Proven ability to act as a liaison between business stakeholders and IT teams, translate complex business needs into clear functional and technical documentation, and support end-to-end system delivery from design through production. Deep background in P&C insurance, billing operations, UAT, post-production support, and data analysis using SQL. TECHNICAL SKILLS Business Systems Analysis: Requirements Gathering, Stakeholder Management, Functional & Technical Design Documents, User Stories, Acceptance Criteria, Process Flows, Gap Analysis, Change Management, Training & Documentation, Production Readiness Guidewire Expertise: BillingCenter (Invoices, Payments, Delinquency, Reinstatement, Financial Transactions), PolicyCenter, ClaimCenter, Guidewire Cloud Testing & Delivery: UAT Support, Behavior-Driven Testing (BDD), Defect Triage & Root Cause Analysis, Deployment & Release Support, SDLC (Agile & Waterfall) Data & Tools: SQL (Oracle, SQL Server, MySQL), JIRA, Confluence, Azure DevOps, ServiceNow (exposure), AWS (EC2, S3), Postman PROFESSIONAL EXPERIENCE	
Anjs Technologies LLC, USA	Jan 2025 - Present
Business Systems Analyst – Guidewire BillingCenter	
- Act as a liaison between business stakeholders and IT teams to support enterprise-level billing initiatives using Guidewire BillingCenter. - Maintained subject matter expertise in Guidewire BillingCenter, supporting enhancements, defect fixes, and billing process improvements across releases. - Participated in deployment support and post-production activities, including triage, troubleshooting, and data analysis using SQL to ensure system stability. - Perform systems analysis and translate business requirements into functional and technical design documentation, including user stories, workflows, and acceptance criteria. - Guide configuration and enhancement of BillingCenter features including invoicing, payments, delinquency processing, reinstatements, and financial integrations. - Support application testing, including User Acceptance Testing (UAT), by preparing test scenarios, validating outcomes, and coordinating defect analysis with development teams. - Lead complex change management initiatives including training, documentation, and production readiness reviews. - Manage production tasks, including triage, troubleshooting, post-production support, and data analysis using SQL. - Contribute to early-phase estimation and solution design discussions for new billing initiatives. - Ensure compliance with internal security standards, audit requirements, and corporate policies. Environment: Guidewire BillingCenter, PolicyCenter, ClaimCenter, SQL, JIRA, Confluence, AWS, Postman	
Zensar Technologies, India	Feb 2022 - Jun 2023
Business Systems Analyst – Billing & Insurance Systems	
- Supported large-scale Guidewire implementations across BillingCenter, PolicyCenter, and ClaimCenter for P&C insurance clients. - Documented billing workflows, user stories, and acceptance criteria to support BillingCenter configuration and release activities. - Supported UAT and post-production support, coordinating defect triage, root cause analysis, and data validation with cross-functional teams. - Worked closely with business users to document workflows, system behaviors, and non-standard auto insurance scenarios. - Created functional design documents, process flows, and test artifacts to support configuration and release activities. - Participated in BillingCenter configuration validation for invoices, payments, refunds, delinquency, and financial synchronization. - Provided post-production support, including defect analysis, production fixes, and data investigation. - Actively participated in Agile ceremonies, sprint planning, backlog grooming, and release readiness activities. Environment: Guidewire BillingCenter, PolicyCenter, ClaimCenter, JIRA, Confluence, Oracle SQ	
Cyient, India	Jun 2020 - Oct 2021
Associate Business Analyst	
- Supported ClaimCenter initiatives with strong involvement in requirements analysis and functional validation. - Assisted senior Business Analysts with requirements analysis and UAT coordination, including workflow validation and backend data checks using SQL. - Documented end-to-end workflows, business rules, and data requirements. - Assisted senior BAs with UAT coordination, defect tracking, and production support. - Used SQL to validate claim and billing data across Guidewire backend systems. Environment: Guidewire ClaimCenter, SQL, JIRA	
INTERNSHIPS	
Excelerate, USA	Jun 2023 - July 2023
Data Analyst Intern	
- Worked with large data sets using SQL, Excel, and Power BI, validating data quality and identifying anomalies across reporting pipelines. - Built automated reporting templates integrating data cleaning, validation rules, and audit checks, improving accuracy and consistency. - Collaborated with engineering teams to understand data flow, access rules, and security requirements, supporting analytics used for decision making.	
Cyient, India	Oct 2019 – May 2020
QA Intern	
- Supported functional and integration testing for enterprise applications, validating end-to-end system workflows and data consistency. - Performed API testing using Postman, validating request/response payloads, authentication, and integration behavior. - Conducted backend database validation to verify transaction accuracy, audit logs, and data integrity across systems. - Assisted in automation development using Selenium and TestNG, contributing to regression test coverage and release validation.	
PROJECTS	
CareerLens – Smart Career Path and Salary Predictor	
- Tested end-to-end identity workflows, role assignment, and access governance. - Validated SailPoint-driven IAM flows, password policies, session expiration, and privilege restrictions. - Performed DB-level access validations and API security checks.	
Masters in Information Systems	May 2025
Saint Louis University, Saint Louis, MO, USA	
Bachelors in Electronics and Communication Engineering	Aug 2020
JNTUH University, India
