Portfolio: <https://anishmatta07.wixsite.com/data-analyst-portf-1>

Summary:

Certified Tableau Desktop Specialist with experience in data analysis, visualization, and reporting utilizing Tableau, SQL, and Python. Strong academic foundation in data mining, statistical methods, and programming. Adept at transforming data into actionable insights to drive business decisions. Eager to leverage analytical skills within a dynamic organization to support data-driven strategies and drive operational excellence.

Education:

Rutgers Business School – New Brunswick

Bachelor of Science, Major: Business Analytics & Information Technology
Honors: Dean's List (Five semesters)

GPA: 3.54/4.0

Graduation: May 2023

Key Skills:

- Data Visualization: Tableau, Power BI
- Programming: SQL, Python, R Studio
- Microsoft Office: Excel, PowerPoint, Word

Certifications:

Certified Tableau Desktop Specialist, Career Foundry Data Analyst Certificate

Professional Experience:

IT America

January 2024 – July 2024

Data Analyst Intern

- Leveraged data visualization platform Tableau to build interactive dashboards, enabling data-driven insights for analytics and strategic decision-making.
- Performed data extraction and transformation using SQL queries and Excel to acquire relevant datasets for analysis related to the company's risk management strategies.
- Designed and developed visualizations in Tableau for predictive analytics use cases, enabling data-driven forecasting and modeling.
- Collaborated with clients to define key performance indicators (KPIs) and business metrics, delivering customized analytics solutions that led to measurable improvements in business performance.
- Assisted senior partners with marketing, recruitment, investment analysis, and scheduling with prospective clients.

Rutgers OIT

June 2021 – May 2022

Consultant

- Used advanced Excel functions (VLOOKUP, INDEX-MATCH, nested formulas) and Power Query to clean and analyze raw datasets.
- Performed data-driven troubleshooting by analyzing system logs and technical data to resolve complex computing issues.
- Identified recurring patterns and root causes through data analysis to develop knowledge base solutions.
- Utilized remote desktop tools and scripting for efficient remote troubleshooting and data collection.

Academic Experience:

Data Mining Final Project:

April 2023 - May 2023

- Executed a comprehensive data mining project on diabetes factors using Excel for data preprocessing and R Studio for analysis.
- Applied diverse methodologies, including Naïve-Bayes, K-means, CART, Random Forest, and Logit Regression to determine the leading factors of diabetes.
- Developed a Tableau BI visualization for insightful and visually compelling representations of the findings.

Related Classwork:

Investment Modeling With “R”, Foundations of Business Programming, Marketing Analytics, Data Mining for Business Intelligence, Statistical Methods in Business.
