

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 4 years of experience in designing scalable ETL/ELT pipelines, developing predictive models, and building insightful dashboards. Skilled in SQL, Python, and cloud platforms like GCP, AWS, Azure to deliver data solutions that enhance operations and decision-making. Adept at transforming raw data into actionable insights through analytics and data visualization tools like Power BI, Tableau and Looker.

PROFESSIONAL EXPERIENCE

Data Analyst Intern - Infor

09/2024 - 02/2025

- Assisted in data cleaning, formatting, and validation to support ETL workflows across operational datasets.
- Applied Python and Pandas to perform data transformation and exploratory analysis.
- Reviewed and organized raw input files to prepare them for loading into staging environments.
- Documented routine processes and participated in weekly team check-ins with analysts and data engineers.

Data Analyst II - Cognizant

05/2021 - 02/2023

- Designed and maintained scalable ETL/ELT pipelines, integrating data from SAP HANA, BigQuery, and Snowflake.
- Automated workflows on cloud platforms like GCP, AWS and ensured data quality and compliance through validation and governance checks.
- Contributed to developing an Inventory Demand Forecasting Model using Python, Scikit-learn and SQL, improving planning accuracy and created Power BI dashboards to track actual vs. predicted demand, stock alerts, and forecast accuracy.
- Built Tableau and Power BI dashboards visualizing operational trends, performance indicators, and segmentation analytics.
- Collaborated with non-technical stakeholders to translate complex data insights into actionable business decisions.
- Implemented data validation, logging, and alerting mechanisms, reducing data-related incidents and increasing analytics reliability.

Data Analyst - Cognizant

03/2019 - 04/2021

- Built end-to-end ETL pipelines to extract and transform sales and operations data from multiple sources including SQL, APIs, and S3.
- Developed executive dashboards in Power BI and Tableau to track KPIs like total sales, fulfillment rates, and escalations.
- Enhanced query performance through optimized stored procedures and SQL views.
- Created performance metrics using DAX and Tableau calculated fields for operations and performance reporting.
- Worked on creating and reviewing test cases and validation steps during UAT with business analysts and QA teams.
- Worked on managing and updating tasks in Jira by translating business requirements into user stories for the development team.

Product Specialist – Feedback Engineering Team - Cognizant

07/2017 - 02/2019

- Managed product issues and data quality for Google Partner products using internal dashboards and tools.
- Built and maintained taxonomy frameworks for product classification, ensuring quality in collaboration with vendors and partner teams. Coordinated team worklogs for new product launches and feature rollouts.
- Tracked escalations, automation opportunities, and partner requests through structured workflows.
- Created and shared weekly analytics reports using Google Data Studio, SQL, and Excel for internal stakeholders.

TECHNICAL SKILLS

- Programming & Scripting: Python, SQL
- Data Visualization: Power BI, Tableau, Looker
- Tools & Platforms: Apache Airflow, Amazon S3, UAT, A/B testing Git, Jira
- Machine Learning Models: Linear Regression, Forecasting, Feature Engineering, Supervised & Unsupervised Learning
- Other: GCP, AWS, Azure, Snowflake, Redshift, SAP HANA, BigQuery, ETL/ELT Pipelines, Data Modeling, Excel, Docker, CI/CD pipelines

EDUCATION

Master's in Computer Science - GPA 3.9

Bachelor's in Information Technology - Vardhaman College of Engineering, India
