

# ANILA DUBALA

Java Full Stack Developer

309-255-9546 | anila.dubala01@gmail.com | LinkedIn

## Professional Summary

Results-driven Java Full Stack Developer with over 3+ years of experience in designing, developing, and managing complex applications and solutions in fast-paced environments. Proficient in both front-end and back-end technologies, cloud services, microservices architecture, and DevOps practices. Adept at collaborating with cross-functional teams to deliver high-quality software products. Strong expertise in Agile methodologies and continuous integration/continuous deployment (CI/CD) processes.

My hands-on experience spans the entire software development lifecycle, from requirements gathering, architecture design, and implementation, to testing, deployment, and ongoing support. I am proficient in a range of **Java-based frameworks** (Spring, Hibernate, etc.), and have extensive expertise in building user interfaces using front-end technologies like **JavaScript, HTML, CSS**, and modern frameworks such as **React** and **Angular**.

## Skills

|                                   |                                                                                                                                                                                           |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages                         | Java, JavaScript, TypeScript, HTML5, CSS3, SQL, Python, SQL, Shell Scripting                                                                                                              |
| Frameworks/Libraries              | Spring Boot, Hibernate, React.js, Angular, Node.js, Express.js, Vue.js, jQuery, Bootstrap                                                                                                 |
| Databases                         | MySQL, MongoDB, PostgreSQL, Oracle, Redis, Cassandra, Firebase                                                                                                                            |
| Version Control & CI/CD Tools     | Git, Jenkins, GitLab, Bitbucket, Maven, Gradle, Travis CI, CircleCI                                                                                                                       |
| Containerization & Orchestration  | Docker, Kubernetes, OpenShift, Helm, Docker Compose                                                                                                                                       |
| Cloud Platforms                   | AWS (EC2, S3, Lambda, RDS, DynamoDB, Cloud Formation, IAM), Azure (Azure Functions, Blob Storage, Azure DevOps), Google Cloud Platform (GCP) (Compute Engine, Cloud Functions, Cloud Run) |
| Message Queuing & Event Streaming | Apache Kafka, RabbitMQ, AWS SQS, AWS SNS, Apache ActiveMQ, Amazon Kinesis                                                                                                                 |
| APIs & Protocols                  | RESTful APIs, GraphQL, WebSocket, SOAP, gRPC                                                                                                                                              |
| Testing                           | JUnit, Mockito, Selenium, Jest, Mocha, Cypress, Postman                                                                                                                                   |

## Education

**Master of Science:** Computer Science  
**Kent State University of Ohio** - Ohio, USA

**Bachelor of Science:** Computer Science  
**Sri Indu University, Ibrahimpatnam** - India

# Work History

---

## Java Full Stack Developer

Jan 2024 - Current

### Auto Desk – San Rafael, CA

- Designing and developed robust microservices using Spring Boot and RESTful APIs to support Autodesk's cloud-based software solutions.
  - Implementing dynamic, responsive user interfaces using React.js, ensuring optimal user experience across devices.
  - Integrating third-party APIs and services to enhance application features and performance.
  - Optimizing backend services for scalability and performance, leveraging AWS cloud infrastructure.
  - Collaborating with cross-functional Agile teams to define technical requirements and deliver high-quality software.
  - Developing serverless applications using AWS Lambda for cost-effective, scalable solutions.
  - Applied DevOps practices with Jenkins and Docker for automated CI/CD pipelines.
  - Utilizing GraphQL for efficient data querying and enhanced API performance.
  - Integrating security best practices, including OAuth 2.0 and JWT authentication.
  - Conducting code reviews and provided mentorship to junior developers on full stack development best practices.
- 

## Java Full Stack Developer

Jan 2020 – Jul 2022

### Fresh Works – India

- Assisted in developing and maintaining web applications using Java, Spring Boot, and Angular.
- Participated in the design and implementation of RESTful APIs to support application functionality.
- Contributed to front-end development using HTML, CSS, and JavaScript to enhance user interfaces.
- Performed unit and integration testing to ensure code quality and application reliability.
- Supported the migration of legacy systems to modern Java-based microservices architecture.
- Leveraged Docker for containerizing applications and simplifying deployment processes.
- Applied Agile methodologies to manage project workflows and deliver iterative improvements.
- Integrated third-party APIs to expand application capabilities and improve user experience.
- Used Git for version control and collaboration with development teams.
- Optimized SQL queries and database interactions for improved application performance.
