

ANIL KUMAR REDDY

Location: Arlington, TX | Phone: +1 (682) 220-9659 | Email: anilkumargj07@gmail.com | [LinkedIn](#)

SUMMARY

Data Engineer with 4+ years of experience designing and optimizing data pipelines and cloud-based solutions using Python, SQL, and Spark. Improved data processing efficiency by 40% through pipeline automation and reduced ETL run time by 35% on AWS. Collaborated with cross-functional teams to deliver 99.9% data accuracy for analytics and reporting in agile environments.

EDUCATION

Master of Science in Data Science

The University of Texas at Arlington, Texas, USA | Aug 2023 – May 2025

Bachelor of Technology in Computer Science

REVA University | May 2018 – May 2022

SKILLS

- Programming Languages: Python, R, SQL
- Machine Learning & Data Science: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-learn, Apache Spark MLlib, Dask
- Data Visualization: Power BI, Tableau
- Database Management: SQL, MySQL, MongoDB
- Cloud Platforms: AWS (S3, Glue, Redshift, Lambda), Azure (Data Factory, Databricks), Google Cloud Platform
- Big Data Technologies: Hadoop, Spark
- ETL Tools: Data Profiling, Data Integration, Data Modeling
- Statistical Analysis: A/B Testing, Time Series Analysis
- Modeling Tools: Git, ER/Studio, Oracle Data Modeler, SSRS, SSIS
- Agile Methodologies: Scrum, Kanban
- Project Management Tools: Microsoft Office Suite (Project, Visio, Excel, PowerPoint), Jira, Confluence
- Specializations: Data Wrangling, Data Visualization, Statistical Analysis
- Soft Skills: Critical Thinking, Written & Communication Skills, Presentation Skills, Problem Solving, Team Workflows, Leadership Skills, Project Management, Risk Management, Integration Skills, Marketing Skills, USI Best Practices, Fast-Paced Work Environments
- Operating Systems: Windows, Mac

PROFESSIONAL EXPERIENCE

Data Engineer

Intellectsoft, USA | Aug 2024 – Present

- Built and optimized scalable ETL pipelines using Python, SQL, and Apache Spark, reducing data processing time by 40%.
- Developed and maintained cloud-based data infrastructure on AWS (S3, Glue, Redshift), improving data availability by 35%.
- Automated data workflows using Apache Airflow, reducing manual intervention by 60%.
- Spearheaded data governance framework implementation, partnering with engineering, product, and finance teams to deliver standardized datasets, boosting reporting accuracy and reducing data discrepancies by 30%.
- Implemented data quality checks that increased data reliability to 99.9%.

Cloud Data Engineer

Wipro Ltd, India | Apr 2022 – Apr 2023

- Assisted in designing and deploying ETL pipelines in Azure Data Factory and Databricks, reducing delivery time by 25%.

- Documented data flows, lineage, and architecture using Visio and Confluence to support knowledge transfer and onboarding.
- Contributed to the cleansing and transforming raw data, enhancing analytics readiness and improving data usability by 30%.
- Engineered CI/CD pipelines using Git, Code Pipeline, and Lambda, streamlining automated testing and deployment.
- Supported the development of dashboards by preparing backend data models, increasing end-user satisfaction by 20%.
- Documented data flows and created knowledge bases, reducing onboarding time for new team members by 40%.

Data Engineer

Anvizon (PwC), India | Apr 2020 – Mar 2022

- Designed and maintained ETL pipelines using SSIS and Python, improving data extraction efficiency by 50%.
 - Managed relational and NoSQL databases (MySQL, MongoDB), optimizing queries and indexes to boost performance by 45%.
 - Developed and deployed datasets for Power BI and Tableau, reducing reporting turnaround time by 35%.
 - Created scripts to automate file ingestion and parsing from FTP and API sources, saving 10+ hours/week in manual tasks.
 - Collaborated with business analysts to define data requirements, leading to a 20% improvement in data-driven decision-making.
 - Partnered with QA to implement data validation scripts, improving data integrity and consistency by 95%.
-

PROJECTS

Sentiment Analysis on Amazon Reviews (Machine Learning)

- Leveraged BERT and RNN/LSTM models to perform deep contextual sentiment analysis on real-world Amazon review data.
- Improved model accuracy and performance, enabling more precise insights for customer feedback and business decisions.

Inventory Management (Advanced Database Organization)

- Optimized checkout process and payment transaction handling to ensure secure, efficient operations and reduce errors.
- Streamlined purchase flow, enhancing user experience and overall system reliability for e-commerce operations.

Chicago House Price Prediction (Data Preparation and Analysis)

- Prepared and cleaned housing datasets using R, training predictive models to forecast prices accurately.
- Built trend visualizations to improve model interpretability and support data-driven decision-making for stakeholders.

SparklingScript: DSL for Generating Apache Spark Code (Big Data Technologies)

- Developed parsing and code generation modules in Python using ANTLR, enabling analysts to generate Spark code efficiently.
 - Created user-friendly syntax with robust testing, error handling, and documentation for scalable deployment and adoption.
-
