linkedin: <http://linkedin.com/in/alekya-peesu-a4b995349>

PROFILE SUMMARY:

Data Analyst with **4+** years of experience in data analysis, reporting, and business intelligence across enterprise environments. Strong expertise in SQL, Python, Excel, Power BI, and Tableau for analyzing large, complex datasets. Experienced in data extraction, transformation, and loading (ETL), data validation, and data quality management. Proven ability to design and maintain interactive dashboards, KPI reports, and executive-level analytics. Skilled in trend analysis, statistical analysis, forecasting, and ad-hoc reporting to support business decisions. Hands-on experience working with relational databases, data warehouses, and cloud-based data platforms. Effective communicator with a strong track record of translating technical insights into actionable recommendations for stakeholders.

KEY SKILLS :

- **Data Analysis & Visualization:** Tableau, Power BI, Looker, Google Data Studio, Excel (Advanced), Google Sheets, Matplotlib, Seaborn, Plotly, D3.js, Chart.js
- **Programming & Scripting Languages:** Python (Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Seaborn), SQL, R, JavaScript, Bash, PowerShell
- **Databases & Querying:** MySQL, PostgreSQL, SQL Server, Oracle, SQLite, MongoDB, Cassandra, DynamoDB
- **Data Warehousing & Lakehouse:** Snowflake, Amazon Redshift, Google BigQuery, Azure Synapse Analytics, Databricks, Delta Lake
- **ETL, Data Pipelines & Orchestration:** Informatica, Talend, SSIS, Apache NiFi, Pentaho, Apache Airflow, AWS Glue, ADF
- **Big Data & Distributed Computing:** Hadoop, Apache Spark, Spark SQL, Kafka, Hive, Pig, Presto/Trino
- **Cloud Platforms & Services:** AWS (S3, Redshift, Athena, Lambda, EMR), Microsoft Azure (Data Factory, Databricks, Synapse), Google Cloud Platform (GCP) (BigQuery, Dataflow, Pub/Sub, Cloud Storage)
- **Machine Learning & Advanced Analytics:** Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, LightGBM, MLflow, KNIME, Spark MLlib
- **Statistical Analysis & Experimentation:** Hypothesis Testing, A/B Testing, Regression Analysis, Time Series Analysis, Forecasting, Statistical Modeling
- **Data Engineering, DevOps & Automation:** Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD, Workflow Automation
- **APIs, Integration & Web Data Extraction:** RESTful APIs, GraphQL, Postman, Swagger, BeautifulSoup, Scrapy, Selenium
- **Monitoring, Search & Analytics Platforms:** Elasticsearch, Kibana, Logstash (ELK Stack)
- **Productivity & Collaboration Tools:** Jupyter Notebooks, Google Colab, JDBC/ODBC, Agile/Scrum Methodologies

WORK EXPERIENCE :

Senior Data Analyst || Elevance Health , Michigan, USA

Jul 2025 - Current

Objective: Elevance Health is a leading U.S. healthcare services company focused on improving health outcomes through data-driven insights, digital innovation, and integrated health solutions. The organization delivers health benefits, care coordination, and advanced analytics

Responsibilities:

- Performed advanced data analysis using SQL, Python, and R to analyze claims, provider, and member data, delivering clinical and operational insights aligned with Elevance Health initiatives.
- Built and maintained automated ETL pipelines using Azure Data Factory, Talend, and Alteryx to integrate data from EHR, claims, CRM, and care management systems into SQL Server and Snowflake.
- Designed and delivered interactive dashboards in Power BI and Tableau to monitor cost of care, utilization trends, provider performance, and healthcare quality metrics.
- Developed predictive and risk stratification models using scikit-learn, TensorFlow, and Azure Machine Learning to identify high-risk members, forecast utilization, and support population health programs.
- Processed and analyzed large-scale healthcare datasets using Hadoop, Spark, and Kafka to enable scalable and near real-time analytics and reporting.

- Supported analytics platform reliability through CI/CD pipelines and containerized deployments using GitLab, Jenkins, Docker, and Kubernetes.

