## EDUCATION

---

Computer Science B.A. | Florida International University | Miami, FL

December 2025

## PROFESSIONAL EXPERIENCE

---

*Full Stack Software Development Intern | Sports Excitement | Remote*

*May 2025 – August 2025*

- Built backend services with Node.js and Supabase, including RESTful APIs, authentication, and data validation.
- Designed and implemented PostgreSQL database schema and optimized queries to support scalable platform features.
- Collaborated in an Agile Scrum team using GitHub for version control to deliver user-focused features and enhance platform performance.
- Developed responsive React.js components using JavaScript and Tailwind CSS in collaboration with UI/UX and design teams to ensure a consistent, user-friendly interface.

*Technology Specialist | Bright Hearts LLC | Miami, FL*

*April 2023 - Present*

- Developed internal web tools using Python, JavaScript and HTML/CSS to automate clinical documentation and payroll workflows for 50+ providers.
- Supported office operations including billing coordination, provider onboarding, and documentation review.

## PROJECTS

---

*Fitness and Community App*

- Developed a full-stack wellness web app using Python and Streamlit, integrating OpenAI and OpenWeather APIs to generate personalized weather-based workout advice.
- Architected a scalable backend with BigQuery on Google Cloud Platform (GCP) to manage users, workouts, posts, and activity history.
- Implemented CI/CD pipelines using GCP tools and GitHub to automate deployment and enable rapid iteration and reliable updates.

*AI-Powered Clinical Automation Tools*

- Developed responsive web applications using JavaScript, HTML, and CSS to automate clinical documentation workflows and reduce manual entry time.
- Deployed the applications using AWS to enable continuous integration and streamlined delivery.

*Book Rating & Commenting API*

- Developed a RESTful API using Java and Spring Boot to manage book ratings and comments, with optimized PostgreSQL queries.
- Worked in an Agile Scrum team to design and deliver features collaboratively.

## TECHNICAL SKILLS

---

*Languages & Frameworks:* Python, Java, JavaScript, SQL, React.js, Tailwind CSS, Next.js

*Backend & Databases:* Node.js, Supabase, PostgreSQL, Spring Boot

*Tools & Platforms:* Git/GitHub, Google Cloud Platform (GCP), AWS

*Development:* REST APIs, Agile (Scrum)

*Other:* Fluent in English and Spanish

## LEADERSHIP & MENTORSHIP

---

*Robotics Team Mentor | M3 Robotics | Hollywood, FL*

*May 2019 – June 2020*

- Mentored high school students in robot design, Java programming, and competitive strategy.
- Trained students in algorithmic problem-solving, sensor integration, and autonomous navigation.
