PROFILE SUMMARY

Versatile Data & Business Analyst with hands-on experience in web development, stakeholder engagement, and data-driven decision-making. Currently supporting a government project with the Navy, developing internal websites and acting as the key liaison between technical teams and business users. Skilled in SQL, Power BI, JavaScript, and Agile methodologies, with active involvement in requirement gathering, UAT, and end-user training. Adept at translating business needs into technical solutions, streamlining workflows, and driving operational efficiency. Committed to continuous learning and delivering impactful, data-informed solutions that support organizational success.

EDUCATION

Bachelor of Degree in Computer Science

Universiti Teknologi MARA Shah Alam, Selangor | August 2019 - January 2023

Subjects: Artificial Intelligence Algorithms, Database Engineering, Object Oriented Programming, Database Design and Development, Data Mining, Discrete Structures, Computer Security, Algorithm Analysis and Design, Parallel Processing, Enterprise Programming, Software Engineering, Business Data Analytics, Principle of Operating System, Applied Probability and Statistics, Calculus, Linear Algebra, and Project.

Individual Final Year Project: Gaming Guide Recommender System

Develop gaming guide recommender system based on a fast-growing Esports game called Valorant by Riot Games. Worked on collecting and preprocessing data as well as developing the recommender system. This project uses Rule-Base Filtering, PHP, HTML, JS, CSS and Microsoft Excel.

Biology, Chemistry & Physics Course

Selangor Matriculation College | 2018 - 2019

Pure Science Stream

SMK Seksyen 9, Shah Alam | 2013 - 2017

PROFESSIONAL EXPERIENCE

Executive Data & Business Analyst

December 2024 - Current

CodeQ Hub

- Contributed to a government project under contract with the Navy, serving as both a web developer and data/business analyst to support digital transformation efforts.
- Attended regular meetings with stakeholders and government representatives to gather requirements, align technical solutions with business goals, and ensure successful project execution; documented discussions and prepared formal meeting reports.
- Developed and maintained custom websites tailored to operational needs, ensuring user-centric design, functionality, and performance.
- Bridged communication between technical teams and non-technical stakeholders to clarify needs, prioritize features, and translate business processes into actionable solutions.
- Led and supported User Acceptance Testing (UAT) by preparing test cases, gathering feedback, and validating system performance; also facilitated end-user training.
- Ensured delivery met project milestones while maintaining data integrity, system reliability, and compliance with government standards.

Executive Data Analyst

August 2024 - October 2024

Hong Leong Bank (Contract)

- Experienced in creating and overseeing complex SQL queries for the extraction and modification of huge datasets for in-depth analysis and data reporting.
- Engaged with a variety of cross-functional teams to collect and understand business needs, making sure that data reporting in the field of digital banking was in line with corporate goals.
- Work together with the sales and marketing teams to customize offers and customer experiences based on unique tastes and habits.
- Collaborating directly with decision-makers and stakeholders to comprehend company demands and create data-driven solutions that meet them.

- Proficient in developing and managing SQL queries to extract and manipulate large datasets for data reporting and in-depth analysis.
- Collaborated with diverse cross-functional teams to gather and comprehend business requirements, ensuring data reporting aligned with organizational objectives in the digital banking domain.
- Contributed to the design and implementation of new data reporting features and functionalities, significantly enhancing the data analysis capabilities of the organization's business intelligence platform.
- Monitor and evaluate data reporting performance, identifying opportunities for process improvements and efficiency enhancements.
- Developed and maintained a range of regular reports, delivering timely and accurate data insights crucial for effective decision-making.

SKILLS

Software & Tools/Platform:

PostgreSQL, MySQL, NoSQL, GaussDB, DBeaver, MySQL Workbench, SQL Server Management Studio, NetBeans, Microsoft Access, Tableau, Microsoft Power BI, JIRA, MATLAB, WEKA, RapidMiner, MongoDB, Oracle, Visual Studio Code, phpMyAdmin, Microsoft Office

Programming Language:

SQL, C++, Python, HTML, CSS, Javascript, Java, Java Server Pages, PHP, ReactJS

Soft Skills:

Stakeholder Communication, Critical Thinking, Problem Solving, Cross-functional Collaboration

Languages:

English (Advanced), Bahasa Malaysia (Advanced)

COURSE WORK PROJECT

Marine Life Organism Detection using Artificial Intelligence Algorithms

2020-2021

An experiment to classify the images of marine life. All the necessary experiments were implemented, trained, and tested with computer vision toolbox, image processing toolbox, neural network toolbox, and classification learner app in MATLAB (R2019a) environment. This project use the language Python and MATLAB.

Business Intelligence Dashboard for Netflix with Enhanced Data Visualization

2022

This project utilized WEKA and Excel to collect and clean data, which was then analyzed using statistical methods. Microsoft Power BI was used for dynamic data visualization, enabling the creation of clear and intuitive dashboards and reports.

Rumah Amal Cahaya Tengku Ampuan Rahimah, RACTAR Registration Management System

2022

This system is made for applying for admission and registration of students by the Guardian or Department of Social Welfare Malaysia (JKMM). The system will process filled admission applications and will allow Admin to process the applications based on the requirement before proceeding to the next form which is filled in the admission registration form. This project uses PHP, HTML, CSS and JS.
