EDUCATION

- Master of Science in Information Technology** | GPA – 4.00/4.00 **Graduating May 2025**
Arizona State University **Tempe, AZ**
Relevant Coursework: Information Systems Development, Advanced Database Management Systems, Analyzing Big Data, Data Visualization and Reporting for IT, Advanced Big Data Analytics/AI, AI into Cybersecurity for IT.
- Bachelor of Engineering in Information Science** **May 2023**
BNM Institute of Technology **Bangalore, India**
Relevant Coursework: Data structures and Applications, Software Engineering, Database Management Systems, Management and Entrepreneurship for IT, Data Mining and Data Warehousing, Big Data Analytics.

SKILLS

- Programming Languages and Databases- Python, C, SQL, HTML, CSS.
- Data Science & Analytics – Data Warehousing, EDA, Data Mapping, ETL, Data Lakes, Statistics (Hypothesis Testing, Descriptive, Inferential), Data Mining (Clustering, Classification, Regression, DTC).
- Machine Learning & AI – Supervised/Unsupervised Learning, OpenCV, sci-kit-learn, Spark, Pandas.
- Tools & Software – Excel, Databricks, Tableau, PowerBI, Microsoft SSMS, MS Office 365, Visual Studio Code.
- Paper Publication- Design and development of a full-fledged recruitment dashboard ([JETIR2305351](#)).
- Community Engagement & Leadership: - Assisted with NGO initiatives, managing projects, outreach, & event coordination.

WORK EXPERIENCE

- Event Design and Management Lead** | *Skills- Leadership, Creativity, Efficiency.* **Aug 2023 - Current**
Hindu Yuva Club, Arizona State University **Tempe, AZ**
 - Spearheaded a team of 25 to transform event venues with culturally resonant decorations, achieving a 20% increase in attendee satisfaction through innovative decor setups.
 - Demonstrated leadership by streamlining the setup and breakdown processes, improving efficiency by 30%, and ensuring venues were left impeccable.
- Front End Development Intern** | *Skills -HTML, CSS, JavaScript.* **Mar 2023 - Apr 2023**
CoachEd, Edu Guidance Consultancy Pvt Ltd. **Bangalore, India**
 - Collaborated with the development team to create responsive and user-friendly web interfaces, ensuring optimal user experiences across multiple devices and boosting user engagement by 25%.
 - Implemented and maintained 10+ front-end features using HTML, CSS, and JavaScript, enhancing the company's website load time by 20% and user interaction by 40%.

PROJECTS

- Regression Model for Student Math Scores in Arizona** | *Regression Analysis, Predictive Modeling.* **Jan 2024 - Apr 2024**
 - Conducted an analysis of comprehensive data from 166 Phoenix schools, merging demographic factors with academic performance indicators to facilitate targeted recommendations for enhancing student outcomes within the district.
 - Performed data cleansing and applied advanced regression analyses, including XGBoost and Linear Regression, to refine student math performance predictions, improving accuracy by 40%.
 - Derived insights from model analysis to support data-driven resource management and improve 30% of policy decisions.
- Advanced Biomedical Data Management System** | *SQL, Data Modeling.* **Feb 2024 - Apr 2024**
 - Designed a relational database system managing over 1,000 biomedical data points, including patient records, clinical trials, and research publications, supported by an Entity Relationship Diagram (ERD).
 - Optimized database design and query structuring using advanced SQL methodologies, enhancing data retrieval and reporting capabilities with a 40% boost in system efficiency.
 - Automated data validation and audits with triggers and stored procedures, ensuring 100% accuracy across 80+ data points.
- Full-Fledged Recruitment Dashboard** | *Python, XGBoost.* **Oct 2022 - Apr 2023**
 - Developed a comprehensive recruitment dashboard using Python and SQL, which streamlined the hiring process by 40%, facilitating real-time tracking of applicant status and analytics on hiring trends.
 - Applied hybrid Machine learning algorithms, created a recommender model for 17 job recommendation domains, created a live job dataset, and conducted research to streamline the hiring process.
- Sports Club Management System** | *PHP, MySQL.* **Sept 2021 - Feb 2022**
 - Implemented a web-based sports club management system using PHP and MySQL, improving membership management efficiency by 30% and enabling seamless event scheduling and member communication.
 - Optimized sports club management by ensuring swift access to critical member data, enhancing overall efficiency in information retrieval and member participation in club events by 40%.
