

Ameesha Shaik

Data Analyst

ameesha.s339@gmail.com | +1(620)741-6594| GA, USA | [LinkedIn](#)

Summary

- 3+ Year of experience as a Data Analyst with extensive experience in stages of SDLC, database management, and data visualization. Strong exposure to securities trading in capital markets and CRM.
- Expertise in Software Development Life cycle (SDLC), Project Life cycle, Business Process Modelling (BPM), Software Development Methodologies including Waterfall, Spiral, and Agile with SCRUM process.
- Proficient in analysing and modelling business processes, gathering comprehensive business requirements, designing databases, and developing robust web-based and client/server applications.
- Experience with Tableau server for granting access permissions for specific purpose to the required teams and scheduling timely extracts for dashboards using Tableau server.
- Excellent communication skills and proven ability to work with business customers and technical teams, as well as independently with minimal supervision.

Skills

- **Database Operations:** SQL, MYSQL, NZSQL, Oracle, MS Access
- **Programming Languages:** Shell, Python, R, XML, HTML, Machine Learning
- **User Interface Design Tools:** MS Visio
- **Methodologies:** Waterfall, Agile, RUP, Jira, Scrum
- **Project Management Tools:** MS Project, MS Office (Word, Excel, PowerPoint, Access), SWOT analysis, Critical Thinking, Data Cleaning, Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis
- **Data Visualization Tools:** Tableau, Power BI, Qlik, SPSS Modeler
- **Data Mining Models:** Clustering, NLP, KNN, Linear, Decision Trees, Regression, XML
- **Soft Skills:** Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication
- **Tracking/Other Skills:** Jira, Microsoft Visio, HP Quality Centre, JAD, RTM, UAT, Confluence, Figma

Education

Master of Science in Computer Science - Wichita State University, Wichita, KS – (January 2023-May 2024)

Bachelor in Electronics & communication - MLR Institute of technology, India – (July 2018- June 2022)

Experience

Humana, USA - Data Analyst

July 2024 – Current

- Designed and developed Power BI visualizations and interactive dashboards based on business requirements.
- Applied clustering and regression analysis techniques in Python, identifying key trends and correlations that improved operational efficiency by 15%. Modified existing Tableau reports and collaborated with business to integrate new data points to streamline workflow and company processes.
- Used various sources to pulled data into Power BI such as SQL Server, Oracle, SQL Azure etc.
- Performed Data cleaning and normalization along with profiling to ensure Data Quality.
- Collaborated with stakeholders to gather requirements and deliver data-driven solutions that aligned with business goals, driving a 20% increase in operational efficiency.
- Utilized Azure Databricks for large-scale data processing and advanced analytics, reducing data pipeline latency by 25%.
- Designed and Developed reports from multiple data sources by blending data on a single worksheet in Tableau Desktop.
- Coordinated Phased Data Migration process to handle large and complex volumes of data and address dashboard reporting capabilities.
- Supervised and collaborated with data coordinators and other team members to provide technical support and end-user training on the developed applications.

CitiusTech, India - Business Data Analyst

January 2020 – December 2022

- Developed Microsoft Power BI Dashboards to showcase the result of data analysis from the database.
- Led the development of a data-driven marketing strategy, utilizing Python and machine learning models to predict customer behaviour, resulting in a 25% increase in customer retention.
- Integrated custom visuals based on business requirements using Tableau desktop for better clarity of information.
- Designed and implemented data integration modules for Extract/Transform/Load (ETL) functions.
- Experience with various ETL, data warehousing tools and concepts.
- Used data analysis techniques to validate business rules and identify low quality missing data in the existing Amgen enterprise data warehouse (EDW).
- Automated reporting processes with Python scripts, reducing manual effort and increasing operational efficiency by 25%.
- Collaborated with cross-functional teams to define business requirements, translating them into actionable data insights that aligned with strategic objectives.
- Gathered requirements and created Use Cases, Use Case Diagrams, Activity Diagrams using MS Visio.
