

Summary
Java Full Stack Developer with 5+ years of experience delivering scalable, secure, and high-performance enterprise applications. Proficient in **Java (8–17), Spring Boot, Spring MVC, and RESTful APIs**, with strong expertise in **frontend frameworks (React.js, Angular)** and **microservices-based architectures**. Skilled in **SQL/NoSQL databases (MySQL, PostgreSQL, MongoDB)** and **event-driven systems with Kafka**. Experienced in **cloud-native deployments on AWS (EC2, S3, RDS, CloudWatch, Lambda)** and building automated **CI/CD pipelines using GitHub, Jenkins, Docker, and Kubernetes**. Adept at **Agile methodologies, SDLC best practices, and test automation (JUnit, Selenium)** with a proven ability to optimize backend performance, enhance user experience, and collaborate with cross-functional teams to deliver enterprise-grade solutions.

Competencies

Front-End: JavaScript, Typescript, HTML5, CSS3, AJAX, JSON, XML
Back-End: Java (17, 11, 8), SQL, Node.js, C#
Databases: MS SQL Server, Oracle, MySQL, Mongo DB
J2EE Technologies: JSP, JPA, JVM, JavaBeans, JDBC
Frameworks: React.js, Angular.js, Vue.js, Express.js, Spring Boot, Bootstrap, Spring MVC, jQuery, Hibernate
Testing Tools: Selenium, JUnit, Cypress, Jest
Cloud Platforms: AWS (EC2, SNS, RDS, Cloud Watch), Google Cloud Platform, Microsoft Azure (Azure Data Lake, Azure Data Factory, Blob Storage)
Methodologies: Agile, Waterfall, SDLC
Others: Microservices, Docker, Jira, Confluence, IntelliJ IDEA, Eclipse, VS Code, Java Networking, RESTful API, Postman API

Experience

Capital One, NJ | Java Full Stack Developer June 2025 – Current

- **Developed and deployed microservices** using **Java 11/17, Spring Boot, and Node.js**, delivering secure, scalable backend solutions for financial applications.
- Developed and deployed **Java-based enterprise applications using OpenJDK and J2EE**, ensuring scalability and performance.
- Built and optimized **RESTful APIs** with Swagger/OpenAPI documentation, enabling seamless integration across internal and external systems.
- Developed **RESTful APIs with Python and FastAPI**, enabling scalable, low-latency backend services and seamless integration with frontend systems.
- Designed and implemented **React.js/TypeScript** frontends with reusable components integrated with REST/GraphQL APIs for dynamic, user-centric dashboards.
- Built **dynamic and responsive web applications using React.js and JavaScript**, ensuring seamless user interactions and optimized performance.
- Developed **shell scripts on UNIX/Linux** to automate deployments, monitoring, and system operations.
- Secured critical banking applications with **Spring Security, OAuth2, and JWT-based authentication**, enforcing role-based access control (RBAC).
- Optimized **relational databases (Oracle, SQL Server)** with indexing, stored procedures, and performance tuning for high-volume applications.
- Implemented **NoSQL solutions (Cosmos DB, MongoDB, Cassandra, Redis)** to support scalable, high-availability systems and real-time data processing.
- Integrated **Apache Kafka** for real-time event-driven processing, enabling reliable and scalable communication across distributed systems.
- Created **Splunk** dashboards and alerts to visualize system metrics, detect anomalies, and improve operational visibility and incident response.
- Containerized and orchestrated services with **Docker and Kubernetes**, achieving zero-downtime deployments and fault tolerance in production environments.
- Implemented **Infrastructure as Code (IaC) with Terraform**, automating provisioning and resource management across cloud environments.
- Deployed and managed scalable applications on **GCP using Compute Engine, Cloud Run, and Cloud Storage**.
- Built and optimized data pipelines with **BigQuery** and Dataflow for efficient data processing and analytics.
- Developed **unit and integration tests** using JUnit, Mockito, and Selenium, achieving over **85%+ test coverage** and reducing production defects.
- Practiced **TDD methodology** by writing tests before code implementation to ensure functionality and prevent regressions.

