

PROFESSIONAL SUMMARY

Data-driven professional with an **MS in Applied Data Science** from the University of Chicago and **6+ years of experience** delivering robust **data models**, actionable insights, and **impactful dashboards** to drive strategic business decisions. Expert in **SQL, Tableau, Python**, and **ETL**, with a strong record of **collaborating cross-functionally** to translate business needs into scalable data solutions and clear, data-driven recommendations.

EDUCATION

Master of Science in Applied Data Science

University of Chicago, United States – August 2024

- **Key Courses:** Statistical Methods, Data Mining Principles, Machine Learning, Time Series Forecasting, Marketing Analytics, Data Visualization Techniques, Data Engineering

Bachelor of Technology in Electronics and Communication

University of Calicut, India – June 2011

SKILLS

Data Modeling & Analytics	: Advanced SQL, DBT
BI Tools & Visualization	: Tableau (Certified Desktop Specialist), OBIEE, MS Excel, R Shiny
Programming Languages	: Python(pandas, scikit-learn, matplotlib), R
ETL & Data Integration Tools	: IICS, Informatica Power Center, DBT, SAP PO, ODI
Cloud & Big Data	: GCP(BigQuery), Pyspark

PROFESSIONAL EXPERIENCE

Infosys Limited — Technology Analyst

February 2012 - February 2019

- **Delivered integrated data models:** Designed and optimized data integration workflows from **SAP**, flat files, and MDM into **Salesforce CRM** for Syngenta, leveraging **SQL** and **ETL tools(IICS, Informatica, ODI)** to ensure data accuracy and quality for business decision-making.
- **Collaborated cross-functionally:** Partnered with business stakeholders, product strategists, and engineers to gather requirements, define analytics outcomes, and translate business goals into clear, actionable data strategies and success criteria.
- **Built and maintained dashboards and reports:** Developed interactive **OBIEE** dashboards and standardized reports for Hyatt Hotels and Northeast Utilities, enabling self-service analytics and supporting executive decision-making.
- **Ensured data quality and process improvement:** Led root cause analysis to identify and resolve data issues, implemented data cleansing and deduplication processes, and **automated ETL workflows** to improve efficiency by 25%.

ACADEMIC PROJECTS

- **Capstone Project – Forecasting E-Scooter Demand in Chicago's Emerging Market:** Developed an LSTM time series model to forecast e-scooter demand in Chicago. Identified key community trends contributing to a projected 4% quarterly revenue increase and delivered actionable insights through an R-Shiny dashboard to optimize resource allocation for e-scooter companies.
- **Affordable housing insights using Tableau and SQL:** Developed a project analyzing affordable housing trends (2014-2023) to provide actionable insights for NYC policymakers. The dashboard is a strategic tool to evaluate key metrics such as the Housing Opportunity Index, vacancy rates, and customer satisfaction, supporting data-driven policy decisions and empowering residents with informed choices.
- **Targeted Market Campaigns for Starbucks:** Applied K-means clustering in Python to segment Starbucks customers based on behavior, demographics, and preferences, enabling personalized marketing strategies that boost customer engagement, loyalty, and sales growth.
- **Telecom Churn Prediction using Logistic Regression:** This project utilizes logistic regression to predict customer churn for a telecom company. To address data imbalance, hyperparameter tuning, and SMOTE were applied. This approach offers a valuable framework for churn prediction across various industries.
