SKILLS

- Java, JavaScript, Python, C, C++, PHP, React, React-Native, Flutter, HTML5, CSS3, Bootstrap, Node.js, Flask, WordPress, NextJs, TypeScript
- MySQL, AWS, Firebase, Git, Apache, NGINX, Cloudflare, Linux, Docker, Agile, Azure, Google Cloud

WORK EXPERIENCE

Klinn: Medical Consultancy Site (Co-Developer)

August 2024 - Present

- **Spearheaded** the development of an educational platform utilizing **React**, **Next.js**, and **TypeScript**; established connections for over **8,000** medical students and consultants to **streamline** access to vital resources.
- **Engineered** mentorship programs and job boards that streamlined **connections** between medical students and consultants, driving a notable **30% increase** in user engagement through **enhanced** functionality within the platform.
- **Designed** a robust **Firebase** infrastructure, implementing **role-based access** controls that assessed **security** measures and optimized **database** interactions to achieve a **40% reduction** in potential vulnerabilities.
- **Architected** an **AI-driven scriptwriter** utilizing **Groq** and **Llama**, streamlining cold calling efforts for clinic outreach while boosting lead generation by **decreasing** call preparation time by **60%**.

Saleeka: iOS Health App (Co-Developer)

May 2024 - Present

- **iOS App Development:** Built a health-focused iOS application using **React Native** and **TypeScript**, allowing users to scan food barcodes to identify harmful ingredients for over 200+ beta users.
- **Performance Optimization:** Developed a custom caching mechanism with **Firebase**, reducing **FoodFacts** API calls by **35%** and improving data retrieval speeds.
- **Integrated** continuous deployment by crafting a tailored **Bitrise CI/CD system**, leading to the successful execution of over **40 seamless deployments** within three months **without** any unplanned outages or service disruptions during releases.
- **Championed** the development of **intuitive** camera/barcode functionalities paired with robust security measures that directly contributed to **increasing** active user sessions **by 40%**, fostering a more engaging and **seamless experience**.

Laavaan: Full Stack Software Engineer

January 2023 – May 2024

- **Website Development:** Led the development of responsive websites using **Flutter**, **PHP**, **WordPress**, and **Bootstrap**, contributing to a **25% increase in user retention**.
- **Crafted** intuitive UI elements from **comprehensive** design specifications that streamlined the onboarding process; achieved a **reduction** of user drop-off rates during sign-up by **20%** through improved interface clarity and **responsiveness**.
- **Spearheaded** the management of **Cloudflare CDN** while upgrading protocols to HTTP/2 and HTTP/3; **identified** key **bottlenecks** that led to **fixing** the three biggest causes of page crashes during peak traffic periods.
- **Accelerated** site security through the successful **configuration** of **SSL/TLS certificates** and **implementation** of HSTS, resulting in **zero data breaches** over a 12-month period and achieving full compliance with industry standards.

PROJECTS

Swiftsell: College Marketplace Platform (Team Lead)

January 2024 – May 2024

- **Marketplace Development:** Directed the development of a web-based marketplace using **Python**, **Flask**, and **AWS EC2**, facilitating seamless transactions for students.
- **Database Architecture:** Designed and optimized the **MySQL** database schema, ensuring efficient data storage and rapid retrieval for marketplace operations.
- **Server Optimization:** Customized **Apache** configurations on **Ubuntu** servers, improving response times by **40%** and ensuring high availability.

EDUCATION

San Francisco State University || GPA: 3.77

August 2022– May 2024

B.S. Computer Science
