EDUCATION

The George Washington University

Bachelor's in Information Technology (GPA: 3.65)

Washington, DC

Jan. 2024 – Dec 2025

- **Certification:** CompTIA Security+
- **Coursework:** Python for Statistics, Relational Databases and Design, Software Development Processes, Cloud Architecture, Information Network Security, Survey of AI

Northern Virginia Community College

Associate's in Information Technology

Alexandria, VA

Jan. 2022 – Dec 2023

PROJECTS

Car Price Prediction Model | *Python, Jupyter Notebook, Docker*

June 2024

- Collaborated on developing a linear regression model with regularization that improved car price prediction accuracy by 18%, by integrating advanced feature engineering techniques
- Increased model reliability by 25% by implementing extensive data cleaning and validation frameworks, ensuring high-quality datasets for training
- Enhanced team efficiency by 30% by documenting end-to-end workflows, enabling reproducibility and smooth knowledge transfer across contributors
- Optimized ETL pipeline efficiency by 40% by cleaning and validating large datasets, providing accurate, high-quality input for predictive modeling

COVID-19 Data Analysis and Forecasting | *Python, R, MySQL, Power BI, Facebook Prophet*

July 2025

- Built and deployed a machine learning model with Facebook Prophet that forecasted 30-day COVID-19 trends with 92% accuracy, by leveraging time-series analysis techniques
- Processed 82,000+ records 3x faster by designing an automated MySQL-Python-R pipeline, streamlining data preparation for advanced analytics
- Improved executive decision-making by 25% by developing governed Power BI dashboards aligned with KPIs, ensuring data accuracy, compliance, and actionable insights

EXPERIENCE

Mentor

Jan 2023 – Dec 2023

College Steps Program

Alexandria, VA

- Mentored 30+ students in study skills, time management, and assistive technologies, resulting in a 20% average improvement in academic performance, by customizing strategies to individual learning styles
- Enhanced academic outcomes by 15% by introducing data-driven tools (Excel, Tableau, visualization platforms), enabling students to track progress and make data-informed study decisions
- Boosted student engagement by 40% by delivering interactive, technology-enabled presentations that promoted independent learning and digital literacy
- Facilitated cross-functional collaboration between students, faculty, and support staff, accelerating resolution of academic and accessibility requests by establishing clear communication workflows

TECHNICAL SKILLS

Languages / Databases: Python, SQL, Oracle, MySQL, HTML, R

Data Visualization / Modeling: Tableau, Power BI, matplotlib, Snowflakes, ERDs, UML

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Terminal, Lucid Chart

Productivity / Collaboration: MS Office (Excel, PowerPoint, Outlook), Agile Collaboration
