Summary

I am a graduate student pursuing an M.S.E. in Scientific Computing at the University of Pennsylvania, with a strong foundation in Mathematics and Scientific Computing from IIT Kanpur.

I love solving complex problems, improving algorithmic efficiency, and thrive in collaborative environments by deriving insights from data and developing interpretable solutions.

At Intel and Oracle, I applied advanced computational techniques to real-world challenges, driving impactful results and fostering innovation.

Experience

Graduate Technical Intern May 2024 - December 2024

Intel Corporation

- Developed an **unsupervised chiplet design similarity algorithm** adopted in Intel's Quotation Portal which received approval from **industry experts and is currently being considered for a patent**.
- Improved design matching time by **10%** using advanced similarity metrics (Cosine, Euclidean, Earth Movers Distance), **enhancing customer and sales team efficiency**.
- Partnered with diverse stakeholders to streamline workflows within Intel's Market Portal, **automating news tagging and timeline generation** with AI Agents, **saving 10 hours per week** for the team and significantly boosting productivity.

Skills: FastAPI, React, SQL, MongoDB, Pandas, LangGraph, LangChain, NLP, Hugging Face, EDA

Technical Staff

May 2022 - August 2022

Oracle Corporation

- Developed a **Seq-2-Seq model** using LSTM to address the **Quantile Crossing issue** in Quantile regression, achieving **0 quantile crossings** in the final model.
- Training the model using **multipinball loss** and **IQF layer**, improved **forecast accuracy** and **interpretability**, making the results more actionable for stakeholders.
- Achieved a **5% improvement in Weighted Quantile Loss (WQL)** and integrated the model in Oracle's Forecasting Product.

Skills: Tensorflow, Python, Machine Learning, Regression

Education

Master of Science

University of Pennsylvania

📅 Aug 2023-Ongoing

CGPA: 3.8 / 4.0

Relevant Course: Machine Learning, Principles of Deep Learning, Big Data Analytics

Bachelors of Science

IIT, Kanpur

📅 Aug 2019-May 2023

CGPA: 8.8 / 10.0

Graduated with **Distinction**, top 10% of the class.

Relevant Course: Statistical Simulation and Data Analysis, Advanced Topics in Machine Learning

Technical Skills

Backend	Express, FastApi
Frontend	React, HTML, CSS
Data Base Management	SQL, MongoDB, Pandas
ML Frameworks	Jax, Tensorflow, Pytorch
OS	Linux, Windows, iOS
Languages	C, C++, Python, R, Javascript
Misc.	AWS, GitHub

Leadership

Manager

2020 - 2021

Unmukt IITK

- Worked in a team of **3** members and led **50+** volunteers for the effective conduction of meme and story writing competitions and pride month events in which eminent speakers took part from all over India.
- Monthly conduction of promotional activities, competitions and group talks to help students facing problems with gender-related issues.
