SUMMARY

Full Stack Java Developer with proven experience building scalable web applications end-to-end using Spring Boot and React.js. Adept at architecting secure APIs, integrating databases, and optimizing system performance. Collaborative problem-solver who delivers high-quality solutions, adapts quickly to new challenges, and consistently enhances user and business outcomes.

Education

Auburn University at Montgomery, MS in Computer Science

Aug 2023 – May 2025

- GPA: 3.79/4.0
- **Coursework:** Advanced Data Structures and Algorithms, Machine Learning, Advanced Database Systems, Distributed Operating System.

Experience

Full Stack Java Developer (Remote), TechNGL Pvt Ltd – New Delhi, India

March 2022 – June 2023

- Architected and implemented modular **React.js** (Redux Toolkit, TanStack Query) front-end components and **Spring Boot** microservices, supporting a **25,000+** MAU platform with sub-second UI responsiveness.
- Optimized API throughput by **50%** via database indexing, GraphQL batching, and a MySQL→MongoDB migration; reduced average query latency from 180 ms to 70 ms.
- Containerized services with **Docker** and automated deployments through **Jenkins** and **GitHub Actions**, cutting release cycle time by **70%** and rollback time by 60%.
- Strengthened security posture by integrating **Spring Security**, OAuth2.0, and **JWT**, and instituted real-time monitoring with Prometheus and Grafana—reducing incident MTTR by **40%**.
- Led Agile ceremonies in **Jira**, conducted peer code reviews, and mentored two junior developers—improving team velocity by **30%** and code quality across the stack.

Software Engineer Intern, TechNGL Pvt Ltd – Remote, India

Sept 2021 – Feb 2022

- Gained proficiency in **Spring Boot** (MVC, Data JPA) by refactoring legacy Java code—enhancing module cohesion and reducing technical debt by **25%**.
- Designed responsive UI prototypes in **React.js**, TailwindCSS and shadcn/ui, collaborating on Figma mockups to boost component reuse by **30%**.
- Developed and maintained **JUnit/Mockito** test suites, elevating code coverage from 55% to 75% and increasing build stability in CI pipelines.
- Assisted in setting up **CI/CD** workflows (GitHub Actions, Docker) and authored Swagger/OpenAPI specs—streamlining API onboarding for front-end teams.
- Immersed in Agile practices (stand-ups, sprint planning, retros), used Git/GitHub for version control, and applied Postman for end-to-end API validation.

Projects

Logistico C2C Parcel Delivery Platform

- Developed Spring Boot microservices for order intake, dynamic routing, and driver allocation—processing over **1,200** shipments daily with **99.5%** uptime.
- Implemented real-time status updates via RabbitMQ messaging and WebSocket endpoints, reducing event propagation latency to under **200 ms**.

- Optimized MongoDB collections and indexes, cutting average query times by **50%** and applying Spring Retry for resilient message handling.
- Integrated Stripe payment flows with OAuth2.0 and JWT authentication, automating refunds and decreasing failed transactions by **30%**.

Tech Stack: Java11, Spring Boot, Spring Cloud (Eureka, API Gateway), RabbitMQ, MongoDB, Stripe, JWT, OAuth2.0, Docker, Jenkins

Smart Medical Appointment Scheduler

- Built a Spring Boot REST service with GraphQL endpoints to manage **50,000+** patient appointments, achieving **99.9%** service reliability.
- Engineered a conflict-free scheduling algorithm on PostgreSQL, supporting **600** simultaneous bookings with average latency under **150ms**.
- Automated SMS and email reminders via AWS Lambda and SNS, driving a **20%** reduction in no-show rates over three months.
- Established centralized monitoring and alerting using Prometheus and Grafana, cutting incident detection time by **40%**, and implemented ELK-based audit logging for compliance.

Tech Stack: Java11, Spring Boot, Spring Security, PostgreSQL, GraphQL, AWS Lambda, AWS SNS, Prometheus, Grafana, ELK, Docker, Terraform

Technologies

Programming Languages: Java, JavaScript, Python

Front-End Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Redux Toolkit, Axios, Tailwind CSS, Responsive Design, shadcn/ui, Styled Components, TanStack Query, React Query, Next.js

UI/UX and Design Tools: Figma, Adobe XD

Back-End Development: Core Java, Java 8+, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful API Design, Microservices (Spring Cloud, Eureka, API Gateway), GraphQL, WebSocket, Exception Handling, JWT, OAuth 2.0, Maven, Gradle, JUnit, Mockito, Postman, Swagger

DevOps and Cloud: Docker, Git, GitHub, CI/CD (GitHub Actions, Jenkins), AWS (EC2, S3, Lambda), Linux Deployment, Prometheus, Grafana, NGINX, Infrastructure as Code (Terraform)

Databases: MySQL, SQL, PostgreSQL, MongoDB

Tools and Methodologies: IntelliJ IDEA, VS Code, Git, Jira, Unit Testing (JUnit, Mockito), Integration Testing (JUnit, Mockito), Code Reviews

Certifications: AWS Cloud Practitioner, Python Basics (Coursera), Soft Skills Certification (NPTEL), Communication Skills (TCS iON), Digital Skills for Work and Life (Accenture).

Professional Development & Courses

Building Microservices with Spring Boot & Spring Cloud	Sept 2023 – Dec 2023
Spring Boot Microservices – Beginner to Guru	Jan 2024 – Apr 2024
AWS Cloud Architecture for Java Spring Boot Developers	May 2024 – Aug 2024
Deploy Java Spring Boot 3 Apps Online to Amazon Cloud (AWS)	Sept 2024 – Dec 2024
The Ultimate React Course 2025: React, Next.js, Redux & More	Jan 2025 – May 2025
