aniya.t.mitchell@gmail.com | 980-439-2758
221 Sylvania Ave, Charlotte, NC 28206

Education

Boston University - Online
Master of Science in Data Science

Expected December 2026

Florida Atlantic University - Boca Raton, FL

May 2025

Bachelor of Arts in Computer Science | Minors: Cyber Security, Artificial Intelligence

Relevant Courses

Python Programming, Computer Operating Systems, Full Stack Web Development, Data Structures and Algorithms, Principles of Software Engineering; Internet Computing, Intro to Deep Learning, Intro to Artificial Intelligence; Cloud Native Development, Data Mining and Machine Learning; Foundations of Cybersecurity, Mobile Application Projects

Experience

Infinity Technology Solutions

Mooresville, NC

Intern

May 2023-July 2025

- Enabled successful field deployments for NOKIA and Duke Power by diagnosing and resolving hardware issues, minimizing downtime and ensuring consistent network performance.
- Streamlined reporting workflow by automating data logs and project documentation, saving ~5 hours weekly and boosting reporting accuracy.
- Standardized test protocols and network configurations, reducing setup time by 20% and improving consistency across deployments.
- Partnered with engineers on system diagnostics and end-to-end infrastructure rollouts, ensuring successful configuration and system validation.

Technical Skills

- Programming Languages: Python, Java, SwiftUI, SQL
- Tools: Google Colab, GitHub, TensorFlow, Keras, scikit-learn, NumPy, Matplotlib, Flask

Certifications

- CodePath Intermediate Cybersecurity December 2024
- CodePath iOS Development with SwiftUI December 2024
- Nokia Wavence Certification June 2024
- CodePath Web Development May 2024

Relevant Projects

Spotify & YouTube Data Analysis in Python

Spring 2025

- Analyzed global music streaming trends to identify high-performing regions and artists, informing potential marketing strategies
- Cleaned and aggregated multi-source CSV data using Python, improving data quality and analysis accuracy

Tools: Python, NumPy, Matplotlib, CSV module, Google Colab

COVID-19 Case Analysis with Python

Spring 2025

- Developed a Python-based dashboard to monitor and visualize global COVID-19 trends using real-time time-series data
- Enabled quick country-level comparisons through conditional logic, structured outputs, and data filtering

Tools: Python, TensorFlow/Keras, NumPy, Matplotlib, scikit-learn, Google Colab

Athlete Event Data Analysis Using SQL

Spring 2025

- Created and executed a series of advanced SQL queries to extract insights from a multi-table sports competition database.
- Utilized JOIN, GROUP BY, WHERE, and nested subqueries to analyze athlete performance, event participation, and equipment usage.
- Demonstrated proficiency in data filtering, conditional logic, and aggregations across multiple datasets.
- Designed queries to answer questions involving age-based filtering, event trends, and competitor statistics
