## PROFESSIONAL SUMMARY

---

Results-driven Business Analyst and Quality Assurance Tester with 5+ years of experience supporting federal projects for USPS and NOAA Fisheries. Skilled in requirements elicitation, backlog management, Agile delivery (Scrum and Kanban), and manual testing (functional, system, regression, UAT). Experienced in collaborating with stakeholders and development teams to deliver compliant, user-focused solutions while ensuring quality through rigorous testing and production support. Holds an active Public Trust Clearance.

## WORK EXPERIENCE

---

### VANGAURD DEVOPS LLC

Silver Spring, MD

#### Business Analyst/ Quality Assurance Tester

October 2024 – Present

- Led requirements elicitation with NOAA stakeholders, translating business needs into user stories and acceptance criteria in JIRA for the National Permitting System (NPS).
- Created functional specifications, wireframes, and mockups to document “as-is” and “to-be” processes, clarifying workflows and reducing gaps between expectations and delivery.
- Partnered with developers and product owners to prioritize the backlog, delivering high value permitting features on schedule using Scrum and Kanban.
- Designed and executed manual test cases across functional, system, regression, and UAT testing, identifying defects early and reducing post-release issues.
- Provided production support, investigating and resolving issues in real time to ensure uninterrupted operations for permit applicants and NOAA administrators.
- Participated in initial requirements gathering for NPS modernization, capturing high-level needs across multiple regions to shape the platform foundation.
- Facilitated client demos and feedback sessions while maintaining requirements traceability and test documentation, ensuring usability, regulatory compliance, and audit readiness.
- **Clearance:** Active Public Trust

### PERSPECTA/PERATON

Chantilly, VA

#### Business Analyst

May 2019 – October 2024

- Led analysis and requirements definition for USPS Energy and Sustainability Projects, enabling nationwide energy monitoring and environmental compliance tracking.
- Transitioned the USPS team from waterfall to Agile Scrum with SAFe, introducing VersionOne to manage backlog and improve transparency and accountability.
- Managed Scrum activities including backlog grooming, sprint planning, daily standups, reviews, retrospectives, and client demos to ensure milestone delivery.
- Prioritized backlog by breaking down epics into features and user stories, creating a structured development roadmap aligned with business goals.
- Developed business and functional requirements, including use cases and test cases, to support software quality assurance.
- Conducted stakeholder interviews, maintained requirements traceability, and collaborated on system enhancements through System Integration Testing (SIT) and User Acceptance Testing (UAT).
- Identified and mitigated risks and technical issues, providing strategic recommendations and contingency plans to enhance project resilience.
