

AMULYA THOTA

thota.amulya.t@gmail.com | +1 6609241184 | Dallas, TX | [LinkedIn](#)

Skilled Software Engineer with over 3 years of experience and a Master's in Information Systems. Expertise in Java, Spring Boot, React, SQL, AWS, and Python, with strong experience in full-stack development, Microservices, and API, delivering scalable applications while enhancing user experience.

PROFESSIONAL EXPERIENCE:

Software Engineer Intern | Arrcus

Jun 2024 – Jul 2024

- Created and enhanced the UI of a web application using **ReactJS**, implementing **Redux** for centralized state management. Developed **Java**-based backend services and integrated **JWT-based authentication** secured with **Spring Security**, ensuring robust, secure user access.
- Optimized **SQL** database queries, reducing response times by 60%, leading to improved system efficiency and overall performance.
- Collaborated with cross-functional teams to optimize project workflows, improving delivery time by 15%.

Software Development Engineer | ValueLabs

Jun 2020 – Jul 2023

- Developed **RESTful APIs** for enterprise applications leveraging **Java**, **Spring Boot**, **MongoDB**, **MySQL**, **Hibernate**, **AWS**, and **Apache Kafka**, employing a microservices-based architecture.
- Developed an automated ticket generation system using Java, Spring Boot, and AWS CloudWatch for error monitoring and real-time ticket creation.
- Architected the migration of legacy systems to a serverless AWS framework, cutting infrastructure costs by 25%.
- Engineered **SQL** databases MySQL and PostgreSQL to enhance inventory management and order fulfillment. Integrated Kafka-driven real-time data streaming, reducing latency by 40% and enhancing system scalability, leading to a 30% boost in user engagement.
- Leveraged **AWS services** such as **Lambda**, **API Gateway**, **SNS**, **VPC**, and **CloudWatch**. Orchestrated end-to-end **CI/CD** pipelines using Jenkins, Docker, and Kubernetes, accelerating deployment cycles by 50% while ensuring robust version control with Git.

EDUCATION:

Northwest Missouri State University

Master of Science, Information Systems

Aug 2023 - Dec 2024

TECHNICAL SKILLS:

Programming Languages: Java, J2EE, Python, C++, SQL, Go

Frontend: React, JavaScript, TypeScript, Angular, Redux, HTML5, CSS3, Bootstrap

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, Node.js, Express.js, FastAPI

Cloud & DevOps: AWS (EC2, S3, Lambda, Step Functions, DynamoDB, API Gateway, IAM, SNS, CloudFormation, CDK, Redshift), Azure, Docker, Kubernetes, Jenkins

Databases & Analytics: PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, DynamoDB, Databricks, Hadoop, Spark, Kafka, Tableau, Power BI

Development Tools & Methodologies: Agile, JIRA, CI/CD, Gradle, Maven, Postman, TDD, Unit Testing, JUnit, Mockito, Design Patterns, Git, Linux (UNIX)

Certifications: AWS Certified Developer - Associate, Oracle AI Vector Search Certified Professional

PROJECTS:

Secure File Transfer Using Revocable Storage Identity-Based Encryption - Java, HTML, CSS, JavaScript, MySQL, Ajax

- Developed a secure file transfer system using Identity-Based Encryption, ensuring encrypted data transfer and revocable access controls. Integrated Ajax for efficient data handling, improving security and user experience.
- Designed an intuitive user interface with **HTML**, **CSS**, and **JavaScript**, enhancing usability for secure file sharing. Utilized **MySQL** for efficient management of user identities, encrypted files, and access control records.

Employee Management System - Java, PostgreSQL, API

- Developed an employee management system with a customized backend, integrating a RESTful API for seamless data interaction. Utilized MongoDB for flexible storage and incorporated JWT for secure authentication, with Swagger for comprehensive API documentation.
- Ensured system scalability and performance by implementing Redis for efficient caching and RabbitMQ for reliable message queuing, optimizing data flow and response times.

Online Student Services Portal - Java, React, AngularJS, Apache, SQL, MongoDB

- Created a cross-platform student services portal with an intuitive front-end using React and Angular, while managing backend operations with MySQL for seamless data handling.
- Improved user experience by implementing secure login functionality and designing modular API endpoints, facilitating smooth interactions between students and faculty.
