PROFESSIONAL SUMMARY

Results-driven Software Quality Assurance Engineer with experience in manual and automated testing across web, mobile, and client/server applications. Strong understanding of the Software Development Life Cycle (SDLC) and Agile methodologies. Adept at executing various testing strategies, including functional, regression, system, integration, and API testing. Proficient in CI/CD tools, automation frameworks, and database testing. Passionate about ensuring software quality and delivering seamless user experiences.

WORK EXPERIENCE

Zaman Construction Corp QA Analyst

JAN 2023 – DEC 2024

- Worked in an Agile environment for a construction business website that handles city department/facility contracts for building, highways, railroads, and schools
- Analyzed and reviewed software requirements, Business Requirements, Data Dictionary, functional specifications, and design documents
- Executed manual tests to verify results with expected results for different portals and provide detailed feedback for functional bugs and usability issues
- Developed Test Strategy, Test Scenarios, Test Cases, Test Data, and Test Matrix for new software development and platform regression
- Collaborated with application development and product team to understand requirements, business processes, and application flow.
- Executed test cases according to test plans/scripts and documented results.
- Reported defects from functional and regression test suites.
- Maintained close communication with Product, Design, and Development to understand the features and presentation required to support Zaman's business offerings and to align new requirements with existing designs
- Utilized LoadRunner for performance testing.
- Executed manual and automated tests using Selenium WebDriver

GalaxE.Solutions Mobile QA Analyst

AUG 2021 – DEC 2022

- Developed and maintained test cases, test data, and test plans for the banking system with Fiserv
- Led test case review meetings and collaborated in sprint planning.
- Executed backend testing using SQL queries
- Conduct functional, regression, cross-browser, mobile, and system testing for web and mobile applications (iOS & Android)
- Utilized Android Studio and Xcode for mobile app testing on simulators/emulators.
- Executed automated UI tests using XCUI Test (Swift) within Xcode
- Performed API testing using Postman and validated backend responses.
- Created and executed SQL queries for database verification
- Reported and tracked defects using JIRA
- Collaborated with developers, product managers, and business analysts to improve testing efficiency
- Developed automated scripts for mobile UI testing
- Conducted daily defect triaging and provided comprehensive test reports
