

Anand Paul Kumbha

Software Engineer

anandpaul120@gmail.com | +1 309-621-0692 | Dallas, TX | [LinkedIn](#)

SUMMARY

- Accomplished as a Software Engineer with around 2 years of experience in front-end and full-stack development, specializing in JavaScript, React.js, Angular, and Node.js to build scalable and high-performance web applications.
- Proficient in RESTful APIs, GraphQL, Spring Boot, and database optimization using MySQL, PostgreSQL, and MongoDB, ensuring seamless backend integration and efficient data processing.
- Knowledgeable in CI/CD pipelines (Jenkins, GitHub Actions), cloud platforms (AWS, Azure), and DevOps automation, enhancing deployment efficiency and system reliability.
- Proficient in Agile methodologies, collaborating with cross-functional teams to deliver solutions, optimize performance, and improve user experience.

EDUCATION

Bradley University Master of Science in Computer Science	Aug 2022 - May 2024 Peoria, IL
Andhra University Bachelor of Engineering in Electronics and Communication Engineering	Jul 2018 – May 2022 Vizag, India

PROFESSIONAL EXPERIENCE

Blue Cross Blue Shield Software Engineer	Feb 2025 – Current TX
- Constructed interactive UI components using JavaScript, jQuery, and React, enhancing the responsiveness of healthcare analytics dashboards for real-time patient data monitoring and claims processing. - Optimized XML data processing for enterprise-level reporting systems, reducing parsing latency in large-scale healthcare data integration projects, ensuring compliance with HIPAA and regulatory standards. - Integrated Redux and RxJS for efficient state management in micro frontend applications, improving scalability for multi-departmental use in provider and payer systems. - Coordinated backend development using Spring Boot and Java EE, supporting high-availability services for secure member portals, claims processing, and provider network management. - Facilitated in designing and integrating RESTful APIs and SOAP services, ensuring seamless interoperability between internal BCBS systems, third-party health exchanges, and insurance providers. - Optimized SQL queries and PostgreSQL schemas, improving database performance for large-scale healthcare analytics applications, reducing claims processing time, and enhancing provider reimbursement accuracy.	
Molina Healthcare Software Engineer	Aug 2024 – Jan 2025 TX
- Streamlined MySQL database operations through SQL queries, enhancing data retrieval efficiency for claims processing, patient records, and provider network management while ensuring robust data integrity and HIPAA compliance. - Constructed responsive web interfaces with HTML5, CSS3, JavaScript, and Bootstrap, ensuring a seamless, mobile-friendly user experience for member portals, provider dashboards, and health plan enrollment platforms. - Collaborated with cross-functional teams throughout the full Software Development Life Cycle (SDLC) to deliver critical healthcare software solutions, meeting compliance requirements, project timelines, and budget constraints. - Implemented effective version control practices using Git, managing 40+ commits to facilitate smooth collaboration, rigorous code reviews, and maintain high-quality, secure healthcare applications. - Coordinated with consultants and data teams to align software solutions with BCBS's business strategy, ensuring patient care analytics, streamlined claims processing, and improved provider coordination. - Automated testing processes using Selenium, developing comprehensive test suites that increased test coverage, reduced regression testing time, and enhanced software for mission-critical healthcare applications.	
Adani Software Engineer	Jan 2022 – Jul 2022 India
- Engineered reusable React.js components and a scalable micro frontend architecture using Next.js, optimizing dashboards for energy, logistics, and infrastructure management. - Designed 20+ mobile-first UI layouts with Material-UI and Tailwind CSS, improving user interfaces for asset monitoring, fleet tracking, and smart grid applications. - Integrated 30+ RESTful and GraphQL APIs using Axios, enabling real-time data exchange for supply chain logistics, power distribution, and industrial automation. - Executed end-to-end testing with Jest and Cypress, ensuring software reliability for mission-critical applications in energy management and port operations. - Enhanced security with CSP and JWT authentication, safeguarding data for industrial IoT platforms and large-scale enterprise applications.	

- Deployed and managed applications on AWS Cloud, integrating AWS Lambda for serverless execution and optimizing infrastructure for high-traffic industrial applications.

Adani

Jun 2021 – Dec 2021

Web Developer Intern

India

- Constructed responsive web interfaces using HTML, CSS, and JavaScript, ensuring cross-device compatibility and seamless user experiences.
- Implemented modern styling techniques with TailwindCSS and SASS, optimizing design workflows and maintaining a scalable UI framework for 5+ web applications, ensuring consistency and maintainability.
- Conceptualized Chrome DevTools and Firefox DevTools for debugging and performance optimization, improving load speeds and cross-browser functionality.
- Collaborated in an Agile environment using Jira, participating in sprint planning, retrospectives, and regular meetings to manage requirements, address issues, and streamline ticket dispatch while ensuring adherence to front-end development best practices and coding standards.

PROJECTS

AI-Powered Portfolio Website

Technologies: React.js, Tailwind CSS, GPT API, Firebase Hosting

- Built a personal portfolio that dynamically generates tailored responses to visitor queries using OpenAI GPT APIs.
- Designed a responsive layout with Tailwind CSS and smooth animations using Framer Motion for an engaging UX.
- Integrated a blog system powered by Firebase Firestore, enabling real-time updates and CMS-like editing.
- Deployed on Firebase Hosting with CI/CD via GitHub Actions.

Real-Time Chat Application

Technologies: React.js, Node.js, Socket.io, MongoDB, Material-UI

- Developed a modern messaging platform with real-time capabilities using Socket.IO for WebSocket-based communication. Built user authentication and friend/group chat features with secure JWT-based login and MongoDB for persistence.
- Styled UI using Material-UI and implemented light/dark themes for accessibility.
- Added typing indicators, online status, and push notifications.

Smart Health Monitoring & Alert System

Technologies: React Native, Node.js, Firebase, Twilio API, AWS Lambda

- Built a cross-platform mobile app that tracks vitals (e.g., heart rate, blood pressure) and triggers alerts in real-time for anomalies.
 - Integrated Firebase Realtime DB to store patient data and Twilio SMS API for emergency contact notifications.
 - Used AWS Lambda to trigger health alerts and escalate based on condition severity levels, optimizing cost via serverless compute.
- Designed a responsive UI with React Native, tailored for caregivers and clinicians.

CERTIFICATIONS

- **Full Stack Web Developer**
- **Front-end Web Developer Bootcamp**

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, Java, SQL
- **Front-End:** React.js, Angular, Vue.js, Next.js, Redux, RxJS, HTML5, CSS3, SASS, Tailwind CSS, Bootstrap, Material-UI
- **Back-End:** Node.js, Express.js, Spring Boot, Java EE, RESTful APIs, GraphQL, SOAP, JWT, OAuth
- **Databases:** MySQL, PostgreSQL, Oracle, Teradata, MongoDB, Cassandra, Azure SQL, AWS RDS, Google BigQuery
- **Cloud & DevOps:** AWS (Lambda, S3, EC2), Azure (Data Lake, Synapse, Cosmos DB), Jenkins, GitHub Actions, GitLab CI/CD, Docker, Kubernetes
- **Big Data & ETL:** Apache Spark, PySpark, Kafka, Talend, Azure Data Factory, ETL Pipelines
- **Testing & Automation:** Jest, Cypress, Selenium, Chrome DevTools, Lighthouse
- **Tools & Version Control:** Git, GitHub, Bitbucket, Jira, Trello, Agile (Scrum, Kanban), SDLC
