SUMMARY:

AI-focused and Full-Stack Software Engineer with 6+ years of experience building cloud-native systems, AI-powered micro services, and agentic automation workflows. Proficient in Python, Golang, and Java, with strong expertise in Kubernetes, Helm, and Jenkins for scalable deployments. Experienced in integrating LLMs, RAG pipelines, and Model Context Protocol (MCP) for next-generation intelligent applications.

SKILLS & EXPERTISE:

Programming Languages

Python, Golang, Java, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries

Django, Flask, Spring Boot, Go Fiber, FastAPI, React, Vite, TensorFlow, PyTorch

Databases & Storage

PostgreSQL, MongoDB, EDB Postgres, NoSQL, Redis, MySQL

Cloud Platforms & Services

AWS, IBM Cloud, ArcGIS Enterprise, Azure (familiar), Google Cloud Platform (familiar)

DevOps, CI/CD & Automation

Docker, Kubernetes, Prometheus, Grafana, ELK Stack (Monitoring, Observability, Logging), Helm, Jenkins, GitLab CI/CD, Ansible, Amazon CodePipeline, PsExec

System Administration & Tools

Linux, Windows Server, IIS, LDAP, ServiceNow, Git, Swagger/OpenAPI, REST APIs, Kafka, Debezium

AI, ML & Agentic Systems

Agentic AI, Llama (Ollama), DeepSeek, RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), OpenHands, Hugging Face Transformers, LLMs, NLP, AI-powered Chatbots, Model Deployment & Inference

Other Technologies

Highcharts, Maps SDK for JavaScript, ArcGIS APIs, Android (basic), Odoo ERP

PROJECTS:

A Lightweight URL Shortener using Model Context Protocol (MCP) + Python

- Designed the system with scalable MCP tools and clean HTTP routing; planned extensions include PostgreSQL, Docker, and Kubernetes deployment on MicroK8s.
- Engineered an AI-agent-friendly microservice with FastAPI and FastMCP, supporting URL shortening.

Automating AI Workflows with OpenHands, Llama 3.2, and Kubernetes

- Deployed and managed workloads on Kubernetes (MicroK8s) with Helm, achieving modular, scalable orchestration and seamless integration with VS Code, Jupyter, and browser tools.
- Orchestrated an agentic AI system integrating OpenHands with Llama 3.2 (via Ollama), enabling autonomous query execution, validation, and adaptive decision-making without manual intervention.

AI-Powered Chatbot with Kubernetes & Docker

- Developed and deployed a self-hosted chatbot running local AI models (DeepSeek-r1, Llama 3 via Ollama) with a web UI and API integration, ensuring privacy, reduced latency, and full customization.

EXPERIENCE:

Software Development Intern, ESRI Inc, Redlands California, US

May 2025 - Aug 2025

Technology Stack: Jenkins, Geocoding, Maps SDK for JavaScript, React + Vite

- Automated end-to-end deployment pipeline for ArcGIS Enterprise stacked on a Windows machine on Jenkins, saving **10 hours**.
- Designed issue management system to track and optimize the workflow of each user and increase efficiency by **50%**.

Software Engineer, IBM LABS, Bengaluru, India

Sept 2022 - Jan 2024

Technology Stack: Python (Django), Java (Spring Boot), Postgres (EDB)

- Implemented IBM's Secret Manager on PaaS with **SOC2 compliant** encryption, eliminating HSMs from data centers and reducing migration time by 95%, saving **\$3 Million**
- Integrated IBM IAM (Blue Groups) with LDAP for automated user permission management, reducing manual intervention and cutting ticket **turnaround time by 90%**

- Integrated Microservices with Debezium to enable **real-time data transfer** and auditing for data centers, automating updates to SSOT and ServiceNow

Full-Stack Developer, Axiom IO, Hyderabad, India

Jun 2021 - Aug 2022

Technology Stack: Golang (Go Fiber), NoSQL

- Architected a Sports Aggregator Platform in Java Spring Boot, efficiently managing **~14M weekly** sports feed requests with a segregated layered architecture, **reducing response time by 30%**
- Implemented CI/CD pipelines for dev, stage, and prod environments using Amazon CodePipeline, **cutting release time by 50%** and **saving \$200K** annually in deployment costs
- Developed Golang REST APIs for major game providers (Ezugi, DreamCasino, SuperSpade, Pragmatic Play), helping **\$2M+** in game transactions, **reducing downtime by 40%**, and **saving \$150K** in operational costs

Software Developer, Kuliza Technologies, Bengaluru, India

Dec 2018 - Jun 2021

Technology Stack: Python (Django), Java (BPM)

- Led Educational Loan project, designing key modules like EMI automation and account validation, managing a team of four, and improving process **efficiency by 30%**
- Optimized SQL queries, **cutting execution time by 88%**, and implemented an auto-trigger system **reducing API downtime by 95%** with **10% improved audit accuracy**

Software Developer, Digital Marketing Systems Pvt. Ltd, Indore, India

Sept 2017 - Dec 2018

Technology Stack: Python, Java, Odoo, Android

- Built backend infrastructure in Flask for the company website with REST API (JSON) communication, **improving SEO rankings by 25%**, and developed Android ERP modules, **enhancing mobile adaptation by 30%**

ASSISTANTSHIP:

Teaching Associate, CSU Fullerton - Python Programming

Aug 2024 - Feb 2025

Research Assistant, CSU, Fullerton - Disaster Management

Mar 2024 - May 2024

EDUCATION:

Master of Science in Computer Science

California State University, Fullerton, CA

Jan 2024 - Dec 2025

Bachelor of Science in Computer Science

Indore Institute of Science and Technology, India

Aug 2013 - Jun 2017
