools to drive informed decision making within the Supply Chain Management and Wholesale organizations:

- Automate analysis, sales, and forecasting tasks to reduce time spent on manual data aggregation and cleaning.
- Design, develop, and maintain ETL pipelines to report on and monitor KPIs to assess supply chain performance.
- Act as a subject matter expert for HVV's ERP solution, Acumatica, providing guidance and support to end users on system functionalities, data interpretation, and best practices.
- Collaborate with cross-functional teams to understand their analytical needs and provide actionable insight.

Q Consulting/Surescripts - Contract

Sr. Agile Product Owner - MAR 2023-OCT 2023

Manage the planning and execution of Surescripts' ePrescribing and Healthcare Intelligence BigData/Audit Infrastructure solutions and the project's migration to Google Cloud Platform (GCP):

- Work closely with 2 cross-functional development teams to prioritize and manage the product backlog, ensuring alignment with business goals and customer needs.
- Partnered with the Director of Architecture to define project scope, objectives, and deliverables, aligning with the overall business strategy.
- Successfully delivered Surescripts first data stream from on-prem to GCP production through the utilization of GCP products such as Dataproc, Cloud Composer, Cloud Run, and BigQuery.
- Facilitate regular meetings with stakeholders to gather requirements, provide updates and demos, and to address any concerns or issues.
- Actively engage early adopters throughout their migration process from on-prem to GCP, seeking their input and incorporating their feedback into the project plan and implementation.

Hitachi Vantara

Product Owner - JUN 2022-MAR 2023

Oversee the delivery of Hitachi Vantara's SaaS DataOps Cloud Platform that supports all aspects of deploying, managing, and monitoring applications on Microsoft Azure Virtual Machines, leveraging Azure Blob Storage and Azure SQL Server for optimal data management:

- Manage multiple cross-functional software development teams across multiple domains (DevOps, UI, Auth, Quality, SRE) and multiple international time zones to ensure a cohesive, well aligned SaaS platform.
- Lead and work with stakeholders, product management, architecture, and leadership to provide vision and priority in a clear road map for sprint teams.
- Summarize business requirements into a prioritized backlog consisting of high level epics and user stories outlining technical requirements for developers to deliver on.
- Own/groom backlog with sprint teams to align roadmap and identify risks and dependencies
- Engage customers early and often to foster an environment of open, continuous feedback, as well as drive adoption.

EBSCO Information Services (EBSCO IS)

Sr. Agile Product Owner I - JUL 2020-JUN-2022

Agile Product Owner II - APR 2018-JUL 2020

Responsible for the delivery of new feature and capability development, and ongoing enhancements to the orchestration layer of EBSCO's CI/CD pipeline; managing the configuration, testing, and deployment to a managed kubernetes cluster on AWS:

- Directed multiple initiatives from problem identification thru solution delivery that have provided performance gains to EBSCO's Cloud Platform as well as EBSCO's Software Development Organization
- Collaborate with stakeholders, end users, product managers, architects, and developers to define business needs.
- Distill features into user stories within the development team, maintaining a backlog of work for consideration.
- Define and manage product launch plans with first movers and the greater customer base to drive adoption and ensure seamless onboarding.
- Drive/own backlog grooming and management, prioritize iteration and user stories, create acceptance criteria and drive delivery of iteration goals.

EBSCO IS - Sr. SDET - Systems Team AUG 2016-APR 2018

- Responsible for delivering custom automated test solutions for feature teams with Selenium and ReadyAPI
- Contributed to the automation of EBSCO Component Service Blue/Green Deployment Build Engineering strategy
- Helped build System Team's EBSCO Admin Client for automating application configuration via admin API with PowerShell

EBSCO IS - Sr./Lead Test Automation Engineer - Semantics and Intelligence JAN 2014-AUG 2016

- Leveraging available frameworks and third-party software (ReadyAPI), as well as custom test development to deliver automated test solutions for the Semantic Search and Intelligence QA team
- Analyze and provide leadership insight on projects directly and indirectly involved in
- New Hire and Jr. Engineer training as domain expert in several EBSCOHost domains; customer facing and internal products/services/processes

EDUCATION/TRAINING

MIT xPRO - DATA ENGINEERING CERTIFICATION - AUG-2024-MAR-2025

PENDO - PRODUCT ANALYTICS CERTIFICATION - MAR 2024

SCALED AGILE FRAMEWORK - PO/PM TRAINING and IMPLEMENTING SAFe - APRIL/MAY 2018

BOSTON UNIVERSITY - WEB PRODUCTION CERTIFICATE - AUG-2000-JULY-2001

TECHNICAL SKILLS/TOOLS

PYTHON - NUMPY - PANDAS - DATABRICKS - SNOWFLAKE - dbt - PYSPARK - PYMONGO - MONGODB - MYSQL - CASSANDRA - REDIS

GOOGLE CLOUD PLATFORM (BIGQUERY - BIGTABLE - CLOUD COMPOSER) - AMAZON WEB SERVICES (EC2-LAMBDA-ROUTE 53)

ETL PIPELINES - BIG DATA - HADOOP - SPARK - KAFKA - NIFI - AIRFLOW - CHANGE DATA CAPTURE

KUBERNETES (K8s) - DOCKER - ISTIO - CI/CD WORKFLOWS - JENKINS - GITHUB - GITHUB ACTIONS

ARGO CD - DATADOG - SONARQUBE - GRAFANA - JAVA - GROOVY - APIs - TEST AUTOMATION
