

Aniketh Reddy Lankala | Data Analyst

Wisconsin, USA | +1 (414) 307-0065 | anikethreddy1029@gmail.com | [linkedin.com/in/anikethreddylankala](https://www.linkedin.com/in/anikethreddylankala)

SUMMARY

Results-driven Data Analyst with 3+ years of experience delivering actionable insights through advanced analytics, data visualization, and automation. Proficient in SQL, Python, Tableau, and Power BI, with a proven ability to optimize decision-making and operational efficiency.

SKILLS

Data Analysis & Visualization: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau, Power BI, Microsoft Excel (PivotTables, Power Query, VLOOKUP, Macros)

Data Management & Engineering: Data Cleaning, ETL Processes, Data Modeling, Relational & Non-Relational Databases (MySQL, PostgreSQL, MongoDB), Query Optimization, Data Warehousing (Snowflake, Redshift)

Statistical & Analytical Methods: Descriptive & Inferential Statistics, Hypothesis Testing, Regression Analysis, Forecasting, Time-Series Analysis, A/B Testing

Business Intelligence & Reporting: KPI Development, Dashboard Creation, Automated Reporting Systems, Performance Analytics, Ad-Hoc Reporting

Tools & Platforms: Google Analytics, AWS (S3, Redshift, Glue), Git, Jupyter Notebook, Alteryx

Soft Skills: Problem-Solving, Stakeholder Communication, Data Storytelling, Cross-Functional Collaboration, Agile Methodology

PROFESSIONAL EXPERIENCE

Data Analyst, JPMorgan Chase & Co. | USA **Dec 2024 – Present**

- Designed and maintained 18 Tableau and Power BI dashboards for compliance teams, reducing manual reporting time by 40% and enabling faster access to KPIs across five business units.
- Developed optimized SQL queries to process 50M+ transaction records from Snowflake and Redshift, improving query execution speed by 25% and supporting faster fraud detection reporting cycles.
- Automated weekly financial performance reporting using Python scripts and AWS Glue pipelines, reducing preparation time from six hours to 45 minutes while ensuring 100% data accuracy.
- Analyzed transaction-level datasets to identify anomalies, flagging 200+ high-risk activities quarterly, enabling earlier intervention by compliance teams and improving fraud prevention efficiency by 20%.
- Implemented data validation checks on incoming financial datasets, detecting inconsistencies within two hours of ingestion and maintaining less than 0.5% error rate across production data pipelines.

Data Analyst, R-Financial | India **Jan 2022 – Jul 2023**

- Built 12 interactive Tableau dashboards for credit risk monitoring, enabling four regional offices to reduce decision-making turnaround time by 30% on loan approvals and risk assessments.
- Performed ETL on 20M+ financial records from MySQL and MongoDB, ensuring clean, structured data before Snowflake loading and maintaining consistent data integrity across all operational pipelines.
- Conducted time-series analysis on three years of repayment data, improving loan default prediction accuracy by 18% and supporting more accurate interest rate adjustments for clients.
- Optimized SQL queries used for regulatory compliance reporting, reducing monthly report generation time from four hours to 50 minutes without compromising reporting accuracy or completeness.
- Designed automated Python scripts for monthly data quality checks, maintaining an error rate below 1% across all datasets critical to credit risk scoring and compliance audits.

SQL Developer, Cybage Software | India **Jan 2021 – Dec 2021**

- Developed and optimized over 100 SQL stored procedures for client reporting systems, improving execution performance by 40% and reducing downtime during monthly batch processing.
- Designed scalable relational database schemas for five client projects, supporting datasets exceeding 10M rows and ensuring query performance remained within acceptable response time thresholds.
- Migrated 8M+ financial transaction records from legacy systems to PostgreSQL, achieving 99.9% migration accuracy and minimizing post-migration data correction efforts for client teams.
- Created automated SQL scripts for daily backups of high-volume transactional databases, reducing manual intervention by 90% and ensuring business continuity compliance.
- Conducted in-depth data integrity checks across three active client projects, resolving 95% of detected defects prior to production deployment and preventing critical reporting errors.
- Partnered with QA teams to design test datasets for validating reporting accuracy, enabling faster defect resolution and reducing test cycle time by 20% in release schedules.

EDUCATION

Master's in Business Analytics **Aug 2023 – May 2025**

Concordia University Wisconsin | Mequon, WI

Bachelor of Commerce (B. Com) **Jun 2020 – May 2022**

St. Francis Xavier Degree College | Hyderabad, India
