WORK EXPERIENCE:

PTC

Boston, MA

Backend Software Engineering

June 2024 – October 2024

- Optimized cloud-hosted applications on **AWS EC2 and S3**, boosting scalability and performance by 30% during peak usage, resulting in **zero downtime incidents** across production systems.
- Built and tuned **10+ RESTful APIs** using Node.js and MongoDB for internal analytics tools; achieved **25% faster query performance** through aggregation pipelines and indexing.
- Led migration of **legacy monoliths to Docker-based microservices**, deploying 12+ services via Kubernetes, and reducing release cycle time by 60%.
- Developed a real-time billing service using **Spring Boot, Kafka and Xenos**, enabling PDF generation from AFP files on-the-fly, accelerating document processing speed by 35%.
- Integrated asynchronous workflows using **AWS Lambda and API Gateway**, reducing backend response latency by 30% and achieving **99.9% uptime** for customer-facing endpoints.

Version 1

Bangalore, India

Full Stack Software Development Engineer

December 2020 - July 2023

- Architected and built enterprise-grade full-stack web apps for banking and retail clients, serving 100K+ users with high availability and real-time data processing using **React, Redux, Node.js, and Django**.
- Designed and implemented **15+ RESTful APIs**, including user onboarding, authentication and transaction audit modules using Django and Node.js, reducing response latency by 30% through database indexing and async I/O.
- Constructed **40+ reusable UI components** with React and Storybook; adopted lazy loading and ARIA accessibility standards, raising Lighthouse accessibility score from **78 to 92** and reducing load time by 20%.
- Engineered live analytics pipelines with **Apache Spark, Airflow and Python** to process **1TB+ of monthly transactional data**, enabling live KPI dashboards and executive reporting .
- Improved **database performance by 35%** through query optimization, denormalization, and Redis-based caching for high-volume APIs (e.g., transaction summaries and user notifications).

TECHNICAL SKILLS:

- Programming Languages** : JavaScript (ES6+), Python, Java, TypeScript, Go, SQL, C++
- Web Technologies** : HTML5, CSS3, React.js, Next.js, Redux, Bootstrap, Node.js, Express.js, Django, Flask, Spring Boot
- Databases and API Development** : PostgreSQL, MySQL, MongoDB, Redis, RESTful APIs, OAuth2.0, Web Sockets, JSON
- Cloud and Devops** : AWS (EC2, S3, Lambda), GCP, Git, Gitlab, Bitbucket, CI/CD, Apache Airflow, Kafka, Jenkins, Heroku
- Machine Learning tools** : Pandas, NumPy, Scikit-learn, TensorFlow, Apache Spark
- Monitoring tools and Utilities** : Grafana, New Relic, Postman, Swagger, Nginx, Webpack, Babel, ESLint
- Development Methodologies**: Agile, Scrum, Waterfall, Kanban, TDD, FDD
- Testing and Debugging tools** : Jest, Mocha, Chai, JUnit, PyTest, Chrome DevTools

EDUCATION:

Wright State University

Dayton, Ohio

Master of Science in Computer Science | GPA: 3.2/4

August 2023 - July 2025

Course work : Theory of Database Systems, Data Structures and Algorithms, Object-Oriented Programming, Big Data Algorithms & Network, Artificial Intelligence, Cryptography & Data security, Machine Learning and Information Retrieval.

Sreenidhi Institute of Science and Technology

Hyderabad, Telangana

Bachelor of Technology in Electronics and Communication | GPA:3.28/4

May 2017 - June 2021

PROJECTS:

Well Eat | MERN, OpenAI API, Node.js, React, MongoDB, TypeScript, Storybook, Jest, RESTful APIs, Vercel

- Engineered a **MERN-based health recommendation platform** leveraging **OpenAI's GPT-4** for **ingredient safety classification** and **personalized diet/recipe suggestions**, used by **85+ beta users**.
- Achieved **93% accuracy** and reduced **false positives by 38%** in ingredient risk scoring via **semantic prompt pipelines** and **real-time REST APIs** with **45% faster response times**.
- Built **responsive, accessible UI** with **TypeScript, Storybook**, and **Jest**, achieving **90%+ test coverage** and reducing **UI-related bugs by 60%** during beta testing.

Digital Certificate Automation | ReactJS, Material UI, React forms, Django, OAuth2, PostgreSQL, AWS S3, Postman

- Automated issuance of **10K+ digital certificates/year**, reducing **admin time by 95%** and boosting **data accuracy**.
- Designed a **secure OAuth2-backed certificate pipeline** using **PostgreSQL** and **AWS S3**, supporting **5+ certificate templates** and enabling **99.8% retrieval accuracy** across **10K+ document versions**.

Social Media Platform | ReactJS, Tailwind CSS, Redux, NodeJS, ExpressJS, PostgreSQL, Redis, AWS, Apache Spark

- Built a **scalable social media platform** with features like **posting, commenting**, and **privacy controls**, tested by **500+ users**; achieved **99.9% uptime** and reduced **API latency by 40%** using **Redis caching** and **EC2 spot instances**.
- Automated **ETL workflows** using **Apache Spark** and **Airflow**, enabling monthly processing of **1TB+ data** while reducing **infrastructure costs** and improving **pipeline reliability**.
