

Anirudh Nori

MA, USA | (212) 671 0818 | anirudhn@jobitmail.com

SUMMARY

- **4+ years** of experience in full-stack software development, with expertise in designing, developing, and deploying scalable applications.
- Proficient in **Java, Python, Kotlin, Scala, Golang, JavaScript, and SQL**, leveraging frameworks like **Spring Boot, Django, FastAPI, React.js, Vue.js, and Angular** to create high-performance applications.
- Expertise in **microservices architecture**, serverless computing, and cloud-based deployment strategies on **AWS, Azure, and GCP**.
- Strong database management skills in **PostgreSQL, Oracle, MySQL, DynamoDB, and MongoDB**, with experience in query optimization and indexing strategies.
- Hands-on experience in **CI/CD automation**, infrastructure as code (**Terraform, Ansible**), and container orchestration using **Docker and Kubernetes**.
- Adept in **AI/ML integration**, leveraging TensorFlow, PyTorch, and Scikit-learn for building predictive models and data-driven applications.
- Extensive experience with **Agile methodologies, DevOps practices, and automated testing frameworks**.

EDUCATION

Binghamton University, State University of New York Master of Science, Computer Science (May 2024)

Jawaharlal Nehru Technological University

Bachelor of Technology, Electronics and Communication Engineering (May 2020)

TECHNICAL SKILLS & CERTIFICATION

Languages: Java, Python, Kotlin, Scala, JavaScript, TypeScript, Golang, Rust, SQL, Shell Scripting

Backend: Spring Boot, Django, FastAPI, Express.js, Node.js, gRPC, GraphQL, Kafka, RabbitMQ

Frontend: React.js, Redux, Vue.js, Angular, Bootstrap, TailwindCSS, Webpack, Next.js, Jest

Cloud & DevOps: AWS (Lambda, API Gateway, S3, EC2, RDS, CloudFormation, SQS, SNS), Azure (DevOps, Active Directory, AKS), GCP (BigQuery, Cloud Run), Docker, Kubernetes, Terraform, Ansible

Databases: PostgreSQL, MySQL, Oracle, DynamoDB, MongoDB, Cassandra, Redis

Testing & CI/CD: JUnit, Mockito, Cypress, Selenium, Postman, GitHub Actions, Jenkins, SonarQube

AI/ML & Data Engineering: TensorFlow, PyTorch, Scikit-learn, Apache Spark, Airflow, Databricks

Version Control & Monitoring: Git, GitHub, GitLab, Bitbucket, Prometheus, Grafana, ELK Stack, Splunk

Certifications: AWS Certified Solutions Architect - Associate

PROFESSIONAL EXPERIENCE

MetLife, USA (Dec 2023 - Present)

Software Engineer

- Designed and deployed **scalable microservices** using **Spring Boot, AWS ECS, and GraphQL**, improving response times by **35%**.
- Led the migration from **monolithic architecture** to a **serverless microservices model**, reducing infrastructure costs by **30%**.
- Optimized SQL queries in **PostgreSQL** and **Oracle**, leading to a **20% improvement** in database performance.
- Automated CI/CD pipelines using **GitHub Actions, Terraform, and AWS CodePipeline**, reducing deployment times by **50%**.
- Implemented **GraphQL API Gateway** and optimized RESTful services, enhancing API performance by **40%**.

Accenture, India (Nov 2020 - Jul 2022)

Software Engineering Analyst

- Developed and deployed customer-centric **loan management and core banking features** using **Spring Boot, React.js, and Kafka**.
- Designed and implemented a **fraud detection system** leveraging **Apache Spark, TensorFlow, and real-time Kafka streaming**.
- Enhanced **CI/CD automation** with **Jenkins and Docker**, reducing deployment time by **30%**.
- Built **serverless event-driven architectures** using **AWS Lambda and SNS**, optimizing transaction processing to handle **10,000+ transactions per second**.
- Integrated **OAuth2 and JWT authentication**, improving security and reducing incidents by **40%**.

Intex Technologies, India (Jan 2019 - Oct 2020)

Java Developer

- Developed **RESTful APIs** and backend services using **Spring Boot and Hibernate**, improving system efficiency by **20%**.
- Migrated legacy applications to **AWS Lambda and API Gateway**, reducing infrastructure costs by **25%**.
- Built interactive **React.js dashboards** for real-time analytics, improving business insights and operational efficiency.
- Automated performance monitoring using **Grafana, Prometheus, and ELK stack**, enhancing system reliability.