Technologies Used: SQL, Python, R, Power BI, Tableau, Azure Data Factory, Talend, Alteryx, SQL Server, Snowflake, scikit-learn, TensorFlow, Azure ML, Hadoop, Apache Spark, Apache Kafka, GitLab, Jenkins, Docker, Kubernetes

Data Analyst | | Truist Bank, Michigan, USA

Aug 2023 - Dec 2024

Objective: Truist Bank is a leading U.S. financial services company providing retail banking, commercial banking, lending, investment, and insurance solutions. Headquartered in Charlotte, North Carolina, Truist focuses on customer-centric banking, data-driven decision-making, risk management

Responsibilities:

- Perform data analysis on financial, customer, and transactional datasets using SQL, Excel, and reporting tools.
- Design, develop, and maintain automated reports and dashboards to support business performance and regulatory reporting.
- Partner with finance, risk management, compliance, and operations teams to deliver data-driven insights.
- Ensure data quality, data validation, and adherence to banking regulations and internal controls.
- Support forecasting, budgeting, and KPI tracking for retail and commercial banking functions.
- Identify trends, risks, and process improvement opportunities through advanced data analysis.
- Document business requirements, data definitions, and reporting standards to support governance and audit needs.

Technologies: SQL, Microsoft Excel, Power BI, Tableau, ETL tools (Informatica, Alteryx, Talend), enterprise databases (SQL Server, Oracle), data quality and governance tools, and regulatory reporting systems.

Data Analyst | | Morgan Stanley, Mumbai, India

Apr 2022 - Jul 2023

Objective: Morgan Stanley is an American multinational investment bank and financial services company. Implemented ML models for regression, classification, clustering, and time series forecasting to support strategic business decisions (e.g., credit risk modeling, customer churn prediction).

Responsibilities:

- Performed advanced data cleansing, validation, and transformation using SQL, Python (Pandas, NumPy), R, and SAS to ensure accuracy, consistency, and audit readiness across large-scale financial, market, and operational datasets.
- Designed and maintained complex financial and risk data models leveraging Python, R, and SAS to support investment analysis, profitability tracking, forecasting, and strategic decision-making for trading and asset management teams.
- Developed executive-level dashboards and analytical reports using Tableau, Power BI, Looker, and Excel, delivering actionable insights into financial performance, cost optimization, risk exposure, and regulatory metrics.
- Managed and optimized enterprise data warehouses and data lakes using Snowflake, Amazon Redshift, Amazon S3, and Google BigQuery, enabling scalable storage, high-performance querying, and secure data access across analytics platforms.
- Built and automated end-to-end ETL and analytics pipelines using Apache Airflow, Talend, AWS Glue, Informatica, and SSIS, while applying predictive analytics and machine learning models with Scikit-learn, TensorFlow, and Keras to support forecasting, anomaly detection, and risk mitigation.

Technologies: SQL, Python, R, SAS, Tableau, Power BI, Excel, Snowflake, Amazon Redshift, Amazon S3, Google BigQuery, Apache Airflow, Talend, AWS Glue, Informatica, SSIS, and machine learning frameworks

Data Analyst | | Merck Group, Mumbai, India

May 2021 - Mar 2022

Objective: Merck is a global healthcare company that develops and sells innovative health solutions for people and animals. Automated data workflows and reporting pipelines using Python scripting, VBA, and Alteryx Designer.

Responsibilities:

- Analyzed complex manufacturing, laboratory, and supply chain datasets using SQL, extracting actionable insights to optimize production throughput, equipment utilization, and process stability across GMP regulated environments.
- Designed and delivered executive and operational dashboards using Tableau, Power BI, and QlikView, providing real-time visibility into manufacturing KPIs, quality metrics, deviation trends, and maintenance schedules for stakeholders.

- Developed and automated end-to-end ETL pipelines using Informatica, Talend, and Alteryx to ingest data from laboratory systems, manufacturing sensors, and ERP platforms, ensuring data accuracy, traceability, and compliance with regulatory standards.
- Leveraged big data and advanced analytics platforms including Hadoop and Apache Spark to process high-volume manufacturing and process data; applied machine learning models using Scikit-learn and TensorFlow for demand forecasting, anomaly detection, predictive maintenance, and yield optimization.
- Built scalable analytics solutions and monitoring frameworks using Apache Kafka, Elasticsearch, Kibana, Docker, Kubernetes, and Git, enabling real-time data streaming, faster incident detection, governed collaboration, and continuous improvement across analytics workflows.

Technologies: SQL, Python, Tableau, Power BI, QlikView, ETL tools (Informatica, Talend, Alteryx), Hadoop, Spark, Scikit-learn, TensorFlow, Kafka, Elasticsearch, Kibana, Docker, Kubernetes, Git, ERP and lab/manufacturing systems.

EDUCATION:

- Masters in Computer Science at Elmhurst university, Chicago City, illinois,USA

CERTIFICATIONS:

- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified power BI Data Analyst
