

Anil Ananthula

Data Analyst

PA | 901-231-9738 | anil.a@itjobinbox.com | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience in designing and implementing data-driven solutions to support strategic decision-making. Proficient in SQL, Python, Power BI, Tableau, and Snowflake, with expertise in building centralized dashboards, automating ETL pipelines, and streamlining complex reporting workflows. Experienced in applying machine learning algorithms (regression, classification, clustering, anomaly detection) to uncover trends, patterns, and actionable insights. Skilled in data integration, transformation, and validation across multiple systems, improving reporting accuracy and reducing manual effort by over 40 hours/month. Adept at working within Agile environments using tools like Jira, Git, Jenkins, and Docker, and deploying solutions using cloud platforms such as AWS, Azure, and GCP. Strong background in Big Data technologies (Spark, Hadoop, Hive) and relational/non-relational databases (MySQL, PostgreSQL, MongoDB).

SKILLS

Methodology: SDLC, Agile, Waterfall
Programming Languages: C, C++, Python, R, SQL, Scala, Java, HTML, CSS
IDEs: PyCharm, Jupyter Notebook, IntelliJ IDEA, Visual Studio, NetBeans
Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig, HDFS, Yarn, Data Lake, Data Warehouse
Visualization and Reporting Tools: Power BI, Tableau, MATLAB, SAS, Bloomberg Terminal, Argos, Matplotlib
ETL Tools: SSIS, Apache Kafka, Airflow
Machine Learning: Regression (Linear, Lasso, Ridge, Elastic Net), Decision Tree, Random Forest, SVM, Logistic Regression, K-NN, Naive Bayes, PCA, K-Means, Cross-Validation, Bagging, Boosting, etc.
Cloud Technologies and Infrastructure: AWS (S3, DynamoDB, Lambda, EC2, Redshift), GCP, Azure
Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow
Development and Operations Tools: Git, GitLab, Jenkins (CI/CD), Docker, Kubernetes, Grafana, Splunk, Jira, GitHub
Databases: MySQL, PostgreSQL, MongoDB, Neo4j, RDBMS, Snowflake
Operating Systems: Windows, Linux

EDUCATION

Masters in Information Systems RMU, Moon Township, PA	May 2025
Bachelor of Technology in Electronics and Communication Engineering CVR College of Engineering, JNTUH, India	May 2019

EXPERIENCE

McKesson, PA | Nov 2024 – Current | Data Analyst

- Spearheaded the development of a centralized Patient Outcomes Analytics Dashboard by integrating EMR, lab results, and insurance claim data using SQL, Python, Tableau, and Snowflake, improving care decisions and compliance monitoring.
- Built ETL pipelines using Python and SQL to automate the ingestion and transformation of healthcare datasets across disparate systems, reducing data latency by 45%.
- Conducted cohort analysis and predictive modeling to identify high-risk patient segments, leading to a 12% improvement in care plan effectiveness.
- Partnered with cross-functional teams (clinical, product, IT) to design HIPAA-compliant data solutions for real-time insights into treatment efficacy and patient adherence.
- Automated complex reporting processes for outcome metrics using Python scripts and Tableau workbooks, resulting in 30% faster report delivery to stakeholders.
- Utilized Azure Data Factory (ADF) to orchestrate end-to-end data workflows, integrating structured and unstructured healthcare datasets into Power BI dashboards for real-time patient outcome tracking and compliance reporting.
- Delivered actionable insights through ad hoc analysis on patient re-admissions and therapy gaps, influencing executive decisions on resource allocation and policy revisions.

Infinite Infolab, India | July 2019 - July 2023 | Data Analyst

- Designed and deployed a scalable Enterprise Operational Analytics Platform to monitor and optimize logistics, inventory, and customer engagement metrics using Power BI, MySQL, and Python.
- Led the development of real-time dashboards for supply chain KPIs, resulting in 20% improvement in on-time delivery rates and reduced stockouts.
- Created anomaly detection models using Python (Scikit-learn) to proactively identify deviations in order fulfillment, cutting operational issues by 15%.
- Automated daily, weekly, and monthly reporting workflows with Python, Excel VBA, and Power BI, reducing manual effort by over 40 hours/month.
- Collaborated with the business and product teams to define and track key operational KPIs, driving strategic decisions for cost reduction and service enhancement.
- Implemented data validation checks and quality assurance processes across datasets, increasing reporting accuracy by 25% and reducing data discrepancies.
- Utilized SQL and custom Python scripts for customer behavior analysis and churn modeling, leading to a 10% increase in customer retention strategies.
- Implemented ADF-triggered data refresh workflows to ensure Power BI dashboards reflected up-to-date customer behavior insights, driving timely business decisions and marketing optimization.
