Professional Summary

Results-driven *Software Engineer with 4 years of experience* in DevOps and DataOps, specializing in CI/CD automation, scalable data pipelines, and cloud infrastructure. Proven track record of enhancing deployment efficiency, reducing downtime, and optimizing workflows to elevate system reliability and passenger safety.

Professional Experience

Hawaiian Airlines | Honolulu, HI | *Software Developer - DevOps*

Jun 2024 - Present

- Extended our proprietary CI/CD workflow orchestrator through modularization, integrating support for AWS S3 deployments and ensuring scalable, efficient handling of growing deployment demands.
- Migrated the JFrog Docker registries to Docker Hub using Shell and Python, enabling new integrations with BitBucket Pipelines.
- Resolved bugs that raised false positives in application deployments on Bamboo using Postman, improving deployment accuracy and reducing debugging time for developers.
- Expanded test coverage CI/CD pipelines by adding Pytest unit tests, ensuring comprehensive feedback on code quality and reducing production defects by 20%, resulting in a more stable and reliable release process.

Hawaiian Airlines | Honolulu, HI | *Software Developer - DataOps*

Nov 2022 - Sep 2024

- Minimized disruptions after Passenger Service System (PSS) migration by identifying pain points in the legacy ETL process and proactively redesigned the data ingestion workflow. These improvements eliminated a common class of errors resulting in fewer manual interventions and smoother operational transitions.
- Completely eliminated recurring workflow failures and prevented multi-day production outages by designing new maintenance procedures that periodically defragmented the databases. This reduced the average total processing cycle from 14 hours to 8 hours.
- Designed comprehensive data & processing flow diagrams to illustrate existing system logic, highlight inefficiencies, and guide engineers in modernizing the architecture for PSS.

Hawaiian Airlines | Honolulu, HI | *Associate Software Developer - DataOps*

Mar 2021 - Nov 2022

- Initiated the documentation of system configurations and troubleshooting procedures, accelerating onboarding for new team members and minimizing unnecessary on-call escalations.
- Maintained compliance and lowered security threats by partnering with the Info-Protection team to address server-side vulnerabilities on high-risk servers.

Skills

- **Programming & Scripting:** Python, Bash, Shell, PowerShell, JavaScript
- **Workflow Orchestration:** Microsoft Orchestrator, Airflow
- **Cloud Infrastructure:** AWS (S3, EC2, EKS), Kubernetes, Helm, Docker, Vault
- **CI/CD:** Bamboo, Bitbucket Pipelines, Octopus
- **Database & Data Integration:** SQL Server, PostgreSQL, Informatica, MuleSoft, Snowflake, Tableau Cloud
- **Frameworks:** Angular, Boto3, Flask, Node.js
- **Development & API Testing:** Pytest, Postman, ReportPortal
- **Version Control & Package Managers:** Git, GitHub, BitBucket, Docker Hub, JFrog Artifactory

Education

Loyola Marymount University | Los Angeles, CA

Dec 2020

B.S. in Computer Science, GPA 3.50 – Cum Laude
