Education

California State University, Long Beach, USA

Master of Science, Computer Science (CGPA: 3.8/4)

Aug 2024 – Dec 2025

St. Francis Institute Of Technology, India

Bachelor's in Computer Engineering (CGPA: 9.48/10)

Aug 2017 – Aug 2021

Work Experience

Teaching Assistant

California State University, Long Beach

Jan 2025 – May 2025

- Improved student grades by **40%** through a structured syllabus and instruction for 100+ undergraduates in **Object-Oriented Design Patterns**.

Technical Program Assistant

California State University, Long Beach

Sep 2024 – Present

- Built a data pipeline using **Amazon S3**, **PostgreSQL**, and **pandas** to ingest and analyze 10,000+ tutoring session logs; automated processing enabled peak-hour and subject demand analysis, reducing staffing costs by **25%** and improving fund allocation to direct student support.
- Developed internal dashboards using **Python**, **React.js**, **JavaScript**, integrating **Chart.js** to visualize usage trends and support operational decision-making.

Junior Software Engineer

Tietoevry Fintech

Aug 2021 – Aug 2024

- Delivered features and maintained **scalable microservices** for fintech products like **Tietoevry Payment Hub** and **Reconciliation Engine** using **Spring Boot**, **J2EE**, **Maven**, **Hibernate (Object Relational Mapping)**, and **Java 8**; ensured high code quality and test coverage using **JUnit** and **Mockito**, consistently delivering enhancements ahead of deadlines.
- Streamlined end-to-end **CI/CD pipelines** using **Jenkins**, **Docker**, **Kubernetes**, and **Terraform** for **Infrastructure as Code (IaC)**, with configured deployments to **AWS EC2**, accelerating release cycles by **50%**.
- Migrated legacy **REST APIs** to **GraphQL**, enabling precise data fetching and reducing payloads, improving response efficiency by **30%**.
- Integrated **Kafka** for decoupled asynchronous transaction processing and **Redis** for low-latency caching, contributing to a **20% increase in system throughput** and improved reliability in payment operations.
- Executed real-time monitoring and alerting via **Datadog**, reducing incident resolution time by **30%** and improving payment service reliability.
- Implemented robust **API security** using **OAuth 2.0**, **JWT**, and role-based access via **AWS IAM** and **Okta**, implementing features under the guidance of senior engineers and cross functional teams, including token validation and access control for microservices.
- Optimized **SQL queries** and indexing to enhance data performance by **40%** in high-volume transactional systems.
- Led integration and E2E testing with **Cypress**, resolving bugs and mentoring juniors to boost code coverage to **85%**.
- Modernized 100+ legacy payment UIs by migrating from JSP to **Angular** with **TypeScript**, **Bootstrap**, and **Material UI**, applying **Reactive Forms**, **frontend design patterns**, and **RxJS-based state management**; optimized API interactions using **ES6+ async/await**, improving user experience and reducing UI-related support issues by 40%.

Jr. Data Scientist

KubixSquare – Remote

May 2020 – July 2020

- Engineered a forecasting data pipeline using **Spark (PySpark)**, **pandas**, and **NumPy** to forecast daily revenue from electronic sales invoices, storing results in a **NoSQL Cassandra** database and serving them via a **FastAPI REST API**.
- Trained Machine Learning models like **XGBoost** and **Random Forest** with **lag-based** and **date-derived** features to forecast daily revenue, achieving **83%+ R²** on validation data.

Projects

Appointment and Service Booking System | React.js, Node.js, Express.js, Prisma, PostgreSQL, RabbitMQ, Kubernetes |

- Built a real-time appointment booking system using **React.js**, **Node.js**, and **PostgreSQL** with **row-level locking** and **RabbitMQ** to prevent double-booking; applied **Redux**, **React Hooks**, and **WebSockets** for live updates, and orchestrated services via **Kubernetes**.

AI Chatbot for BMW Indonesia – GIAS 2023 | LLM, NLP, Botpress, Zapier |

- Architected a multilingual AI chatbot for **BMW Indonesia** using **Botpress** for conversational flow, integrated **LLM-based responses** for natural interaction, and automated workflows via **Zapier** to handle dealership and service-related queries.
- Reduced response time by 40% and captured 25+ test drive bookings by handling 100+ concurrent visitor queries at launch.

Skills

- Languages & Frameworks:** Java, Python, TypeScript, JavaScript, SQL, NoSQL, PL/SQL, HTML, CSS, Spring Boot, J2EE, Spring MVC, Hibernate, Maven, RabbitMQ, Prisma, Angular, React.js, Next.js, Node.js, Material-UI, GraphQL, PySpark, Pandas, NumPy, Machine Learning, Redis, Kafka, PostgreSQL, MongoDB, Cassandra
- DevOps & Tools:** Docker, Kubernetes, Jenkins, Terraform, Git, Bitbucket, Jira, Postman, JUnit, Mockito, Cypress, Datadog, AWS
