

Ananya Reddy Billa

1127 Euclid Ave Apt 1219 • Cleveland, Ohio, 44115, U.S.A • billaananyareddy@gmail.com • +1 (216) 322-7170

Education

Cleveland State University

Master's in computer science

3.8 GPA

Cleveland, Ohio

December 2025 (Expected)

Aurora's Technological and Research Institute

Bachelor's in computer science

Hyderabad

July 2022

Professional Experience

eLearning Associate

May 2024 - Present

Cleveland State University

- Administered and optimized learning management systems (LMS) like Blackboard Ultra, integrating external tools such as Turnitin, Panopto, and Respondus to enhance course delivery and user experience
- Diagnosed and resolved complex LMS challenges, including grade center discrepancies and tool integration failures, delivering comprehensive documentation that streamlined support processes for over 500 eLearning users in a month
- Refined LMS workflows by implementing specific process improvements and automation, reducing ticket resolution times by 35%. Improved system reliability with consistent monitoring and detailed technical training programs
- Supervised and trained a team of eLearning Associates in troubleshooting LMS functionalities, developing technical workflows, and ensuring adherence to institutional eLearning standards

Projects

- **Movie Genre Classification with NLP:** Analyzed IMDb movie plots using ML methods (SVM, Logistic Regression, KNN, TFIDF). Achieved 75.8% accuracy with SVM + TFIDF
- **Modular Project Budget Estimator and Tracker:** Developed a comprehensive tool integrating the COCOMO II model, for real-time expense tracking, AI-based recommendations, and visual analytics, empowering project managers with accurate budget management and predictive insights
- **Fake Online Reviews:** Engineered and deployed a machine learning system specializing in identifying fraudulent online reviews, improving review authenticity verification processes through natural language processing techniques that flagged over 1,000 suspicious entries
- **LSTM-RNN for Cloud Datacenter Forecasting:** Designed a predictive analytics tool to identify scalability challenges, enabling actionable strategies that improved resource allocation across 50+ simultaneous projects
- **Covid-19 API Dashboard:** Implemented an interactive dashboard that consolidated key performance indicators from diverse sources, allowing users to filter insights across 10 different geographic regions over customizable periods, improving reporting efficiency by 35%

Technical Skills

- **Programming Languages:** Python, C++, C, HTML, CSS, Java
- **Machine Learning Frameworks:** PyTorch, scikit-learn
- **Tools and Technologies:** SQLite, Panopto, Blackboard, Visual Studio Code, Git, VHDL
- **Database Management:** MySQL, MongoDB
- **Systems and Kernel Programming:** Multithreading, IPC, Linux Shell Scripting, Pintos OS
- **Digital Design:** FPGA Design, Verilog, MIPS Architecture Implementation
- **Other Skills:** Data Analysis, Algorithm Design, Digital Logic Design, Hardware Implementation, AWS

Activities

- Engaged in the "She-Arise 2.0" program by Capgemini, gaining expertise in Java software development, C, C++, and diverse areas of computer science, while acquiring comprehensive, logical, and cumulative experience
- Dedicated time and efforts as a volunteer for Street Cause, embodying compassion and selflessness to drive impactful initiatives that uplifted underprivileged communities and fostered lasting positive change in society
