Dear Hiring Team at Sytex Solutions,

I am excited to apply for the Entry-Level Clinical Data Analyst position at Sytex Solutions. With over a decade of experience as a board-certified Physical Therapist and recent advanced training in Business Analytics and Data Science, I bring a unique combination of clinical domain knowledge and technical skills that align strongly with your mission to improve patient outcomes through data-driven solutions.

Throughout my career, I have developed a deep understanding of clinical terminology, electronic health record (EHR) systems, and healthcare compliance standards such as HIPAA. These experiences, paired with my education in Python, R, SQL, Excel, and Tableau, have positioned me to effectively clean, analyze, and interpret complex clinical datasets. My recent capstone project focused on evaluating the impact of provider training programs on EHR efficiency using predictive modeling and data visualization—an experience I believe directly translates to the responsibilities of this role.

What draws me most to Sytex is your commitment to collaborative innovation in healthcare analytics. I am a problem-solver by nature and a lifelong learner, demonstrated by my pursuit of a Master's in Business Analytics and a forthcoming certification in Data Science and Machine Learning. I thrive in cross-functional teams and excel at communicating technical findings to clinical and non-clinical audiences—skills I honed while managing complex caseloads and leading education initiatives as a physical therapist.

I am passionate about data and healthcare, and excited to contribute to meaningful solutions that enhance patient care and am eager to contribute to your mission. Thank you for considering my application.

Sincerely,
Amanda Edwards, PT, DPT
