PROFESSIONAL SUMMARY

Data & BI Analyst with around 2 years of experience architecting cloud-native data solutions and automating analytics workflows. Proficient in SQL, Python, and advanced ETL development (AWS Glue, Snowflake) with expertise in designing data models, optimizing pipelines, and integrating multi-source datasets for enterprise-scale analytics. Skilled in building dynamic dashboards using Tableau and Power BI to enable real-time KPI monitoring and predictive insights. Strong background in B2B and enterprise data governance, API integrations, and performance tuning, delivering high-quality, compliant, and scalable analytics solutions that accelerate business decision-making.

TECHNICAL SKILLS

- Programming & Data Analysis: SQL, Python (Pandas, NumPy, Matplotlib), R
- BI & Visualization: Tableau, Power BI (DAX, Data Modeling), Looker Studio, Google Data Studio
- Databases & Cloud Platforms: PostgreSQL, MySQL, MongoDB, Snowflake, AWS (S3, Redshift, Glue, Athena), GCP (BigQuery)
- ETL & Data Engineering: Python ETL, Alteryx, Talend, AWS Glue, API Integration
- Machine Learning & Analytics Tools: Scikit-learn, RapidMiner, Jupyter Notebook
- Version Control & Project Tools: Git, Jira, Confluence
- Productivity & OS: Excel (Advanced: Pivot Tables, Macros), Windows, Linux

PROFESSIONAL EXPERIENCE

Business Analyst

SPCX Pvt. Ltd. | Pune, India | Nov 2022 – Dec 2023

- Spearheaded the development of a scalable analytics platform using **Python, MongoDB, PostgreSQL**, and **Google Data Studio**, streamlining data access and accelerating business insights.
- Designed and automated complex **ETL pipelines** using **Python, AWS Glue**, and **Talend**, reducing manual reporting by **30%** and enabling near real-time KPI tracking across Marketing, Logistics, and Supply Chain.
- Built and maintained **interactive dashboards** in **Looker Studio, Power BI, and Tableau**, leveraging advanced **DAX** and data modeling techniques to visualize operational performance and support executive reporting.
- Conducted deep-dive analyses using **SQL, Pandas**, and **R**, identifying bottlenecks in logistics operations and enabling data-driven process optimizations that reduced delays and improved resource efficiency.
- Implemented robust data workflows and governance practices using **Snowflake, Redshift**, and **Athena**, ensuring scalability, security, and data consistency across cloud platforms (**AWS, GCP**).
- Collaborated cross-functionally with Tech, Product, and Business teams to define **data architecture, integration requirements**, and standardize APIs between systems including CRM and supply chain tools.
- Utilized **Git, Jira**, and **Confluence** to manage Agile sprint cycles, track feature progress, and document workflows, enhancing transparency and delivery speed.
- Delivered models and visualizations through **Jupyter Notebooks** and **RapidMiner**, supporting predictive analytics initiatives using **Scikit-learn** and real-world business datasets.
- Ensured end-to-end data integrity, from extraction and modeling to delivery and monitoring, while communicating technical insights clearly to both technical and non-technical stakeholders.

Analyst Intern

SPCX Pvt. Ltd. | Pune, India | Jun 2022 – Oct 2022

- Underwent comprehensive training in **SQL, Python (Pandas, NumPy)**, and BI tools (**Google Data Studio, Power BI, Tableau**), building the technical foundation for full-time analytics responsibilities.
- Wrote optimized SQL queries to extract, join, and aggregate operational and marketing data, enabling deeper performance insights.
- Designed and maintained **interactive KPI dashboards** in Google Data Studio, enhancing visibility for business stakeholders.
- Performed **data cleaning, validation, and quality assurance** checks to ensure data integrity across reporting workflows.
- Assisted in the analysis of **Marketing campaigns, Supply Chain flows, and Logistics operations**, while learning **ETL processes, data governance frameworks**, and API-based data integration methods used in enterprise analytics.