M & T Bank, NJ | Full-Stack Developer (Java). Jan 2024 – May 2025

- Built and maintained **scalable backend services** using **Java 17, Spring Boot, Spring MVC, Spring Security, and Node.js (Express)**, implementing microservices and RESTful APIs with **20% improved response times**.
- Utilized **Spring Tool Suite (STS)** for efficient development, debugging, and integration of Spring Boot and J2EE applications.
- Designed, developed, and managed APIs using **Apigee** for secure, scalable, and high-performance API management.
- Developed and deployed **RESTful APIs and data-driven applications** using **Python frameworks (Flask, FastAPI, Django)**, improving scalability and performance.
- Designed and deployed **React 18 frontends** with reusable components, hooks, and state management (Redux/React Query) for high-performance applications.
- Built **modular, scalable frontends with Next.js and React**, integrating APIs for dynamic and responsive user experiences.
- Integrated and optimized **databases (Oracle, PostgreSQL, MongoDB, DynamoDB)** using JDBC, JPA/Hibernate, and NoSQL models, improving data persistence and scalability.
- Implemented **event-driven architectures with Apache Kafka**, enabling reliable real-time data streaming and communication across distributed microservices.
- Utilized **Splunk** for log analysis, monitoring, and real-time application performance tracking to identify and resolve issues proactively.
- Developed and deployed cloud-native applications on **GCP** using Compute Engine, Cloud Run, and Cloud Storage for scalability and reliability.
- Designed and optimized data workflows using **BigQuery** and Dataflow to enable fast and cost-effective data analytics.
- Created and maintained **CI/CD pipelines** with Jenkins, GitHub Actions, Docker, Gradle, and Kubernetes, automating deployments and ensuring fault-tolerant, zero-downtime releases.
- Secured APIs by implementing **JWT and OAuth2 authentication** with role-based access control, ensuring compliance and safe user interactions.
- Designed and maintained **automated testing frameworks** using Selenium, TestNG, JUnit, and Mocha, achieving **85%+ test coverage** and accelerating regression cycles.
- Collaborated with **cross-functional teams** (UI/UX, QA, business analysts) in **Agile/Scrum environments**, contributing to sprint planning, code reviews, and feature delivery.

Kpit Technologies, India | Full-Stack Developer. August 2018 – Apr 2022

- **Developed backend services** using **Java 8, Spring Boot, JSP, and JPA**, delivering 50+ RESTful APIs for seamless frontend integration and system interoperability.
- Designed and implemented **Spring Batch jobs** with chunk-oriented processing and transaction management for large-scale, high-volume enterprise data processing.
- Applied **design patterns and best practices** in Java and Spring Boot microservices, reducing technical debt and improving code reliability and maintainability.
- Built **responsive web applications** with **JavaScript and TypeScript**, leveraging strong typing, generics, and real-time RESTful API integration to optimize performance and cross-browser compatibility.
- Developed **scalable SPAs in React.js** using reusable components, ensuring UI consistency, faster development cycles, and enhanced user experience.
- Secured applications with **OAuth2, JWT, and Spring Security**, implementing role-based access control (RBAC) and token validation across Spring Boot and Node.js middleware.
- Built and deployed **Python-based applications and APIs** with Flask and FastAPI, improving scalability, automation, and data processing efficiency.
- Designed and optimized **relational (PostgreSQL, MySQL, Oracle, SQL Server)** and **NoSQL (MongoDB)** schemas, implementing indexing, stored procedures, and query tuning for high-performance applications.
- Integrated **Apache Kafka** for real-time, asynchronous microservices communication, enabling event-driven and scalable architectures.
- Integrated **Apache Flink with Kafka and databases**, supporting large-scale data ingestion, transformation, and stateful stream processing.
- Automated CI/CD pipelines using **Maven, Jenkins, Git, and Docker**, streamlining deployments and ensuring reliable, consistent releases in Agile environments.
- Deployed and scaled applications with **Kubernetes and Terraform (IaC)**, ensuring infrastructure consistency, high availability, and zero-downtime deployments on AWS.
- Architected and deployed **cloud solutions on AWS (EC2, S3, Lambda, RDS, API Gateway)**, optimizing scalability, performance, and cost-efficiency.
- Applied **Test-Driven Development (TDD)** principles to ensure code reliability, maintainability, and faster defect detection.

Education

Master’s in information system technology, Wilmington University, Delaware, USA | August 2022-December 2023
