

SUMMARY

Business Analyst with **4+ years** of experience in data analytics, process optimization, and business strategy. Skilled in **Tableau, Power BI, Alteryx**, and **SQL**, driving data-driven decision-making and automation. Expertise in **FRDs, BRDs, Agile**, and **SDLC**, reducing project ambiguity by **20%** and improving efficiency. Proven track record in **stakeholder management**, competitive analysis, and workflow automation to enhance business outcomes.

TECHNICAL SKILLS

Languages: Python, SQL, R

Software/Tools: Excel, Tableau, Power BI, Snowflake, Alteryx, Dataiku, QlikView, JIRA, Visio, Microsoft Dynamics 365, ERP Systems

Methodologies: Agile, SCRUM, SDLC, Waterfall

Analysis Skills: Business Analytics, Data Analysis, Financial analysis, Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis, Google Analytics

Project Management Tools: MS Project, MS SharePoint, Smartsheet

Visualization Tools: Figma, Roadmap

Documentation: FRD, BRD, SRS, Test Outlines & Test Cases, Use Cases & Use Case Mapping, Business Requirements, Requirements Traceability Matrix (RTM)

Tracking/Software/Other Skills: JAD, Rational ClearQuest, UAT, Lucid chart, Confluence, Data modeling

Soft Skills: Project Management, Product Management, Leadership, Time Management, Problem-Solving, Decision-Making, Negotiation, Customer Relationship Management (CRM), Verbal Communication, Documentation and Presentation

Operating Systems: Windows, Linux, Mac

WORK EXPERIENCE

Walmart **AR, USA**
Business Analyst **August 2024 – Present**

- Demonstrated **strong leadership, time management**, and **problem-solving** skills to drive business outcomes, while leveraging **negotiation** expertise to align **stakeholders** and deliver effective solutions as a Business Analyst.
- Developed predictive models using **Python, SciPy**, and **Scikit-learn**, applying advanced **statistical analysis** to optimize business insights, improving forecasting accuracy by **35%** and decision-making speed.
- Implemented **SDLC** best practices by leveraging **Agile** and **Waterfall methodologies**, ensuring efficient project management, streamlined development cycles, and on-time delivery of high-quality software solutions.
- Conducted **SWOT analysis** and **market research** to identify key industry trends, enabling **data-driven strategic decisions** and increasing competitive advantage with actionable insights.
- Built interactive **Power BI** dashboards and **Excel reports**, solving complex business problems, visualizing key metrics, and reducing manual reporting efforts while improving accuracy.
- Enhanced data-driven decision-making by utilizing **Excel** for **KPI tracking, forecasting models, gap analysis**, and **data mapping**, ensuring accurate insights and strategic business improvements.
- Designed **FRDs** and mapped **use cases** to system workflows, ensuring clear requirement documentation, minimizing ambiguity, and reducing development rework by **30%** with better alignment.
- Boosted business systems analysis by leveraging **SQL** and **Microsoft SQL Server**, optimizing data-driven decision-making through business analysis and **IT business analysis** for streamlined operations and strategic insights.
- Optimized project management by leveraging **Jira** for tracking **user stories**, conducting thorough **requirements analysis**, and ensuring seamless **UAT**, leading to efficient delivery of functional and business requirements.

Cyient **India**
Business Analyst **December 2019 – January 2023**

- Established **BRDs**, conducted **GAP analysis**, and maintained **RTM**, ensuring traceability, reducing requirement ambiguities by **35%**, improving project documentation accuracy, and streamlining approvals.
- Streamlined software development by implementing **Agile methodologies** and **Scrum**, optimizing **user stories** for clear requirements, and ensuring high-quality releases through effective **UAT processes**.
- Created clear process and **flow diagrams** using **Microsoft Visio** and **UML**, conducting detailed **GAP analysis** to identify inefficiencies and improve business workflows with strategic insights.
- Conducted **risk analysis** and strengthened customer relationships through effective **stakeholder** engagement and strong **oral** and **verbal communication**, ensuring alignment and successful **CRM** strategies.
- Facilitated **requirements gathering** by creating clear **user stories** and **use cases**, leveraging **analytical thinking** and **Lucidchart** to visualize processes and enhance solution design.
- Leveraged **SQL, Tableau**, and **data management** skills to analyze trends, solve business problems, enhance decision-making speed by **40%**, improve reporting accuracy, and drive insights.
- Improved business and **IT processes** through **business systems analysis**, leveraging systems analysis and **business process** improvements to drive efficient and strategic decision-making.
- Utilized **Python** and **Pandas** for **data manipulation** and analysis, automating workflows, improving data processing efficiency, enhancing scalability, and reducing manual effort.
- Tailored systems analysis and **business processes** using **Visio**, ensuring clear **requirements analysis** and documentation of business and **functional requirements** for efficient workflow and solution design.

EDUCATION

Master in Information Technology Project Management, **December 2024**
St Francis College, Brooklyn, NY, USA.

Bachelor in Civil Engineering, **July 2020**
Ace Engineering College, Telangana, India.
